HEADQUARTERS, FIRST TACTICAL AIR FORCE, France -- In spite of almost continuous bad weather, aircraft of the First Tactical Air Force flew more than 6,300 sorties against enemy front-line installations and road, rail, and water transport systems supplying the German armies on the southern Rhine front during January.

Icy runways, near-zero temperatures, and snowstorms limited activity of all units, but the French-American air force was grounded completely by weather on only three days.

Motor and rail transport were the chief targets closely coordinated with the American Seventh and French First Army operations. Two hundred seventy one motor transports and 432 railroad cars were put out of commission during the month and an additional 415 motor transports and 1148 railroad cars were damaged. Of these totals, P-47 Thunderbolts of XII Tactical Air Command claimed the lion's share.

The network of rail lines linking Neunkirchen, Kaiserslautern, Ludwigshafen, and Stuttgart to the enemy front were attacked almost daily, and a total of 170 rail cuts were made in the area. Marshalling yards in the same district came in for a steady pounding, largely at the hands of French and American Thunderbolts, but also by B-26 Marauder medium bombers whenever weather permitted. Thirty-five attacks were made on marshalling yards.

Forty-five tanks, 60 horse-drawn vehicles, and 10 armored vehicles were destroyed and 82 tanks, 68 horse-drawn vehicles, and 36 armored vehicles damaged.

ERE

The Luftwaffe rose to challenge our aircraft in force only on two days, the first and second of January. On the first day 17 German aircraft were destroyed and 11 damaged and on Jan 2, eight were destroyed, 4 probably destroyed, and nine damaged. Seven Thunderbolts were lost in these two air battles. Altogether, 50 enemy aircraft were destroyed, 6 probably destroyed, and 28 damaged in combat during the month, for a loss of 22 American and French aircraft. In addition 3 enemy aircraft were destroyed on the ground and one was damaged.

Take the 324th Fighter Group, for instance. With more than 2,000 missions and 20,000 sorties ~~taxat~~ on its log books, it has been killing Germans for a long time. ~~Example~~ It first tangled with the Luftwaffe in Africa, flying P-40's, the fighter plane, even though obsolescent, which was America's best at the time of Pearl Harbor. ~~i~~ Since then it has seen ~~them~~ --and contributed much--to the development of effective American combat aircraft and the ~~an~~ evolution of the fighter bomber tactics which ~~xxxxxx~~ ~~xpanta~~ achieved such spectacular results in the pursuit of the German armies from Normandy to the Rhine.

Or "groupe La Fayette" of the First French Air Corps. Under a different ~~xxxxx~~ designation, it flew as part of the Armee de l'Aire in 1939 and 1940. After the French armistice, ~~xxxxxxx~~ many of its pilots, by means best known to themselves, made their way to Africa. In December, 1942, in Algiers, it was reformed ~~xxxxxxx~~ and became the first French squadron to ~~be~~ fly American aircraft and use American equipment in ~~the~~ the war. ~~xxxxxxx~~ Assuming the name and insignia of the famous American squadron which flew with the French in the ~~1914-1918~~ 1914-1918 war, it participated in the Tunisian campaign and suffered heavily in the Battle of Kasserine Pass. After operating against German ~~xxxxxxx~~

seaborne evacuation attempts and German ~~and~~ Mediterranean shipping in ~~general~~, it ~~was~~ was employed tactically in the Battle of Italy from Corsican bases. From the same bases it participated in the initial air assault preceding the landing in Southern France.

~~There were many other groups of aircraft~~

Equally skilled and experienced are the M medium bomber groups. One American group was the first in ~~the~~ B-26 Marauder group to operate on this side of the Atlantic, ~~at a time~~ at a time when the slim, two-engined American bombers were widely criticized ~~as~~ as dangerously tricky. Their experience did a lot to ~~iron~~ iron out the early kinks in Marauders and ~~develop~~ develop the combat techniques which have made it one of the outstanding aircraft in the European theatre.

French bomber groups, also flying Marauders, were equipped and trained ~~by~~ by Americans as soon as ~~the~~ aircraft and personnel were available. ~~The nucleus of aircrew members~~ The nucleus of aircrew members came from General (then Colonel) LeClerc's forces in the Chad region, but ~~the~~ by far the greatest part of them ~~was~~ were men who ~~had~~ had been in German hands, ~~including~~ including those who had eluded the Gestapo in France or even in German prison camps

and made their way, sometimes only after incredible adventures,  
to the haven of Africa.

~~XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX~~

Meanwhile, French units were also being trained by the RAF on British equipment, including Hurricanes and Spitfires.

~~XX~~

For the first time the Allies had ~~survived~~ within their ~~grasp~~ reach the establishment of a definite air superiority over the enemy in any theatre of operations. Every man and every aircraft that could be got into the air was desperately needed if the destruction of the Luftwaffe which was the ~~xxxxxxxxxxxxxxxx~~ essential prelude to decisive ground action was to be accomplished. But there was a more far-reaching goal behind the warm welcome which both the RAF and the American Air Forces extended to French personnel.

**Inter-Sectoral Liaison Committee**

They were looking forward to the day when the Armee de l'Aire, crushed by the numerical and technical superiority of the Luftwaffe, would once again take its place ~~amongst~~ as an equal partner with the Air Forces of the United Nations.

By 0900 this morning, fighters and fighter-bombers of the First Tactical Air Force had destroyed 17 German aircraft out of many scattered formations thrown into action, almost entirely in the area between Kaiserlautern and Homburg. Already New Year's day was their best yet against the Luftwaffe.

Eleven other Nazi planes were damaged. One of our fighter-bombers had not yet returned.

Three squadrons of the "Orange-Tail" P-47 Thunderbolt Group commanded by Col James B. Tipton, Blytheville, Ark., accounted for 15 of the planes destroyed and all those damaged. The Group, which was celebrating its second anniversary as well as the new year, had just completed a dive bombing mission on the Homburg rail yards, destroying six buildings and six rail cars, when they spotted the first of several motley formations, totalling more than 30 ME-109s, ME-210s and ME-410s.

2nd Lt Wayne E. Owens, Cedar Street, Menlo Park, N.J., who led the group with three victories, all over ME-109s, said "We were at about 10,000 feet when I saw four Germans below us. Just then all hell broke loose and I went down to get in on it. An ME-109 pulled almost directly up and I followed him. He almost stalled and I fired from 50 yards. The Jerry exploded and I watched him hit the ground. Then I circled, and got hits on another. I picked up a third, got on his tail, and gave him a burst. He started smoking, and fell into a spin. I then got a deflected shot on another Messerschmitt and made strikes on him. I saw three P-47s chasing a German so I went down to give aid. I overshot the one I was aiming for, pulled round, and fired on him. The Pilot

bailed and the plane crashed."

Two ME-109s were shot down by Captain Alfred W. Perry, Franklin, N.C. "After dive-bombing a train we engaged some ME-109s at 3,000 feet. I took the outside man in a formation of four, and gave him a long burst. He crashed in a woods. I fired at two more, but could not see the results. Finally I got on the tail of another, and gave him a full burst as he pulled almost straight up. He bailed at about 1000 feet, and his plane crashed in a burst of flame," Perry said.

Many of the aircraft appeared to the pilots to be an old type of ME-109, with tail braces--which may have caused the stalls that permitted some of the kills.

Other pilots who were credited with aircraft destroyed were:

2nd Lt Donald S. Flowers, 1111 4th St., Palmetto, Fla., 1 ME-210 destroyed and 1 damaged.

Night and day fighters of the First Tactical Air Force this morning also destroyed two JU-88 German bombers, one over allied soil and the other over German-held territory.

The same Beaufighter crew which knocked down a JU-88 and an HE-111 Saturday morning -- Pilot 1st Lt Edward A. Schluter, 904 Nebraska St., Oshkosh, Wis., and Radio Operator 2nd Lt Donald J. Meiers, 3536 West Bryn Mawr Ave., Chicago, Ill -- got the first one. After following it for a few minutes they identified it at a distance of 500 feet. The first burst exploded the right engine; the second hit the fuselage, burning, the twin-engined bomber peeled off from 10,000 feet, then broke in two in the air. This encounter took place shortly before 4 a.m. south of Nancy.

Five and a half hours later a flight of P-47 Thunderbolts spotted another German bomber, south of Homburg. The entire flight ganged up on the lone JU-88, but two P-47 pilots were credited with its destruction. They were 1st Lt. Robert M. Woodside of Parma, Mo., and 1st Lt. John W. Ginder, Hershey, Pa.

First TAC AF B-26 Marauders, escorted by Thunderbolts, bombed enemy barracks, storage dumps and work shop in the German communication center and supply point of Kaiserlautern leaving large fires with smoke rising to heights of 1,000 ft.

Operating in three separate areas, the attacks were carried out in three waves and in each area crews reported good concentrations of bombs on the targets. One Marauder was lost to flak. Today's medium bomber operations were flown in good weather. No enemy aircraft were observed.

1st Lt Charles A. Muse, a bombardier from Shelbyville, Tenn., said "It looked as though the barracks were thrown around like cars in a windstorm."

Besides defeating the enemy in the air, the ~~fighter~~ fighter-bombers of XIII Tactical Air Command (U.S. component of First TAC AF) scored telling blows against transport targets mostly along the north-western part of the Seventh Army Front in the Homburg-Kaiserlautern area. The following claims on ground objectives were listed:

Five locomotives destroyed, 13 damaged; 42 railway cars destroyed, 230 damaged; 35 motor transport destroyed, 91 damaged; a rail crane damaged; rail lines ~~cut~~ out in 11 places; nine road blocks blasted; a motorcycle blown to pieces; four horse drawn vehicles destroyed and 28 damaged.

On a railway train headed west, moving from Kaiserlautern, the P-47 Thunderbolt pilots caught a string of flat cars loaded with tanks, and destroyed three tanks, damaging 19.

Three gun positions were ~~knocked~~ knocked out and eight damaged, and an ammunition dump was attacked.

Good weather permitted First TAC AF to fly more than 500 sorties. Three fighter-bombers are missing.

French-flown B-26 Marauders crossed the Rhine to bomb enemy railway stations at Ettenheim, some 15 miles west of Offenburg, and Schwinningen, 35 miles to the southeast. These are German supply links leading to the ~~Colmar~~ Colmar pocket. Results were unobserved.

HEADQUARTERS, FIRST TACTICAL AIR FORCE, France -- In what is believed to be a record for ~~more~~ *bad weather* flying on the European continent, ~~medium bombers and~~ fighter bombers of the First Tactical Air Force ~~flew~~ *from* ~~thirty-four consecutive days~~ *between* 17 December ~~to~~ 16 January, inclusive, it was ~~revealed~~ announced today.

Significantly, ~~General Ralph Royce~~ Major General Ralph Royce, commanding general of the Franco-American air force, was a pioneer in ~~experimental~~ army experiments in winter flying which began long before the war.

~~Favorite targets~~ *targets* of the French and American flown P-47 ~~Thunderbolts~~ Thunderbolts, which flew more than 10,000 sorties during the period, were German supply dumps, motor transport, and the network of rail lines ~~behind the German lines~~ *feeding the Wehrmacht* in the Colmar pocket and behind the Bitche ~~main~~ battle area. Marauders of the First Tacaf also made one attack in force on the same targets, but during the rest of the period low ceilings and icy runways combined to keep the medium bombers on the ground. Especially notable was the toll taken on German transport, with 117 locomotives, 1,805 railway cars, and 276 motor transports claimed as destroyed. More than 1,900 railway cars, three hundred thirty six locomotives, 1,232 railway cars, and 453 motor transports were captured, and 173 railway cars, 117 locomotives were blocked.

Very little opposition was made on marshalling yards. There was little opposition, but in the First Year of the war.

There was little enemy opposition. Even when the Luftwaffe was not grounded, it showed little disposition to fight. Even so, many aircraft were destroyed. For these encounters except when it had strong numerical superiority. With numerical superiority, German planes would ordinarily make one pass at our aircraft and attempt to get away. In some cases, however, 121 enemy aircraft were destroyed in combat for a loss of 45 first year planes. In addition 16 enemy aircraft were listed as "probably destroyed" and 21 damaged. Five German planes were destroyed on the ground and 41 captured.

Continuing their victory parade against the Luftwaffe, which Monday left 17 Nazi aircraft destroyed for the loss of three Thunderbolts, fighters and fighter-bombers of the First Tactical Air Force today took up a German challenge in the Rhine valley and by nightfall had:

Destroyed eight FW 190s and ME 109s;  
Probably destroyed four, and  
Damaged nine.

P-47s of the XII Tactical Air Command, after dive-bombing rail yards southwest of Pirmasens, were bounced by 20 Focke-Wulf 190s and in the battle that ensued, three of the enemy aircraft were knocked out, seven damaged and four probably destroyed. Later, near Neustadt, a flight of German ME 109s rose to give battle. Three were destroyed and two damaged.

Two ME 109s were claimed by a XII TAC Provisional Reconnaissance group near Karlsruhe. The first was contacted at 6000 ft three miles west of the city, the second in the same area at 1000 ft.

Lt Col Philip E. Bacon, 140 East High Street, London, Ohio, deputy group commanding officer and squadron leader, said "I saw a flight of four FW 190s flying northeast of my squadron. One came in under me and I dived under his tail letting go a long burst. His ~~main~~ engine and right wing were on fire as he spun down smoking badly. My wingman saw a piece of his plane fly off." ~~He~~

fired several bursts. The FW dived to tree-top level. His left wing came off and he crashed on the side of a hill."

1st Lt Lowell G. Long, 409 North Lena Street, Dothan, Ala., destroyed an FW 190 and damaged another, and the following pilots claimed ME 109s destroyed: 1st Lt Francis T. Evans, Jr., Quantico, Va., 2nd Lt Arden Williams, 1372 Harvard Street, Santa Monica, Calif., and 2nd Lt Charles B. Meyer, 604 West 12th Street, Austin, Texas.

Meanwhile, B-26 Marauders, attacked enemy supply stores and barracks at Nunschweiler, near Freiburg, and Oos, near Rastatt. Crewmen reported a good concentrations of bombs on their targets. Escorted by Thunderbolts, pilots said no enemy aircraft was observed.

Medium bombers of the French First Air Corps bombed a rail station at Donau-Eshingen with good results.

Throughout the day, First TAC AF aircraft flew 625 sorties in nearly 100 missions. Other claims are: six locomotives destroyed, 14 damaged; 103 railway cars destroyed, 328 damaged; 21 motor transports destroyed, 14 damaged; six storage tanks destroyed; 35 buildings knocked out, 25 damaged; five rail yards damaged; 5 tanks destroyed, 9 damaged; 12 horse-drawn vehicles destroyed, 3 damaged; 13 rail cuts; Unbnghabn one barge destroyed; 3 road blocks effected; one pontoon bridge damaged.

From the day's operations, four P-47s did not return.

\* FIRST TACTICAL AIR FORCE THUNDERBOLT BASE, FRANCE \*\*

The rigid training of ~~the Wehrmacht cost a German soldier~~  
his life, a P-47 Thunderbolt pilot of the First Tactical Air Force  
reported today.

The pilot, on armed reconnaissance ~~recently on the~~ Sixth  
Army Group front, spotted a staff car moving along a road. Plunging  
down over the vehicle, he sprayed it with machine-gun fire.

The car stopped, the Germans in it piled out and raced  
for cover.

One of them, however, paused, turned, and like a ~~man~~  
perfectly disciplined German Army man, closed the door of the  
sedan.

~~THE OTHERS MAY HAVE ESCAPED, THE PILOT BELIEVES~~  
The others may have escaped, the pilot believes, but  
~~his bullet is~~ their better-disciplined comrade was cut  
down by the Thunderbolt's bullets.

French-flown P-47 Thunderbolt fighter-bombers of the First Tactical Air Force, maintaining their pressure on communications leading into the Colmar pocket, today bombed the railway station at Emmendingen, eight miles south of Freiburg.

Hits were observed in the railway yards at Emmendingen, and on a 60-car freight train there.

Other Thunderbolts of the French First Air Corps, despite thick low-hanging clouds, struck at gun positions ~~xxx~~ defending Colmar with unobserved results. French Spitfires swept the French First Army battle areas, without encountering any enemy air opposition. No enemy aircraft were seen during the day, and all the French-flown planes returned safely.

Weather kept all American planes on the ground today, and limited French activity to some 50 sorties.

Operating in adverse weather over the Runstedt battle area, fighters and fighter-bombers of the First Tactical Air Force today carried out damaging attacks in and near Bitsche, a German keypoint in the Maginot line.

P-47 Thunderbolts of the XII Tactical Air Command flew more than 150 sorties without enemy air opposition and without loss, strafing and damaging at least 18 enemy light artillery guns.

At Kanweiler, some five miles northeast of Bitsche, the fighter-bombers strafed motor transports on roads leading into the city -- claiming four destroyed and six damaged. Explosions and fires were observed at Mouterhouse, an enemy strongpoint in the same area. Hits were scored on a large factory in the town.

Other claims are: 18 buildings destroyed, four damaged; one rail cut, and eight road blocks hit. ~~Reinforcements~~

Fighters and fighter-bombers of the French First Air Corps, meanwhile, carried out operations in advance of the French First Army, claiming 85 railway cars damaged, 2 locomotives destroyed and seven rail cuts effected. Weather obscured accurate observations. There were no losses.

First Tactical Air Force P-47 Thunderbolts, striking again at enemy communications ahead of the Seventh Army's lines, ran into a formation of about 25 FW-190's and ME-109's, and knocked down four of the Focke-Wulf's and damaged three, for the loss of two P-47's.

The visitors, all members of the group commanded by Col Bingham T. Kleine, Gonzales, Texas, were: Capt. Thomas E. Cox, 112 Calhoun Street, Clover, S.C.; Capt. Alexander H. Tait, 228 Morris Street, Morgantown, W.Va.; Maj. John W. Leonard, 3810 Alabama Avenue, St. Petersburg, Fla., and 1st Lt. Curtis L. McGonigle, 111 Hermitage Court, San Antonio, Texas.

"We found them about 10 miles northwest of Worms," said Tait. "When we started mixing with them, a Jerry got on my tail. But my wingman got rid of him, and I went after an FW-190 myself. I got his gas-tank and he exploded."

McGonigle got the gas tank of his victim also.

"They were at 11,000 feet when we attacked," he said. "When I got mine he broke into so many pieces that I had to cut my throttle to keep from being hit by the flying fragments."

The First TAC AF's Fighter-bombers, in the face of snowy weather, carried out 28 missions for a total of 240 sorties, mainly in the areas of Neunkirchen, Kaiserslautern and Karlsruhe, and claimed the following toll of enemy transports:

Two locomotives destroyed, seven damaged; 40 railway cars destroyed, 51 damaged; 18 motor transports destroyed, 20 damaged. Six rail cuts were made, one of them at a tunnel 10 miles northeast of Homburg, where

American-flown fighter-bombers of the First Tactical Air Force, operating in snowy, misty weather in the Rhine valley, today carried out a limited number of sorties against enemy transport near Gamsheim, seven miles northeast of Strassburg.

Bombs were dropped along both sides of the Rhine destroying four motor transports and damaging three. Returning pilots of the XII Tactical Air Command sighted a boat crossing the river at this point headed towards the east bank. No enemy aircraft were observed and all the P-47 Thunderbolts ~~returning~~ returned safely.

Fighter bombers of the First Tactical Air Force attacked two marshalling yards behind the German lines, severed a bridge across the Rhine-Rhone canal, and destroyed five ME 109s in a dogfight against superior odds today despite weather conditions that produced some ceilings as low as 500 feet. One gun position was destroyed near Buhl, 20 miles northeast of Strassburg, east of the Rhine.

One hundred thirty-nine sorties were flown for the loss of one fighter-bomber.

The marshalling yards at Neustadt, 20 miles north of the Bitcher battle area, and Rastatt, approximately the same distance East of Hagenau, were bombed by Thunderbolts which dove through holes in the clouds to make their attack. Low visibility prevented accurate observation of results, but a rail out was known to be scored at Neustadt. Pilots said more than fifth cars were disabled.

French-piloted P-47 Thunderbolts ranged over the Colmar pocket, ~~striking~~ striking at communications within the German-held area and claiming the destruction of a road bridge over the Rhine-Rhone canal just south-east of Hirsfelden. Also near Hirsfelden they bombed two road-blocks and destroyed a motor transport. Spitfires of the French First Air ~~Group~~ Corps swept both sides of the Rhine from Strassburg to Mullheim, and like the Thunderbolts, met no enemy fighters. One Thunderbolt is missing from these operations.

Fighter bombers of the First Tactical Air Force took advantage of frequent breaks in the weather today to increase their attacks on targets ahead of the Sixth Army Group lines, making damaging assaults on concentrations of tanks, ammunition and supply dumps and railway objectives.

A total of 325 sorties was flown during the day, for the loss of one P-47 Thunderbolt.

Nine tanks were destroyed and 19 damaged in four missions by American Thunderbolts, which found their targets in two groups of tanks of about 50 each, on each side of the Rhine. Both were parked in wooded areas, and all the tanks in both cases were facing southwest, though motionless. Four were destroyed and 12 damaged in the northern part of the Colmar pocket, 12 miles northeast of Colmar, while another five were destroyed and seven damaged, just east of Emmendingen. The pilots also hit some motor transports in other areas.

"There were plenty of tanks in the woods," said Capt Robert Harding, a P-47 pilot who flew in a squadron operating near Emmendingen. "Some of the motor transports looked to be amphibious."

Three dumps, one of them apparently storing ammunition, were destroyed. They were at Zweibrucken, Landau and Pirmasens.

"I led the second flight to go over the Landau dump," reported 2nd Lt Clarence B. Slack, Leavenworth, Kan. "The first planes probably exploded everything there was in the dump, because although our bombs landed in the target area, there were no explosions. All the snow was gone in an area 150 by 200 feet. The smoke rose to about 1200 feet."

A fourth dump was damaged at Durlach, and a bridge and several warehouses were damaged near the dump.

The towns of Freistatt, 10 miles northeast of Strassburg, Wittenweise and Rastatt all were bombed and strafed by the Thunderbolts, and pilots said one third of the buildings in Freistatt were destroyed. The railway yards at Rastatt also were hit, and ten cars were disabled and the approach to a rail bridge damaged. Two flak guns near the bridge were attacked.

Another railway yard was attacked at Offenburg, where more than 75 railway cars were destroyed or damaged.

French Thunderbolts continued their pressure on communications in the Colmar pocket, cutting the main railway line between Colmar and Mulhausen in five places. Spitfires of the French First Air Corps made sweeps along the Rhine Valley from Wissembourg to Freiburg, and like the P-47 's, encountered no enemy opposition in the air.

Total claims for today showed:

Two locomotives disabled, three damaged.

18 railway cars disabled, 166 damaged.

31 motor transports disabled, 27 damaged.

10 tanks destroyed, 19 damaged.

Three guns destroyed, seven damaged.

Three dumps destroyed, one damaged.

A bridge destroyed.

10 rail cuts.

Two road blocks.

HEADQUARTERS, FIRST TACTICAL AIR FORCE, France--

Striking at German communications and supplies ~~xxxxxxxx~~ in the Kaiserlautern-Neustadt area behind the Bitch battle front, P-47 Thunderbolt fighter bombers of the First Tactical Air ~~xxxxxxxx~~ Force today cut rail lines at 16 points, ~~selaed~~ one of them with a loaded freight train inside it two tunnels, blew up an ammunition dump, and attacked two marshalling yards, as well as scoring hits on miscellaneous German transport. ~~xxxx~~

It was the thirty-first consecutive day of operations for the Franco-American air force, and the first in nearly two weeks that ~~x~~ weather permitted large scale activity. *None of our planes were lost.*

The two tunnels, 400 yards apart ~~xx~~ on the rail line between Kaiserlautern and Neustadt, near the small town of Weidenthal, were hit by three flights of Thunderbolts lead ~~up~~ by Captain Thomas M. Hergert, 2787 S. Howell Street, Milwaukee.

"I detailed two flights to take the South tunnel," Captain Hergert said. "Bombs closed both ends just after the train ~~xxxxxxxx~~ of flat cars entered. The other flight closed the North end of the North tunnel."

The same Thunderbolts ~~in~~ a few minutes later caught a train of ten ~~xxxxxxxx~~ tank-laden flat cars heading West from Neustadt. They bombed and strafed it, blowing up the locomotive and ~~and~~ damaged eight tanks.

The ammunition dump was at Weibrucken, where the Thunderbolts also bombed buildings believed to be barracks. There were two large explosions, described by pilots at the biggest they had ever seen.

"The explosions were the most unusual I have ever seen," said First Lieutenant Louis W. Pearson, North Powder, Oregon. ~~There were enormous~~ "There were enormous red flashes and brownish smoke. A light cloud layer at 5,500 feet was torn apart by the force of the blast."

Fires were started and explosions observed in a second dump attacked at ~~Reims, France~~ Durlach.

Marshalling yards at Neustadt and Reeden, West of Homburg were attacked with unobserved results.

~~Intermittent~~

Other P-47's strafed 100 boxcars 6 miles East of Otterberg and bombed 20 more cars on a siding near Langziel. ~~Intermittent~~

The only enemy aircraft seen during the day were 4 jet aircraft believed to be Me 262's. One of them was apparently on patrol near Saverne and the other three were seen making an unsuccessful attack on American bombers ~~in the area~~, but at such a distance that the Thunderbolts could not give any assistance.

HEADQUARTERS, FIRST TACTICAL AIR FORCE, France -- Bombing through a small hole in 10/10 clouds, French flown Thunderbolts of the First Tactical Air Force today attacked three objectives in Hausach, 17 miles South east of Strassburg and on the rail line from ~~Kaiser~~ the Lake Constance area to Offenburg and Strassburg.

Hits were scored on the railway station, a nearby factory, and a third building. <sup>Poor visibility prevented observation of results on the station & factory, but</sup> Pilots said they saw "a big red explosion" when the third building was hit.

All planes returned safely.

A First Tactical Air Force Thunderbolt pilot, who had switched temporarily to our liaison plane to spot ~~(air-bombing targets for the fighter-bombers)~~ was credited today with leading two ME 109's to their destruction through inadvertence.

First Lt. George V. McClintic, 911 North Fifth Street, Sayre, Oklahoma, who *while flying his Cub* ~~and~~ <sup>with</sup> the veteran 24th Fighter Group, over the Blithe battle area, found a large column of infantry, tanks and horse-drawn artillery, stopped by a road block. He called for "Blithe" fighter had seen.

As the Thunderbolt were coming in and McClintic was withdrawing, two ME 109's attacked the ~~Thunderbolt~~ <sup>the unnamed Cub</sup>. McClintic dived into a cloud veiled valley.

Near the end of the valley the clouds cleared, and the American pilot realized he was bottled in ~~by the~~ <sup>by the</sup> Messerschmitts on a hill on the other ~~had been~~ <sup>was</sup> ~~approaching~~ <sup>spinning toward</sup> his head on.

1st Lt. McClintic turned right, up the side of the ~~valley~~ <sup>valley</sup>, and barely climbing the mountain side, "climbed" it; then slid down the other side into a second valley. The Messerschmitts had not followed, and he was able to get to the ground unit with whom he was on temporary duty.

Back at the base he learned he was credited with a kill. In two kills: Both ME 109's, led inadvertently by McClintic into the first valley and Allied territory, had been brought down by American anti-aircraft fire.

~~McClintic also learned that the Messerschmitts had been shot down by anti-aircraft fire.~~  
~~had been~~

As proof of his low-level trip over the mountain, he showed ten feet of wire, apparently ripped off someone's fence, tangled round the tail of his Cub.

The column he had spotted, McClintic also learned, was thoroughly shot up by the fighter-bombers.

Sent me the following list of books which he has been sent by the  
captain of the ship, and at present I am unable to find out what they are.  
The first book is "The Army of Christ". The second is "The XII Apostles". The third is "The  
Thousandth is missing."

"We skin-bombed the tunnels," reported 1st Lt Henry E. Scott, Jr., Lincoln, Mo. "Flying right toward the north, tossing the bombs in, then falling over the hill. I saw two clear hits that cut the tracks as well as blowing the dirt with earth."

The 42 rail cuts in the Weissenhofen-Landshut-Pirmasens-Neustadt network, vital for supplying the German forces opposing the Seventh Army, constitute a record for one day's operations of the First TAC AF.

In operations over the north, the Thunderbolt Squadron attacked enemy airfields just north of Frankfurt, and destroyed two JU-88's, and a P-51, and several other JU-88's.

The action in which eight ME-109's were destroyed and three were damaged occurred 15 miles north of Darmstadt, when P-47's of the group commanded by Col James B. Tipton, Flynderville, Ark., met two flights of enemy planes, one of eight, the other of four ME-109's.

Pilots who destroyed enemy aircraft are:

2nd Lt Daniel S. Banner, 1046 Graham, Boulevard, Akron, Ohio - 2.

2nd Lt Arnold G. Alker, 654 West Philadelphia St., Flint, Mich.

2nd Lt Robert E. Smith, 2741 Fairfield Avenue, Springfield, Ill.

2nd Lt Frederick T. L. 1709 Oak Avenue, Alhambra, Ill.

2nd Lt James E. 567 Union Street, San Francisco, Calif.

2nd Lt David M. 100 Hunwell Street, Northern Heights, Va.

E/O Gerald P. Everett, Eagle Lake, Texas.

French-flown fighters operated out of bases in the Strasbourg-Kayserslautern, Baden-Baden-Freiburg area and attacked enemy positions near Banfeld, at the Northern tip of the Colmar pocket. Results were not observed.

Another Thunderbolt Squadron from the group, commanded by Col Bingham T. Kleins, Gonzales, Texas, met a formation of more than 50 Messerschmitts and Focke-Wulfs with what appeared to be six Jet-Propelled ME-262's flying to cover for them, 15 miles west of Worms. A dozen of the enemy peeled off to make one pass at the American fighters. An ME-109 and a P-47 crashed head-on; the Thunderbolt was lost and the Messerschmitt was believed destroyed. After this single swipe at the Thunderbolts, the enemy fled.

Counted in the day's toll of destruction were two locomotives destroyed, nine damaged; 14 railway cars destroyed, four damaged; six motor transports destroyed, 20 damaged.

Striking swiftly at enemy communications, despite less than one-half day of flying weather, Thunderbolt fighter-bombers of First Tactical Air Force today carried out damaging assaults north of the Bitche battle area without loss in advance of the U.S. Seventh Army. It was their thirty-third consecutive day of operations on the Sixth Army Group front.

American-flown P-47's of XII Tactical Air Command added eight rail cuts to Sunday's record day of 42 on rail lines linking Kaiserlautern, Pirmasens, Landau and Neustadt. Four armored vehicles, three of them on a stationary train three miles due East of Neunkirchen, were destroyed together with a locomotive and a score of rail cars.

Damaging blows were struck on two rail yards in and near Homburg while hits were scored on a supply dump at Zweibrücken and an ammunition dump between Wittenburg and Pirmasens. One German tank was destroyed near Annweiler and two others, facing south on a road at Albersweiler, northwest of Landau, were damaged.

French-flown Thunderbolts, meanwhile, flew a limited number of sorties against ground installations in advance of the First French Army. Results were unobserved.

More than 140 sorties were flown during the day by aircraft of First TAC AF. No enemy aircraft were observed.

Total claims for the day are:

Tanks -- 1 destroyed; 2 damaged

Armored Vehicles -- 4 destroyed

and seriously damaged the railway bridge and railway junction at Rastatt, a key point supplying German troops facing the Sixth Army Group at many points, while fighter-bombers struck at the German beach-head north of Strassburg, and at communications targets.

From more than 500 sorties flown by First TAC AF's fighters, fighter-bombers and medium bombers, none of our aircraft is missing.

The Mustangs, grounded by weather since Jan. 2, struck in two waves at the 275-foot, four-track structure at Rastatt, and the crews reported that damaged was done to both approaches, particularly the south approach, which was knocked into the water.

Other hits were scored on one of the main spans of the bridge. The marshalling yards, a third of a mile north of the bridge, were hit by bomb strikes at the choke point, where the tracks begin to spread out, and some explosions were seen in the yards themselves.

Two of the lines crossing the bridge run north to Karlsruhe; one crosses the Rhine and leads into the German bridgehead north of Strassburg; a fourth goes south to Freiburg and

thence to the Colmar pocket. ~~Transfathmation~~ It is a three span bridge, two two tracks running on a concrete structure and the other two on a steel bridge alongside.

~~The bombers were attacked near Speyer, after they had hit their objective, by about 20 ME-109's. The escorting French Spitfires and American P-47's gave battle, and repelled them, destroying one Messerschmitt, probably destroying another and damaging a third.~~

A Marauder gunner, S/Sgt. Anthony Tamosiunas, 82 Lake Street, Arlington, Mass., reported: "I saw a really beautiful sight below me. Bombs hit right along the south approach, and a whole section at that end was in the water."

#### ~~Thunderbolt~~

Thunderbolt fighter-bombers of the 12th Tactical Air Command bomb d and machine-gunned the village of Offendorf, at the northern tip of the beach-head north of Strasburg, hitting the town itself and damaging a number of buildings, then struck at a wood c outside of the town where there were believed to be enemy troops. The town and wood were so thoroughly blanketed with smoke that results could not be observed.

"When we came back to strafe we had to fly through smoke all the way," said 1st Lt. Claude R. Burton, who led an attack over the village.

Further north, at Trimbach seven miles northeasr of Bischweiler, other P-47's engaged in active battle participation with the ground forces, bombing the defended village, where there were believed to be troops, and striking at a formation of tanks and armored vehicles near ~~there~~ it. Smoke prevented any observation here, also.

A supply dump east of Pirmasens was damaged, and a tunnel was sealed on the ~~Neustadt~~ Neustadt-Kaiserlautern line. Six different rail yards were attacked.

French-flown Thunderbolts carried out rail-cutting operations in the areas of Offenburg, Altenheim and Haslach, all part of a network supplying the Colmar pocket.

A FIRST TACTICAL AIR FORCE THUNDERBOLT BASE, FRANCE -- They're building a new latrine at the 324th Fighter Group base today and they're cleaning up a snow-covered ~~mm~~ cabbage patch -- hoping there won't be a recurrence of Tuesday's death-defying performance in which 1st Lt John V. Jones, 1800 13th Avenue, Bessemer, Ala., played a leading part.

It all began when Lt Jones flew an armed reconnaissance mission Tuesday in the Landau area. His flight moved in to strafe a German town northwest of Landau which immediately ~~mm~~ filled the sky with Aek-Aek. Flying tail ~~man~~ in the flight, Lt Jones sprayed the target at 200 feet, but as he moved away enemy flak pierced the tail of his F-47, ~~spun~~ spelling the air flow around his rudder and elevator.

He started to spin in but quickly gave his plane a full rudder which miraculously managed to keep him going straight. He couldn't get less than 200 miles per hour, nor could he gain altitude rapidly. This forced him to fly between 3000 and 4000 feet all the way home. And as he passed over enemy towns he at once became an ~~h~~ attractive target for German AA batteries -- which blazed away at every opportunity.

Arriving at his base, the 24-year-old pilot called for landing instructions. Three minutes later he hit the runway at 230 miles per hour. Midway down the strip, his Thunderbolt hit a hump and was immediately airborne again.

Landing a second time, Lt Jones cut his switches and reached the end of the runway doing 100 m.p.h. He attempted to ground loop his

ship but without success. The P-47 sped off the runway, bounded over a road ~~station~~, plowed up a cabbage patch and crashed to a screaming halt in the middle of a "Chic Sales Two-Seater."

It was observed by 1st Lt Al F. Berlin, 113 Orleans Street, Battle Creek, Mich., who flew cover for Lt Jones, that Jones's Thunderbolt passed directly over a woman on the road -- who scrambled very unladylike into a ditch alongside.

Lt Jones received not a scratch.

P-47 Thunderbolts of the First Tactical Air Force flew through a heavy haze this morning to bomb three small ~~front-line~~ front-line villages ~~east of Colmar~~ east of Colmar, in operations closely coordinated with the Allied advance southward into the Colmar pocket.

The towns of Durrenenzen, Urschenheim and Widensohlen, all about six miles east of Colmar were attacked, and pilots reported destroying 24 *fortified* buildings and damaging four.

Other P-47's ranged deep into Germany, striking at railway targets in the Heidelberg-Karlsruhe-Stuttgart triangle. They bombed the railway yards at Bruchsal, 12 miles northeast of Karlsruhe, and ~~disabled~~ disabled one locomotive and damaged five; disabled seven railway cars and damaged 37. Rails were cut in three places and a tunnel ~~damaged~~ 12 miles south of Pforzheim was damaged.

No enemy fighter opposition was encountered and there were no losses in these ~~early~~ *morning* operations, all of which were carried out by pilots of the 12th Tactical Air Command.

HEADQUARTERS, FIRST TACTICAL AIR FORCE, France—Aided by favorable weather for the first time in two weeks, medium and fighter bombers of the First Tactical Air Force flew 444 sorties today to attack German front line positions, troop concentrations, road transport, and marshalling yards in cooperation with the American Seventh and French First Armies.

Only three German planes were sighted, all refusing combat. One fighter-bomber is missing.

Eight fighter-bomber attacks were made on the front line town of Elsenheim, nine miles northeast of Colmar and against troop and vehicle concentrations in a wooded area just outside the town. Smoke was so thick in the area that results could not be estimated after the first wave of planes attacked.

Fighter-bombers of the XII Tactical Air Command struck at several convoys of tanks and motor vehicles. Eleven tanks, several of them believed to be Tigers, were destroyed, and eight were damaged. Five of the eleven destroyed were bagged by a flight which attacked a concentration near Gamsheim, and four more, when pilots from another group wiped out a convoy of four tanks, four motor transport and three halftracks just south of Pirmasens.

Twenty-seven more motor transport were destroyed and 36 damaged in attacks which ranged over the entire length of the French-American front.

B-26 Marauder medium-bombers, escorted by XII TAC Thunderbolts, bombed rail yards at Bundenthal, just north of the Franco-German border, 15 miles southwest of Landau. In contrast to the generally clear weather over the front, the yards were obscured by 10/10 cloud and the Marauders bombed by instrument. The yards, on a rail line connecting with the main Landau-Zweibrücken line, serve as a forward railhead for the German troops facing the 7th army in the Bitche and Hagenu areas. They were led by 26-year-old

Marshalling yards at Pirnasens, Kaiserlautern, Gross Sachsenheim, 14 miles northwest of Stuttgart; Achern, 13 miles southeast of Bischweiler, were attacked by fighter-bombers. One locomotive and 11 railcars were destroyed and 70 damaged in these attacks.

One pontoon bridge was severed and a second damaged on the Rhine north of Karlsruhe.

A radar installation on the edge of an airfield 10 miles northwest of Stuttgart was strafed and damaged.

French-flown Thunderbolts scored four hits on a road bridge in the southwest corner of the Colmar pocket, and 8 more on an ammunition dump 9 miles west of Freiburg.

A lone piper cub, on an artillery adjustment mission near Gambsheim on the Rhine, seven miles northeast of Strassburg, today signaled the destruction of five enemy tanks and damage to three others, by a squadron of P-47 Thunderbolts of the First Tactical Air Force.

The cub, flying at low altitude, spotted 30 black German tanks dispersed and clearly discernable in a snow-covered field. The Pilot flashed his discovery to the Thunderbolts, flying their last mission of the day in the same area.

Minutes later, the fighter-bombers swooped down, spraying the field and leaving at least eight of the tanks burning and smoking.

"The Germans had made no effort at camouflage," said 2nd Lt Frederick C. Bishop, 1729 Lake Avenue, Wilmette, Ill., "and the black tanks stood out clearly against the white snow. We did not get flak but received machine gun fire from the tanks. The tanks burned fiercely with black oily smoke."

A troop of mounted cavalry--first to be sighted by First Tactical Air Force pilots in France--was strafed and badly cut up by diving P-47 Thunderbolts of the 324th fighter group today.

The P-47's had just bombed a small town between Munster and Colmar, in the French First Army sector, and they came on the horsemen as they pulled out of their dive.

"About 50 of them, two abreast, were coming towards Colmar at a trot," reported Captain Magnus P. Johnson, 235 Edgewater Park, Bronx, N. Y., who led the attack. "We went over them, firing all the way, at deck level, and they scattered in confusion, with riders slipping from their saddles and horses running loose."

When the planes returned for a second pass, most of the cavalrymen had got off the road, but there were ten dead horses in the highway.

HQ FIRST TACTICAL AIR FORCE, FRANCE: Taking advantage of a brief break in weather today, P-47 Thunderbolt fighter-bombers of First Tactical Air Force attacked road and rail transport behind the German lines in the Bitche and Colmar areas.

Fifteen motor vehicles were damaged when the Thunderbolts of the XII TAC Air Command roads 5 miles west of Karlsruhe.

"First we bombed a southbound convoy of 40 vehicles on the road between Kandel and Lauterburg," said First Lt Ryland T. Dewey, 3341 Coronado Avenue, Denver, Colo., "and then we strafed them."

The four small towns near Hagenau, Druisenheim, Zinsweiler, Uhrweiler, and Engweiler, were bombed without observation, and 14 boxcars were damaged in a railroad yard just east of Bitche. Two roadblocks were effected on the Rhine in Druisenheim.

The towns of Helzweiler and Wickersweiler, just northeast of Colmar, were bombed and pilots saw large fires and explosions in both.

The fighter sweeps were flown by the French component of the First TAC AF. They strafed one town and transport in Sennheim area without observation.

Two aircraft were lost.

P-47 Thunderbolts of the First Tactical Air Force bombed the railway yards at Gernersheim in early operations today, damaging 13 locomotives, destroying nine railway cars and damaging 25, and cutting the choke points at both ends of the yards.

Gernersheim is an important ~~junction~~ junction for lines leading to the Pirmasens-Landau area, in advance of the U. S. Seventh Army front, and ~~to the south~~ south to Wissemburg, nearer the immediate battle-zones.

Other Thunderbolts of the 12th Tactical Air Command ~~with~~ attacked a fuel dump near Zell, 12 miles southeast of Strassburg. During this attack a ~~ME-262~~ jet-propelled ME-262 made an ineffectual pass at the fighter-bombers, then fled.

Two other ME-262's were seen during the morning, but contact was not made.

Up to mid-day nine missions and 101 sorties had been flown without any loss.

~~American-flown~~

P-47 Thunderbolts of the First Tactical Air Force, flying in close coordination with the ground forces of the U. S. Seventh Army, today ~~attacked~~ attacked four German villages ~~near the~~ near the ~~Upper Rhine~~ Strassburg battle area.

Gambshain, scene of the recent German ~~crossings~~ Rhine crossings; Weissenburg; Wurzenbach (13 miles southwest of Karlsruhe on the west bank of the Rhine) and Rheinischofsheim, 10 miles North east of Strassburg ~~on the east side~~ of the Rhine, were struck by the heaviest Thunderbolt attacks in recent days.

Meanwhile French-flown B-26 ~~Marauders~~ <sup>Thunderbolt</sup> ~~Marauders~~ attacked an important road and rail bridge, and a pontoon bridge ~~alongside~~, at Neuenburg on the Rhine, supply links <sup>leading</sup> ~~leading~~ to the southern end of the Colmar pocket <sup>WHERE</sup> ~~and serving~~ the Germans <sup>ARE</sup> ~~opposing~~ the French First Army's present attacks. Results were unobserved in this operation.

Bad weather made observation of most of the <sup>Thunderbolt</sup> attacks on the villages impossible, but at Wurzenbach, where the <sup>P-47s</sup> ~~Thunderbolts~~ swooped down to strafe tanks and motor transport, blowing up a fuel truck as well as destroying and damaging other vehicles, big fires were started.

"Then the gas truck blew up," reported F/O Jerrald P. Evoritt, Eagle Lake, Tex., "It splattered burning gas all over the place, and when I made a second pass almost the entire town was on fire."

On other operations closely coordinated with ground efforts, P-47's flew three missions against a wood where 50 tanks were reported to be parked, in the Gamsheim area. Trees and the weather made observation impossible, but fires and some explosions were seen.

Farther behind the enemy lines, mostly in the Pirmasens area, the fighter-bombers operated against road and rail transport, and in two cases, ~~reaching~~ catching two truckloads of Germans among their ~~base~~ and killing approximately 50 of them.

Six miles east of Pirmasens, on the road to Landau, they attacked three trucks going east, carrying a total of some 50 men. Two trucks were destroyed, the third was damaged, and when they returned for a second pass, they estimated 30 dead.

"When we strafed, the troops jumped out and ran for the woods," said 2nd Lt. John J. Petrosky, 411 Stoney Creek, Boswell, Penna. "We shifted to the woods, spraying bullets among them. On our second pass we could see them lying all over the place."

Another truckload of some 20 Germans was shot up near Elstein, 12 miles southeast of Kaiserlautern, and all of them were believed killed.

Flying south, in support of the French Army, the 12th Tactical Air Command Thunderbolts destroyed a bridge four miles ~~west~~ northwest of ~~Freiburg~~ Freiburg, on a road leading into the Colmar pocket.

Altogether, the P-47's bagged the following:

Forty-two railway cars ~~destroyed~~ <sup>damaged</sup> in railway yards at Neustadt, ~~Elstein~~ <sup>TRIA</sup> Homburg and Bergzabern, two locomotives damaged.

Twenty-five motor transports destroyed, 32 damaged.

Fuel dumps damaged at Bergzabern and just west of Kaiserlautern.

In the attacks on the four villages, 30 buildings were counted destroyed and another 15 damaged.

French Spitfires made sweeps in the ~~Mulhausen~~ Mulhausen and road-busting Mullheim areas without loss, and French P-47's made attacks against roads in the Colmar pocket.

~~Amended to read: ...~~

Altogether 391 sorties were flown by American and French aircraft of First TAC AF, from which one French Marauder and one American P-47 did not return. No enemy aircraft were seen met during the day.

Other P-47's dropped 24 1000-pound bombs on a village northeast of Strassburg, and ~~also~~ destroyed eight buildings, damaging five.

Headed towards Bitch, some 15 miles northwest of that city, the fighter <sup>east</sup> bombers spotted the convoy, dispersed over about a mile or so, bombed it, and scored hits ~~on~~ on two groups of vehicles with their 1000-pounders.

"When we bombed, the trucks pulled off the road," said 2nd Lt. ~~Bombardier~~ Paul M. Hughes, 21 Hempstead Street, Providence, R. I. "We came back 40 minutes later to strafe them, and some were back on the highway. I could see the engines rip open as we sprayed them."

An effective blow was struck at railway yards at <sup>Colmar</sup> Colmar.

With a first tactical air strike on 16 Dec. USAF planes were bringing his B-24 bomber down with flak-holes on many of his combat missions over Italy, France and Germany. He gave his first statement during the course of his flight. Practice, or just a respect for German gunners. It took a visit to the front line in France to convince him of the terrible might of German artillery.

Under an exchange plan, the first of the events of the war and combat officers of the first line. It was a first-hand account of the war, the first-hand pilot, got a first-hand view of the war, the first-hand pilot.

German prisoners say they are scared of our artillery. It's not our fire superiority so much that worries them but our ability to place fire anywhere and cover an area with it.

"The prisoner said he couldn't get any rest for three days because our guns had kept him pinned to his dugout. None of their companies would have only 20 to 30 men, I found. I saw one boy, who had a total of six months army experience, and appeared to be under 18 and another prisoner was around 17. They must be really scraping the bottom in this Volkstruppen army they have in some sectors."

Missions over Anzio, Florence, Cassino, the Brenner Pass, southern France and western Germany gave Lieutenant Forcynaluk plenty of battle experience but he got his first glimpse of the Jerries at close range on General Patch's front. "Some of them were only 300 yards away," he said, "and one night a patrol sneaked up within 150 yards. Usually they could see us all the time, too. We had to duck from one building to another and we had to move cautiously."

"In the thick snow-covered forests the Jerries wore white parkas that came down to about their knees, making them almost invisible against their background. We had them too, so it was just a question of who could sneak up on the other first."

# FRENCH UNITS OF THE FIRST TACTICAL AIR FORCE

The French elements of the First Tactical Air Force -- first French units to fly against the enemy from France <sup>since 1941</sup> ~~again~~ -- ~~are~~ have made 3573 sorties in 506 missions, since coming under First TAC AF's direction on Oct. 31, 1944.

Nearly all of these tactical units, however, had long combat histories before they came to France, dating back to the campaigns of Corsica, Italy, North Africa, ~~and~~ the Battle of France in 1939-1940, and even, in some cases, to the First World War.

Since October, however, they have been combined into a single air force, the First TAU AF, and most of them have been under the control of Brigadier General Paul Gerardot's French First Air Corps. In this corps are American-built P-47 Thunderbolt fighter-bombers and British Spitfires, both flown and serviced by French air and ground crews.

Also under First TAC AF are B-26 Marauder medium bombers, ~~and these operations~~ flown and maintained by French crews.

The nucleus of the personnel for all these units came into being in North Africa. There many of the regulars of the French Air Force had gone with entire squadrons, on the signing of the 1940 armistice. They ~~were~~ remained through the German occupation of Algiers, and on the arrival of the Anglo-American <sup>forces</sup> ~~squadrons~~ in November 1942, offered their services to the Allied cause.

In the meantime this nucleus was constantly being increased by new arrivals from occupied France, who joined the air force and went into training. This training, under the supervision of a joint Allied Commission headed by Brig. Gen. Gordon P. Saville, now chief of the 12th Tactical Air Command, ~~under First TAC AF, has~~ continued. Recently much of the program has been transferred to the United States, and some of the ~~newest~~ newest replacements for First TAC AF's French squadrons have been entirely American-trained, coming to France directly from the States.

In contrast to these fledglings ~~was~~ there are many veteran airmen, some with as many as 18 victories to their credit, who flew for France in 1939 and 1940, and fled to Africa.

The reconstituted fighter and fighter-bomber units first went back into action in North Africa with the Coastal Air Force, protecting Allied supply routes in the Mediterranean, then moved on to Corsica for the Italian and southern France campaigns. The ~~bombers~~ <sup>units</sup> organized in North Africa, had their first taste of combat ~~in~~ from Sardinian bases.

~~Long before this, however, with names and traditions of~~  
~~it is not the least interesting part of the story.~~

Dating long before the memories even of the 1939-1940 flyers, however, are the names ~~and traditions~~ and traditions of some of these units. Probably the most famous is the ~~Maritime~~ Lafayette, Franco-American fighter unit of the war of 1914-1918, ~~Now~~ a Thunderbolt fighter-bomber outfit, ~~(its plane took off from the same base the crew had used 30 years ago)~~

~~Enemy air force supply used by the French First Army~~  
~~First Tactical Air Force provided throughout the area of the~~

Nearly every item used by these French flyers is supplied by the United States. All food and clothing is American. Aircraft supplies, except in the case of the Spitfire units, are all American and the airplanes themselves are made in America.

The function of the French flyers primarily is to operate in cooperation with the ground forces of the French First Army, and they have made most of their attacks in this area, bombing and strafing transport targets and German defensive positions in the Colmar pocket and in the area opposite it, on the east bank of the Rhine. On a number of occasions, however, they have lent their strength to ground operations in the Seventh Army sector, and frequently the American-manned Marauders of ~~the First Tactical Air Force~~ the First Tactical Air Force have been escorted on their missions by French Spitfires.

Enemy air opposition has been meager, but when there has been any, the French pilots have come out on top. So far they have had only two encounters. On Dec. 26 eight Spitfires attacked a formation of 20 ME-109's near Pforzheim. Five Messerschmitts were destroyed, and two more probably destroyed, by the ~~Spitfires~~ Spitfires none of which was lost. Two days earlier they ~~met another~~ had met another formation of <sup>20</sup>ME-109's and FW-190's over Canidorf, about 20 strong, and shot down two Messerschmitts and two Focke-Wulf's, again for no loss.

Losses to all causes, since coming under First TAC AF on Oct. 31, total 23 planes -- 16 fighters and fighter-bombers and seven bombers.

final ops jan 30 1945.

American and French-flown P-47 Thunderbolts of the First Tactical Air Force, hampered by cloudy, snowy weather which closed in completely in the afternoon, today carried out limited operations, dividing their attacks between close coordination bombing of fortified towns on the rim of the French First Army battle-front, and railway targets, troops and transport deeper into Germany, in the Heidelberg-Karlsruhe-Stuttgart triangle.

American P-47's of the 12th Tactical Air Command bombed the three fortified villages of Durrenzenzen, Urschenheim and Widensohlen, all about six miles east of Colmar, destroying 24 buildings and damaging four, while the French First Air Corps concentrated on targets at the southern end of the pocket, bombing a rail crossing one mile northeast of Wittelsheim and a road bridge two miles northeast of the same town. They also attacked a fuel dump on the west bank of the Rhine, due west of Colmar. No results were observed on any of these objectives, but a pontoon bridge crossing the Rhine 10 miles northeast of Mulhouse, was severely damaged by strafing French P-47's.

Among the damage wrought by 12th Tactical Air Command Thunderbolts in the Karlsruhe area was wrecking of a troop train containing 150 German soldiers. The train, which stopped moving when the strafing attack started, was spotted 23 miles northeast of Karlsruhe. 2nd Lt. Homer B. Cook, Main Street, Chester, S. C., gave this account of the attack:

"When we strafed it soldiers started streaming out -- it looked like a broken inkwell with ink running out onto the sand. They showed good discipline; when they hit the ground they stayed put regardless of where we strafed. We kept it up for some minutes, making four or five passes, and I flew so low I could see the blue-green uniforms and almost distinguish the expressions on their faces.

When we left they were still coming out of the train and others were lying in the snow. It was a bloody mess. *125 14*

~~At the Bruchsal railway yards, 12 miles northeast of Karlsruhe, the~~  
~~div-bombing Thunderbolts disabled one locomotive and damaged five; disabled~~  
~~seven railway cars and damaged 37.~~

It was estimated that 150 German were killed. All the cars and the locomotive were damaged.

At the Bruchsal railway yards, 12 miles northeast of Karlsruhe, the dive-bombing Thunderbolts disabled one locomotive and damaged ~~five~~; disabled seven railway cars and damaged 37.

Another flight of Thunderbolts strafed a convoy of 10 horse-drawn artillery pieces, ~~about~~ 12 miles southwest of Pforzheim; killed 20 horses and damaged all the guns.

Additional damage done by the P-47's, all in the Heidelberg-Karlsruhe Stuttgart area, included: one motor transport destroyed, five damaged; three rail cuts; a tunnel damaged, 12 miles south of Pforzheim; a small road bridge destroyed 11 miles south northeast of Pforzheim, on the Stuttgart Pforzheim road; a rail bridge damaged ~~about~~ 14 miles northwest of Heilbronn.

The French and American fighter-bombers were able to make 58 sorties during the day. No enemy aircraft were sighted and none of the Thunderbolts is missing.

2. The second part of the document is a report on the work of the committee during the year 1945. The report is divided into three main sections: (a) a summary of the work of the committee, (b) a list of the recommendations of the committee, and (c) a list of the actions taken by the committee. The summary of the work of the committee is as follows:

The committee was organized on January 1, 1945, and has since that time been engaged in a study of the problems of the American people. The committee has held numerous public hearings and has received many suggestions from the public. The committee has also conducted extensive research into the various problems of the American people. The results of this research are set forth in the following recommendations:

1. The committee recommends that the government should take steps to improve the economic conditions of the American people.
2. The committee recommends that the government should take steps to improve the educational conditions of the American people.
3. The committee recommends that the government should take steps to improve the social conditions of the American people.
4. The committee recommends that the government should take steps to improve the health conditions of the American people.
5. The committee recommends that the government should take steps to improve the housing conditions of the American people.
6. The committee recommends that the government should take steps to improve the transportation conditions of the American people.
7. The committee recommends that the government should take steps to improve the communication conditions of the American people.
8. The committee recommends that the government should take steps to improve the cultural conditions of the American people.
9. The committee recommends that the government should take steps to improve the recreational conditions of the American people.
10. The committee recommends that the government should take steps to improve the environmental conditions of the American people.

The committee has also taken the following actions:

1. The committee has held public hearings on the various problems of the American people.
2. The committee has received many suggestions from the public.
3. The committee has conducted extensive research into the various problems of the American people.
4. The committee has prepared this report on the work of the committee during the year 1945.

DESIRE YOU SUBMIT YOUR PLAN FOR THE EMPLOYMENT OF 31ST  
AND 34TH BOMBARDMENT GROUPS FOR SEVEN OPERATIONAL DAYS COMMENCING  
26 NOVEMBER. PLAN WILL INCLUDE FOLLOWING POINTS:  
AVERAGE NUMBER OF AIRPLANES PER MISSION, NUMBER OF MISSIONS PER DAY,  
LIST OF TARGETS AND ORDER OF PRIORITY. PLAN TO REACH THIS HEADQUARTERS  
NOT LATER THAN 1200 HOURS 25 NOVEMBER.

ENGINEERS ADVISE THAT RUNWAY AT LYON-BRON WILL BE COMPLETED  
6000 FEET ON 25 NOVEMBER, POWER LINES AND BUILDINGS WILL BE DOWN  
24 NOVEMBER. THIS SHOULD PERMIT THE OPERATION OF ALL TYPES B-26

## FIRST U.S. T.A.F.

- 21st Nov: Bombers. 12 Parauders operated without results - due to weather.  
Fighters. 211 operated in close support of the 7th Army and made fighter sweeps in the battle area.
- 22nd Nov: Fighters gave close support to the 7th Army.
- 23rd Nov: There were no operations.
- 24th Nov: Bad weather prevented operations but 5 P-109's strafed our troops at SAURNE.
- 25th Nov: Most of the operations were in support of the 7th Army. The enemy reacted heavily for the first time in this area and of over 80 sighted 11 were destroyed for the loss of 9 of ours, two due to flak. At night 10 M/T and 4 locos were destroyed.
- 26th Nov: Close support to the Armies was given by 200 sorties for the loss of 3 aircraft. Claims against locos and rolling stock were heavy and 8 single engine e/a out of 20 e/s were destroyed on the ground near WUEHPHUEG. At night 5 aircraft crashed claiming 10 trains destroyed and 5 damaged, 1 M/T, 2 R.R.Cars and 1 further 100 damaged and 1 horse damaged.
- 27th Nov: Day operations consisted of 144 fighter and 1000 sorties. A pontoon and a railway bridge were destroyed. Close support to the Army was given.

SUMMARY. The force operated on 5 of the 7 days.

3. Northern Group of Armies:
  - a. Will continue its thrust to the River Elbe, seize crossings over the Elbe, secure Hamburg, and advance on the general area Kiel-Lubeck, being responsible for its own flank protection east of the Elbe.
  - b. Will continue operations to clear western Holland, north east Holland, and the coastal belt and enemy naval bases and fortifications which threaten the approaches to Hamburg.
  - c. Will be prepared to conduct operations to liberate Denmark.
  - d. Decision on the opening of either the port of Bremen or the port of Hamburg or both of these ports according to resources available will be based on their condition after capture. Subject to its condition being suitable, first priority will, however, be given to the opening of the port of Hamburg. (See par. 7 below)
4. Central Group of Armies:
  - a. On completion of current operations, will be responsible within its zone for the defense of the general line -(Colon) Erx Gebirge - River Muldx - River Elbe. Present bridgeheads over the Elbe will be secured but offensive operations beyond the elbe will be undertaken only on lateral orders.
  - b. Will launch a powerful thrust to join hands with the Russians in the Danube Valley and seize Safu Urg.
5. Southern Group of Armies:
  - a. Will protect the southern(right) flank of Central Group of Armies and occupy Western Austria and that part of Germany within its zone of advance. The 13th Airborne Division will be available to the Southern Group of Armies.

1. The first group of authors (e.g., [1, 2]) considers the problem of the control of the motion of a mechanical system with a single degree of freedom. The control is realized by means of a single control signal. The control is realized by means of a single control signal. The control is realized by means of a single control signal.

CONFIDENTIALSTATUS OF COMMUNICATIONS

The greater amount of rail activity observed in the area was on the line AUGSBURG to KAUFBEUREN, Y-1524, with the heaviest concentration of rolling stock and locos in the M/Y and vicinity of BUCHLOE, Y-2243. There were 15 plus locos with steam up and 6 trains moving north, south and east indicating this as a possible switching point, also 420 gondolas and box cars were reported in addition to 500 observed the 24th of April. Movement on the line from BUCHLOE to MUNICH consisted of 5 small trains made up of 10 plus cars immediately east of BUCHLOE, a large concentration of 450 box cars, 25 flat cars and 25 flak cars at Y-570557, and numerous trains moving east to MUNICH from the vicinity immediately west of the town. Additional rail traffic proceeding into the MUNICH area was the line from INGOLSTADT and AUGSBURG. South of MUNICH, a large concentration of 800 plus box cars were seen between Y-880914 to Y-945300. All small sidings and M/Ys from Y-5521 to Y-5904 were reported full of mixed cars in rakes of 25 to 100. This area has shown an unusual increase in the number of cars in the past few days. In the remaining area the traffic was light and scattered.

M/T traffic south and southeast from IDNHAUDERTH was heavy and scattered while between MEININGEN and BUCHLOE convoys averaging 12 plus M/Ts were reported heading in both directions. Activity elsewhere was light and scattered with no direction trend.

1/1 Coastal Commission.

5/5 Artillery adjustment.  
Claims & Losses: Nil.

Rail movement in the area was light and scattered with some activity observed on the R.DOLFLEBEN-FRIEDRICHSHAFEN and MÜNCHEN-UGSBURG-ULM lines but showed no definite direction trend; I/Y's in the area were also inactive with the DICKSTADT and DONAUWORTH yards being reported unserviceable due to all lines being out.

The vehicular movement was generally light and scattered with the enemy still attempting to escape the closing pocket in the STURMART area where 400 to 600 M/T's and other type vehicles were observed between RENTLINGEN and HACHEN proceeding SE at X-0020, 300 M/T's were reported facing east.

Note: Both vehicle concentrations were attacked by fighter-bombers.

Very little activity on southwestern front, only one f/bomber formation of 4th Gruppe JG 53 (an estimated 15 aircraft) identified airborne at 1400 hours. Note: This formation intended ground attack operations in area SE of MUTHEN. HE 262 f/bombers of KG 51 active on small scale during morning with concentrations apparently in above area. Note: At least one aircraft of this unit identified landing back at EISENFELD. Jet fighter interceptor aircraft of KG 54 airborne at 1745 hours but no evidence of combat. Unidentified single aircraft plotted from 0145 to 0515 hours. Limited evidence indicates aircraft probably attempted wireless silence. No evidence is available that ground attack was intended as planes appeared to be flying south into B.V.M.A. and at least one aircraft landed MUTHEN/NEUBERG. These are possibly transfer flights.

STATUS OF COMMUNICATIONS

Communications: All main lines behind battle area appear serviceable.  
 Movement: Intense rail activity on following lines: BAMBERG, SCHWEIN -  
 FURT, NEUSTADT; NURNBERG, ANSBACH, HALL; NURNBERG, NEUSTADT 0712;  
 AUGSBURG, DONAUWORTH, ANSBACH. Moderate activity DONAUWORTH, STUTT -  
 GART line. Movement going both ways. Noticeably light rail move -  
 ment NURNBERG, BAMBERG, COBURG. No movement seen between HALLE, '  
 HEILBRONN. Activity definitely centered along NURNBERG.-HALL axis,  
 which carried total of 43 trains and numerous separate locomotives  
 on main line and nearby feeders. Almost no M/T movement seen except  
 small concentrations in woods NE and SE of HEILBRONN.

GERMAN AIR FORCE ACTIVITY

Elements of all three Gruppen JG 53 airborne in 1 battle formation  
 over WURZBURG area at 1245 hrs. Increased sightings of ME 109s on  
 airfields in LEIPHEIM, LAUPHEIM, LECHFELD area together with visual  
 observations of no aircraft on NELLINGEN airfield during above period  
 suggests JG53 elements may be leaving STUTTGART area. This transfer  
 logical in view of proximity of allies and constant allied patrol  
 over STUTTGART area making operations by enemy formations difficult.  
 Believe following airfields most likely destination these elements:  
 EUHAUSEN, OBECK, already identified and confirmed as being an opera -  
 tional base for at least elements of one Gruppen JG53, DORNSTADT,  
 LEIPHEIM, NEU ULK, LAUPHEIM. Note - single engined training airfields  
 also likely prospects which include RISSITZEN, SCHUSSENRIED, OETT -  
 UGBER and DEININGEN; suggest these 4 airfields be closely watched  
 with special emphasis on first two. Jet activity during above period  
 on reduced scale. One main contributing factor to reduced scale of  
 efforts by Jets due to present allied airfield attacks. Present  
 withdrawal of GAF from Western front necessitates concentration of  
 enemy aircraft on individual fields which present good targets. To -  
 days claims on airfields in NUREMBERG area alone amounted to 11-12  
 -18.

RESUME OF WEATHER FOR 5 APRIL 1945

GERMAN AIR FORCE ACTIVITY

Single engined day fighter activity South Western front daylight period 3 April. No evidence of Jet or recce activity.

Addendum for 2 April: Estimated 15 to 25 single engined day fighter sorties carried out by unspecified elements JG 53 during morning hours on presumably one battle formation. Jet fighter/bombers active on ground attack role. Jet unit now definitely identified as KG 51. Suggest both First and Second Gruppen operational. Operational notes: Confirming evidence Third Staffel MAG based STUTTGART area and operating in conjunction with JG 53. Believe continued absence JG 2 allows conclusion this unit has left sphere of command Flieger Divisions 16 and now operational against North Central front; suggest ERFURT area.

WEATHER RESUME - 29 March

Over Bases and Targets- Multi-layered clouds, with low overcasts generally below 1000', and rain persisted over Bases and Targets most of the day, with the exception of the southern and eastern target areas which did not close down until around 0900-1000 hours. Rain ceased for the most part after 1500 hours, but ceilings did not lift much, although breaking slightly. GENERALLY NON-OPERATIONAL CONDITIONS ALL AREAS.

GAF ACTIVITY: S/E day fighter sorties south western front daylight period 29 March; however, fighter a/c of presumably JG-53 airborne from 0915 to 0930 hours. Possible transfer flight. Suggest local transfer only and not out of Stuttgart area. Weather recce also carried out by elements of JG-53 from 1025 to 1055 hours in Echterdingen area. Operational notes: JU-87s identified operating from OBER-SCHNECKENBACH against Frankfurt area. Suggest elements of KSG 1 and/or 2. This Base believed only temporary owing proximity of Allies. As anticipated JU-88s and ME-110s Night Fighters identified carrying out bombing and strafing attacks on Allied concentrations along the Rhine. So far, elements IJG 1, 2 and 4 active in this role. No evidence elements IJG 6 (based Stuttgart-Schwabmühl area) have operated.

STATUS OF COMMUNICATIONS

Enemy Ground- Resistance strong only along main river south of ASCHAFFENBERG from pillboxes and prepared positions. Elsewhere generally light to moderate.

Communications and Movement: Nothing to report.

42 BOMB WING: No operations due to weather.

XII TAC: No operations due to weather.

MTAF: No operations due to weather.

FIRST FRANCE AIR CORPS - (1 mission, 2 sorties).

RHINE railroad bridges at SPORTH (LINDENHUT) and LIEBHART both destroyed, at least one span of each in river. All RHINE bridges at MANNHEIM and SPEYER appear serviceable. Road bridge 1259575 now reported intact. Numerous ferries, pontoon sections, barges and small craft supplement these escape routes between LINDENHUT and LIEBHART. Almost no road or rail movement observed along LINDENHUT-SPORTH-RAILROAD-HEIDENBURG-MANNHEIM. Approximately 300 barges moving both ways and stationery on RHEINE river between LINDENHUT and HEIDENBURG.

Situation ground. Strong defense of six fixed positions WEST to BERTHLENN and in area LUS FORNABE MUST BE STRENGTHENED. Reestablish worker BEARLANN to FUGGELICH and completely disorganized west of latter point. Maximum remaining enemy capability to defend south flank temporarily, delay on north flank, to permit evacuation of remnants. No further indication of reinforcements to RTH. No east or south.

CONFIDENTIALSTATUS OF COMMUNICATIONS

1. Movements: WHITE-MOSELLE POCKET - Bulk of fighter bomber effort 20 March on west side of RHEIN concentration on motor transport in the FLAMMSTEIN - BAD DUNKELM area. Preliminary figures show that approximately 500 MT are obtained and 700 damaged. Needless to say all movement was channelled east with all wehrmacht units getting out the best way they could. Undoubtedly this movement will continue as long as it is possible to get away. With the capture of WHITE and the imminent fall of MOSEL, the area along the RHEIN from LUDWIGSLAVEN to LANDAU is of continuing importance. Many pontoon sections were noticed.

Along this stretch of the river today and there will be used to their fullest capacity. The main permanent bridge is intact and a PW today stated that one of the routes of escape was over the bridge at SPEYER. Barrage balloons were observed on this bridge today, ambulances were again much in evidence and they, of course, were going the only way possible, east. Few if any fighter bomber sorties east of the RHEIN today. The usual active rail movement noted in the KRAUTHAM, STUTTGART, REILACH, REIDELHAGEN, LAUSHEIM areas moving in all directions.

2. Bridge status: Tac/R reports the MOSEL rail and road bridges out. 10 Ferries sighted east bank RHEIN river R-4603. Pontoon bridges R-475705, R-547770.

WEATHER RESUME

Over southern bases high broken clouds, visibility unrestricted after 0600 hours. Over northern bases scattered clouds at 5,500 ft. becoming broken afternoon. Visibility unrestricted.

In target areas broken clouds above 15,000 feet during morning. Broken clouds at 2,500 feet by noon becoming overcast at 1,000 ft. after 1400 hours. Visibility unrestricted.

Results of weather over bases and target areas for 11 March 1945

Generally overcast at 1-2000 feet with visibility 2-3 miles at dawn.  
 By noon, the clouds became broken over the target areas and scattered  
 to broken over base at 2-3000 feet. The visibility improved to 6  
 miles or better after 1900 hours. By dusk, the clouds had decreased  
 to nil over the base areas, but scattered to broken over the target  
 areas.

## RESUME OF WEATHER ON 14 MARCH 1945

ALL BASES AND TARGET AREAS: Widespread ground fog in early morning. Visibilities generally 500 yards or less improving slowly to  $\frac{1}{2}$  to 1 mile by 1000 hours, to 1-2 miles by 1100 hours, and 3-5 miles in the afternoon. Nil low clouds throughout day.

## COMMUNICATIONS SUMMARY

MOSELLE RHINE TRIANGLE: Road and rail observations were generally scant. Between Bad-Kruznach and Bingen one train was seen moving north. Scattered M/T were observed and coal and gravel cars were sighted at several points. The M/T at Neunkirchen was  $\frac{3}{4}$  full.

Medium Bombers attacked the Bad Munster rail bridge reporting good results and strike attack photos show the rail line temporarily unserviceable. Photo reconnaissance also reveals the line unserviceable between Landau and Hinterveidenthal due to damaged tunnel at R-133690. Repairs are in progress at this point.

Tree cutting has been observed in the Hagenau area during the past three weeks and one road block was observed on the main road at R-0526.

The Third Army is reported to have crossed the Moselle South of Koblenz and meeting with light initial resistance. Between Volldingen and Saarbrücken the enemy is reported withdrawing to the line of the Saar River and it is possible that further withdrawals may be contemplated.

RHINE VALLEY SOUTH OF KARLSRUHE: Moderate rail activity was observed east of the Rhine in the Karlsruhe area and the Heilbronn-Pforzheim line was normally active with movement to the South and West prevailing little road or rail activity was sighted in the Black Forest area, but roads in the snow covered country appear well used.

## INTELLIGENCE REQUIREMENTS:

1. Continued observations in Saarbrücken area for concentration of rail cars and M/T and activity which may indicate further withdrawal, or reinforcement.
2. Activity on the Neunkirchen St. Wendel line
3. Rolling stock in sidings at Kirkel Q-63076A, St. Ingbert Q-5576 Enied Q-7074, Biersbach Q-6673, North of Hassel Q-5875, Blickweiler Q-6568, St. Wendel Q-5996,
4. Status of the Bad Munster Rail Bridge M-383351.

HEADQUARTERS  
FIRST TACTICAL AIR FORCE, (PROV)  
Office of the Assistant Chief of Staff, A-2  
ARO 374

OSUM NUMBER 67

Period 072000 to 082000

XII TAC - Night 7/8 March: No operations due to weather.  
Day 8 March: No operations due to weather.

42 DMB WING: No operations due to weather.

FR TAC: No operations due to weather.

WESTERN FRONT AIR FORCE

27/27 a/c carried out 4 bombing missions on Infantry work in the Royan sector.  
A total of 20 tons of bombs were dropped, with good results.  
2/2 a/c carried out an artillery adjustment mission.  
2/2 a/c carried out 2 strafing missions against light AA positions in the Royan sector.  
Claims: Nil. Losses: Nil.

WEATHER - 8 March

Mainly overcast conditions with ceilings 500 to 1,000' and very near the surface in hill regions. This was accompanied by light rain and drizzle most of the day and 2 to 3 miles visibility. Over the target areas there was a brief period of broken cloud at 1,200' during the late forenoon, but bases were mainly closed at that time.

Operational weather resume: Very poor.

Outlook for 9 March

Saverne Area: 5/10 to 3/10 clouds at 1,500' in early morning. At mid-day it will decrease to about 5/10, and increase slightly late in the afternoon. Visibility will be 4 to 6 miles all day.  
Southern Target Areas: Probably a larger amount of cloud down to less than 1,000'. Visibility will be good.  
Base Weather: Substantial breaks 7/10 to 9/10 cloud at 1,200 to 1,500'. Visibility 4 to 6 miles. Southern bases will have 3/10 to 5/10 at 1,000', and 6/10 to 8/10 at 2,500 to 3,000'. About noon, scattered showers 1100 to 1400 hours all over the area. There is a fair possibility for low level operations.

STATUS OF COMMUNICATIONS

There were no observations because of weather. The Moselle-Rhine triangle is the largest salient remaining in German control west of the Rhine, and may possibly receive reinforcement.

INTELLIGENCE REQUIREMENTS

The Rhine crossings at Bingen, Mainz, Worms, Mannheim, Speyer and Germersheim, and the routes stemming from them, should be watched for activity.

2nd TAF

Night 7/8 - 35 sorties.

12 a/c conducted A/R, and dropped 46x500 MC bombs in the IFFELBURG & HALTERN-  
A55 area.

26 a/c on uneventful interception patrols.  
Claims and losses nil.

Period 050000 to 052000

XII TAC:

415th Night Fighter Group - Night 5/6 March (1 Mission 1 sortie).

1/1 Beamlighter weather check and patrol without incident.

Claims: Nil Losses: Nil

D/A: Vectored to Eagle at 1840 hours. No contact due to bad weather.

Day 6 March

NO OPERATIONS FOR 1ST TAC AF UNITS DUE TO WEATHER.

GENERAL WEATHER FORECAST FOR 7 MARCH 1945

GENERAL SITUATION: General north to northwestern air flow over all areas with moist, unstable air.

NARROW BASINS AND TEN ARMY CORPS AREA: Overcast stratocumulus clouds at 800-1000 feet with intermittent rain and drizzle throughout the day. Clouds to cover hill tops. Visibility 2-4 miles but less than one mile in precipitation.

FRENCH BASINS AND UPPER RHINE VALLEY: Overcast stratocumulus clouds at 1-2000 feet with visibility 3-5 miles all day. A few local showers during the day during which cloud base will fall to 600-1000 feet and visibility to one mile or less.

#### STATUS OF COMMUNICATIONS

No observations due to weather. Ground reports and recent photo cover provide the following information not previously interpreted with respect to enemy communications on the Sixth Army front.

#### MOBILE - RHINE TRIANGLE

Elements of 6th SS Mountain Division have been reported at two points facing the Third Army. It may therefore be accepted that this division has succeeded in withdrawing from the Seventh Army front. It is also reported that two infantry divisions in the Saar area have probably received reinforcements. These movements may well be connected with the unusual amount of military traffic observed in the southern and western portions of the triangle during the past several days.

Photo cover of 2 March show through lines serviceable at REUSWILER, ST. WITTEL, WEINBURGER and ZWILLINGEN, despite recent bombing of marshalling yards and rail centers at these points.

Cover of the ALBY and KATZEN bridges on the same date show both to be serviceable. Of the two rail lines at KATZEN one had been damaged, one had been repaired and was serviceable. At REUSWILER the single track line was hit by 340mm mortar and the embankment at the south end of the bridge received 13 hits. The time since this cover has been sufficient however repairs to have been completed.

#### RHINE VALLEY and SAAR FOREST AREA

Reliable source states on 23 February no troops were observed in the FREIBURG area save those necessary for administrative and MP duties, but in the region from FREIBURG to RIDGEB (W-0150) work on defensive trenches was in progress. No large concentrations of troops observed in OFFENBURG, and trains were not being routed from DRAUESCHINGEN to OFFENBURG but instead were being sent from DRAUESCHINGEN to FREIBURG. At DRAUESCHINGEN an emergency track 4,000 yards long has been installed through the bombed-out station, enabling trains to go in a N-S direction at a speed of 4 MPH.

## GALACTIC ACTIVITY

Only 3 c/a. all F4U's were sighted by 1st TAC AF units. The enemy was not aggressive, and was not contacted. A possible jet circled high over B-20's over Carlsbad, no contact. The F4U, a 4 engine transport that was shot down the night of 2/3 March was probably carrying supplies to the Germans in the Atlantic east coast.

11. TAF: 6 jet a/c sighted, only 2 contacted, no losses or claims. Over Roof 1  
 rain 234 at 10,000', no contact. 3 MB-109's also sighted at Gaidern and Bremen.  
 ch AF: As the heavies penetrated deep into Germany they encountered much G. F.  
 activity, but a/c was only aggressive when it had favorable odds. 79 jet a/c were  
 sighted, mostly MB-262's. 10000. MB-262's in air 2-2-3. MB-262's on ground 9-0-2,

## STATUS OF COMMUNICATIONS

In the Rhine-Moselle triangle the rail net in the area Ludwigshafen - Kaiserlautern - Saarbrücken was active. Photos on the 2nd of March reveal that the Bad Münster bridge has one track repaired, which may indicate that the line from Kaiserlautern is urgently required. Rail activity was observed in the Worms area heading generally West and Southwest. The Zweibrücken - Homburg line was moderately active with movements to the West. A/T at Neunkirchen also active.

M/T convoys and concentrations were observed throughout the day including almost 200 M/T and 10 plus tanks from Southwest on the main and secondary roads just South of Neustadt.

There was a troop concentration observed just South of Speyer.

Scattered pontons, barges and dismantled pontoon bridge were observed along the Rhine South of Speyer. A pontoon bridge is under construction opposite St. Louis near the site of the demolished Aistatt (Rhine) bridge.

A ground source reports that Frankfurt has become a very important rail junction. All trains coming from Southern Austria as well as trains from Lorraine, Frankfurt and Offenbach end up there. Transfers are made there for U.S., Stuttgart, and Mannheim.

## INTELLIGENCE REQUIREMENTS

1. Activity on the Ludwigshafen - Saarbrücken rail line.
2. Concentrations of M/T and troops and their probable direction of movement.
3. Surveillance of convoys as well as railroads, for movements, in the lower part of the Moselle - Rhine triangle.
4. The status of the Aistatt (Rhine River) Bridge, and the Aistatt and Offenbach M/T's.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The number of transformed cells was determined by the number of colonies obtained on the selective medium. The results are the mean of three independent experiments.

CONFIDENTIALSTATUS OF COMMUNICATIONS

In the Moselle-Rhine triangle medium bombers attacked the Bad Munster rail bridge and obtained good to excellent results.

Observations were scant due weather. The rail line Wissenbourg to Landau was very active with traffic moving generally north, one train had two locos and 40 flat cars loaded with M/T, another train with 30 flat cars loaded with M/T facing south on the same line. 400 to 500 boxcars and 4 locos observed south of Mannheim. Just north of Heidelberg, 7 locos seen going west toward Mannheim where 3 locos with steam up were observed.

Fighter bombers claim 2 rail cuts on the Freiburg Basle line and 3 cuts just south of Offenburg on the Donaueschingen line.

Ground reports: February 13th report states that AA batteries some of which have come from Als ce, are being set up notably in Appenweiler, Offenburg, Mahlberg, Ettenheim, Konzingen, Eickstetten, Krozingen, Staufen, Sulzburg and Badenweiler. Between 3 to 4 Pns of regular troops were sent to Rastatt, while a motorized Div HQ was reported in Baden-Baden on this same date. All the hotels in Baden-Baden are crowded with high ranking military officers.

INTELLIGENCE REQUIREMENTS

1. In the Moselle-Rhine triangle, the status of the Bad Munster rail bridge and Worms Road-Rail Bridge.

2. Status of Rastatt rail bridge which was last reported to be under repair.

3. Terminus of rail movements on the West side of the Black Forest where remnants of the 19th Army may be regrouping.

G.A.F.

Only 10 FW 190's, 2 ME 109's and 1 ME 210 were seen and identified by units of the First Tactical Air Force (Prov) on 21st Feb. 5 a/c possibly ME 109's were seen trailing a formation of B-26's, but no contact was made. Two single engine a/c, not identified, flying south at 5,000 ft at 1600Z at 1601 hours were seen, but no contact made. The only aggressive action taken by E/A was over Bad Munster when an ME 210 started to attack a formation of P-47's at 14,000 feet, 1735 hours, but broke attack and disappeared in clouds. A formation of FW 190's out of range fired on a flt. of reconnaissance a/c, over R 2110 at 1630 hours, 8,000 feet, but turned north and avoided encounter.

## STATUS OF COMMUNICATIONS

MOSELLE-RHINE TRIANGLE

While a number of rail targets were attacked in this area during the period under review, few observations of movement were made. Of significance, however, was the sighting of smoke pots at Kaiserslautern, indicating the determination of the enemy to protect this important installation, as well as the line west of the yard.

MAINHEIM-STUTTGART-KIELCKUHE AREA

Most of the movement in this area appeared to be in an easterly direction, with one train of 75 empty cars being the principal observation. This area continues to be of primary importance for movement of supplies westward, however.

RHINE VALLEY KIELCKUHE TO BASLE

The sighting of many barrage balloons at all small stations between Freiburg and Löffingen tends to add to the importance of this direct line between Donaueschingen and Freiburg. Movement in both easterly and westerly direction was noted, although no movement was reported on the Donaueschingen-Offenburg-Rastatt line.

INTELLIGENCE REQUIREMENTS

1. Continued observation of the nature of troop concentrations or activity around Bachweiler, Oberkirch and Baden-Baden as reported yesterday.
2. Observation of movement from Heustadt and Landau westward to Homburg, Neuenkirchen and Saarbrücken.
3. Continued observation of troop movements or activity in the area Bitch to Sarreguominas.

CONFIDENTIALSTATUS OF COMMUNICATIONSMOSELLE-RHINE TRIANGLE

Observation of movements or concentrations of the enemy in this area were nil due to weather. Contact has been lost with the 10th SS Panzer Division and it is presumed to have moved into the area east of the Rhine. Of the remaining armored units previously identified, only one division remains in the front lines and is located between Bitch and Sarreguemines.

RHINE VALLEY KARLSRUHE TO BASE

Evacuation of units in the Colmar pocket has proceeded rapidly with only remnants of the units formerly engaged now in contact.

INTELLIGENCE REQUIREMENTS

1. Observation of concentrations of enemy troops and equipment in the Karlsruhe, Mannheim, Heilbronn, Stuttgart area.
2. Information relative to military movements in the eastern portion of the Moselle Rhine triangle with particular reference to congestion of troops at entraining points.
3. Observation of enemy movements in the Heusenburg, Freiburg, Offenburg area with particular reference to the character and direction of movement.

CONFIDENTIALGAF ACTIVITY

20 plus ME-109's of J-53 airborne in KARLSRUHE area from 0945 to 1030 - no combat - flight apparently on screening and free-lance patrol only.

Slight Recce activity with one possible single engine recce a/c landing at STUTTGART area 1700 hours.

STATUS OF COMMUNICATIONSMOSELLE-RHINE TRIANGLE

Reports from P/W sources confirm the withdrawal of the 10th Panzer SS Division from the Hagonsau area; the indicated route being via Fort Louis by ferry to an entraining station at Hugelshelm 23/22 and reported destination the Berlin area. Heavy military rail movement observed and attacked in area north and east of Hagonsau, possibly associated with this movement.

Rail lines between Saarbrücken and Speyer active with predominately eastward movement.

KARLSRUHE-MANNHEIM-STUTTGART AREA

At Pforzheim F/W sources report the 553 Division to be reforming, indicating a possible refitting area for units destined for the Eastern Front.

Rail lines and M/Y's from Karlsruhe to Heilbronn moderately active with east-bound traffic.

RHINE VALLEY KARLSRUHE TO BASLE

The M/Y at Offenburg was very active, and heavy traffic observed moving E-W on line from Donaueschingen to Offenburg. South-bound traffic was observed on lines from Karlsruhe to Offenburg.

Heavy road activity on both sides of the Rhine reported from Colmar to Basle.

INTELLIGENCE REQUIREMENTS

1. Observations relative to the location and further movement of troops, armored equipment and vehicles in the Karlsruhe, Mannheim, Heilbronn, Stuttgart area.
2. Further observations of military movements in the eastern portion of the Moselle-Rhine triangle from Karlsruhe to Worms, with special reference to possible congestion at entraining points and Rhine river crossings.
3. Observations of the disposition and movement of troops and equipment in the Neuenburg-Freiburg-Breisach area, and of the character of military traffic and possible concentrations along road and rail lines north and east of this area.

STATUS OF COMMUNICATIONS

No air observations were made due to weather.

MOSELLE-RHINE TRIANGLE

There is no significant information regarding the volume or character of enemy movements in this area, and no further evidence of the general status of road or rail communications either within the triangle or to points east of the Rhine.

RHINE VALLEY, KARLSRUHE TO BASEL

The meeting today of allied forces in the Colmar pocket signifies the final stage in the enemy's withdrawal from this area. Mass movement of enemy troops and equipment to points east of the Rhine may be expected until the evacuation is complete. Our forces have cut off the road and railroad leading to the Breisach bridge. The Chalampagne-Neuenburg bridge, however, is believed still to be serviceable.

INTELLIGENCE REQUIREMENTS

1. Continued observation of all military movement or congestion of troops and equipment withdrawing from the Colmar pocket, with especial reference to Rhine crossings.
2. Observations of all military movements east of the Rhine river in the Karlsruhe-Basel-Stuttgart-Singen area.
3. Observations of military movement in the Karlsruhe-Mannheim-Heilbronn-Stuttgart area.
4. Continued observation of possible entraining points in the Karlsruhe, Landau, Neustadt, Worms and Speyer areas.

CONFIDENTIAL

CONFIDENTIALSTATUS OF COMMUNICATIONS

Weather limited the observation of the entire northern part of the communications area, though missions flown in the Colmar area and east as far as Donauschingen provided additional information on the not being used by the enemy in the attempt to evacuate troops from the pocket.

MOSELLE-RHINE TRIANGLE

P/R cover of Bad-Kamstorf indicates that sufficient repair has been made to the damaged rail bridges to allow through service at this important junction. One line appears to be open. Likewise, P/R of Kaiserslautern indicates that three lines were open through the yards on 2 February. No evidence has as yet been obtained on the effectiveness of the RAF raid of the night 2/3 February on this important target. P/R of 2 February also reports that the H/V at Saarbrücken had no boxcars and no activity. This is in sharp contrast to previous reports of heavy activity in this yard, and supports ground reports that the Germans are demolishing rail installations in this area and moving the salvage to the rear of the Siegfried line. The rail net in the triangle should be fully capable of handling the enemy's needs.

KARLSRUHE-MANNHEIM-STUTTGART AREA: There were no reports of activity in this area.

RHINE VALLEY KARLSRUHE TO BASLE

Heavy rail activity was noted on the line from Dinglingen to Offenburg and thence to Donauschingen, with a reported 500 boxcars seen on sidings between Ruzheim and Hildersheim. Movement along this escape route may have been temporarily halted by a reported rail cut at W26045. Claimed damage to a bridge, and rail cuts effected immediately west of Neustadt-W251244 on the Freiburg-Neustadt-Donauschingen line have probably rendered this route temporarily unserviceable to through traffic.

Damage to the Breisach bridge and approaches was claimed, as rendering this important river crossing unserviceable, and if verified, focuses attention on the Neuenburg bridge.

INTELLIGENCE REQUIREMENTS

1. Continued observation of all military movement or congestion of troops and equipment in the Colmar pocket, with especial emphasis on accurate reporting of the status of the Breisach and Neuenburg bridges.
2. Observations of all movement in the area east of the Rhine river between Basle and Karlsruhe and east to a line between Stuttgart and Singen.
3. Indications of movement, with emphasis on armored equipment and troops in the Karlsruhe-Mannheim-Heilbronn-Stuttgart area.
4. Continued observation of the possible entraining points in the Karlsruhe-Landau-Neustadt-Worms and Speyer area.

A MESSAGE OF CONGRATULATIONS

Indicating the effectiveness of close cooperation efforts, the following message from 7th Army to XII TAC is quoted:

"Please pass congratulations to squadrons concerned for the fine support they have given the 3rd Infantry Division. Following are a few of the missions that have been especially valuable to us: (1) 81st Squadron bombed Holtzwhir-V765460 261540A at which time one of our Regiments was receiving a counterattack from the town. Counterattack was completely stopped after the bombing and our troops held without loss of ground, the Regiment sends its thanks. (2) 10th Squadron at 261555A bombed Mickerschwir-V778455 stopping the self propelled fire from that town, knocked out a tank north of town and strafed enemy infantry stopping their infiltration into our positions. (3) During day of 29 Jan support was given by 324th, 371st and

50th Groups with excellent results. Many concentrations of enemy troops were strafed, and self propelled gun and tank fire was materially reduced due to bombing and strafing. The bombing and strafing east and south of Jechheim-V8147 enabled our troops to advance and clear the area taking many prisoners. Signed O'DANIEL. (Congratulations and thanks: keep up the fine work).

G.A.F. Activity 29/30 January

There were no visual sightings of enemy aircraft during this period. An estimated 15 plus single engined fighter aircraft comprising one flight of JG53 (German Group NO.) was in STRASBURG- KARLSRUHE area from 0930 to 1030 hrs. This report came from ground sources but there was no allied contact. Formation did not cross RHINE and appeared to have mission of free-lance patrol in line of communication area only. There was also a recce in Seventh Army area between 1545 1615 hours. There were approximately 25 sorties along southern sector of front during the 24 hour period.

STATUS OF COMMUNICATIONS

9 F/B and 7 T/R missions resulted in observations in the following areas:

1. SAARLAUTERN, KAISERSLAUTERN, HEUSTADT, LANDAU, PIRMASENS.
2. KARLSRUHE, HIRDEMBERG, HIELEFON, PFORZHEIM.
3. OFFENBURG, FREIBURG, COLMAR.

P/R was flown and observations were scant due to weather.

MOSELLE - RHINE - TRIANGLE

The Seventh Army front was generally quiet. Rail activity in the KAISERSLAUTERN, KARLSRUHE, SAARBRUCKEN triangle was chiefly observed in the yards. No rail movement was observed on the lines from SAARBRUCKEN to LANDAU or from SAARBRUCKEN to NEUSTADT.

Roads in the vicinity of SAARBRUCKEN appeared to be heavily travelled and heavy M/T traffic was observed in all directions out of LANDAU. Elsewhere in this area no unusual road activity was observed, but it has been reported that M/T traffic was increased in the Western portion, rail traffic having been interrupted by bombing.

RHINE VALLEY & KARLSRUHE to BASLE

No significant movements were observed in the RHINE VALLEY South of KARLSRUHE, but photo cover of 29 January shows rail bridges serviceable at BREISACH and NEUBURG.

CONFIDENTIALKARLSRUHE - MANNHEIM - STUTTGART Area

Rail activity between MANNHEIM and HOCHENHEIM was reported heavy in both directions. Heavy movement to the East was also reported between KARLSRUHE and ILLINGEN.

INTELLIGENCE COMMENTARY

1. Further indications of troop and vehicle movements North from the WISSEMBOURG, LANDAUROURG, area to possible entraining points in the ANNWEILER, LANDAU, NEUSTADT, SPEYER, GERMERSHEIM area.
2. Observations of unusual movements eastward across the RHINE.

ALL OTHER UNITS STOOD DOWN DUE TO WEATHER.

Observations: Fires in towns at V827438 and V815430. One horse drawn vehicle at W130970 moving North. 6 to 8 camouflaged piles at W145965. One loco no steam up and 6 R/R cars facing North at W035504. 23 R/A cars at W02556. Scattered R/R cars on railroad East of DINGELINGEN-W1071. 50 plus R/R cars, no locos at W0348. 20 plus R/R cars in W/Y at W2179. Undetermined number of R/R cars in OFFENBURG W/Y. Artillery flashes from East side of Rhine between V9330 and V9374. Large fires at RAITZELHEIM. Small fires at BIESHEIM and WADEN SOLEN. Flak: Intense heavy at V8040, V8244, N-1 BREISACH. Intense light at V9044, BREISACH, MARKLESHEIM, V8538, and V8243. Moderate light at V8244.

GAF ACTIVITY: Nil.

STATUS OF COMMUNICATIONS

Flights of enemy movement were restricted by the continued poor operational weather. No TAC/1 or R/A was flown. There are indications that enemy withdrawals and realignment of forces are increasing in magnitude.

MOSELLE RIVER TRIANGLE

Significant observations of movement in this area were nil. The importance of Ludwigshafen as a rail center in handling a large percentage of the movement in this area is borne out by observations since the 16th of January.

RHINE VALLEY KARLSRUHE TO BASLE

There were indications of activity in the Strassbourg-Achern-Offenburg triangle, involving the possible movement of armored units. Enemy forces appear to have withdrawn from the area northeast of Colmar along the Rhine.

INTELLIGENCE REQUIREMENTS

1. Indications of enemy withdrawals from the Colmar pocket, with especial reference to the character of the traffic.
2. Especial significance attaches to troop movements and concentrations of the enemy forces in the Hardt Forest area.
3. Possible outtraining points at LUTTERBURG, WISSENBURG, AUWELLER, LANDAU, NEUSTADT, SPEYER and ZIMMERBACH in the southeastern portion of the Moselle-Rhine triangle should continue to be observed.
4. Further indications of the movement of possible armored units in the Strassbourg-Achern-Offenburg triangle.

CONFIDENTIALGAF ACTIVITY - 29 Jan.Reported by XII TAC:

Estimated 35 to 50 S/E fighter sorties on SAAR/RHINE Front daylight period 29 January comprising one flight of 15 plus fighters of J 53 in SPEYER area from 1050 to 1205 hours. Enemy aircraft very unaggressive, and although sighting allied fighter bomber formations, went out of way to avoid combat. Also isolated strafing incidents, little damage reported.

4 to 6 possible Jet a/c active from GIEBELSTADT area. 2 ME-262's dropped bombs at W805500 at 1454 hours. No damage.

Remainder of enemy air activity confined to Recce, including 2 ME-109's which landed in STUTTGART/BOCHTERDINGEN area.

Reported from other sources:

At 1230 hours 4 ME-109's strafed 8 machine guns at Q6547, flying East to West. One dropped an American fuel tank.

At 1240 hours 3 ME-109's strafed north of Landotte Cub Strip, destroying one L-4. AAA engaged and destroyed 1 ME-109.

STATUS OF JOINT ARMY MOVS

Improved weather during the day permitted extensive reconnaissance of both Army fronts, although observations were somewhat restricted in the Western portion of the US 7th Army front.

Generally speaking, there were no notable indications of either heavy concentrations or withdrawals of enemy forces.

MOSELLE-RHINE TRIANGLE

The Western portion of the triangle was generally quiet, and little significant activity was observed. Road traffic from SAARBRUCKEN to ZWEIBRUCKEN and PIRLSHEIM was light; the autobahn H-E from KAISERSLAUTERN was snow-covered and untraveled nearly half way to WORMS, and from BAD-DURKHEIM to LUDWIGSHAVEN the road was also snow-covered and bad. Roads South and East of PIRLSHEIM, however, appeared well used, with traffic apparently moving chiefly South and East. Marshalling yards at KAISERSLAUTERN and EMBURG were fairly full, but no significant rail activity was observed.

One rail bridge at HUTSCHENHAUSEN-Q774912 was seen to be damaged, with South-bound traffic blocked, but North-bound passable.

In the South-east portion of the triangle, M/T and troops were observed, especially in the vicinity of SELZ and on the road from LAUTERBURG to LANDAU, moving chiefly towards the North. One large convoy was sighted between LANDAU and KARLSRUHE - no direction given. There were no points of congestion, however, nor other indications of a concentrated withdrawal.

RHINE VALLEY KARLSRUHE TO BASLE

No significant movements were observed either into or out of the COLMAR pocket. Bridges at CHALAMPE-NUREMBERG and BREISACH were intact.

INTELLIGENCE REQUIREMENTS

1. Observations of possible entraining points for troops seen to be moving North from LAUTERBURG, namely, LANDAU, NEUSTADT, GERMERSHEIM, SPEYER, and KARLSRUHE and along the road from LANDAU to ANNWEILER.
2. Observations of further movements in this area indicative of a continued thinning out, or possible withdrawal.
3. Indications of possible thinning out in the COLMAR pocket.

GAF ACTIVITY - 28 Jan.

Reports from Other Sources: 1715-1721 - 1 a/c reported landing.

STATUS OF COMMUNICATIONS

Again no observations were possible relative to the status of enemy communications on the 7th US Army or the First French Army fronts, but indications of enemy movements call for some further comment.

MOSELLE-RHINE TRIANGLE.

During the bad weather period which has prevented aerial observations, the enemy has had the opportunity to make full use of available road and rail facilities without interference from our air forces. There are indications, moreover, that the enemy's disposition has been undergoing some change. The most significant recent report relates to a possible withdrawal of one panzer division northward from the HAGENAU area.

RHINE VALLEY SOUTH OF KARLSRUHE.

No activity has been reported in the COLLAR pocket, but the enemy is presumably free to make full use of the main communication lines.

INTELLIGENCE REQUIREMENTS

1. The serviceability of rail connections south of BINGEN and east of KAISERSLAUTERN.
2. Indications of M/T and AFV traffic in the WORMS, SAARBRUCKEN, HAGENAU triangle.

9th AF

Night 27/28 Jan.

1. The first group of people who are interested in the results of the study are the researchers themselves. They want to know how well the study was conducted and whether the results are reliable and valid. They also want to know how the study was funded and whether there were any conflicts of interest.

... ..

1. The first part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1) as  $t \rightarrow \infty$ . It is shown that the solutions of the system (1) tend to zero as  $t \rightarrow \infty$  if and only if the matrix  $A$  is Hurwitz. The second part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1) as  $t \rightarrow \infty$  if the matrix  $A$  is not Hurwitz. It is shown that the solutions of the system (1) tend to infinity as  $t \rightarrow \infty$  if and only if the matrix  $A$  is not Hurwitz.

OSUM NUMBER 27

Period 261800 to 271800

XII TAC: No operations due to weather.42 COMB WING: No operations due to weather.FR TAC: No operations due to weather.WEAF: No reports received.GAF ACTIVITY - 27 Jan.

No M/A activity reported for period. Reports indicate that large scale reinforcements of the GAF on the Eastern Front are being made by withdrawal of GAF units from the Western Front. So far there is no definite indication as to the number of units involved, but it may likely affect units operating against the 7th US Army Front in the FRANKFURT and STUTTGART areas.

STATUS OF COMMUNICATIONS

No observations or reports have been received today relative to the status of communications on either the 7th US Army or the First French Army fronts. However, the indications of enemy movements as reported yesterday permit some further comment.

MOSELLE RHINE TRIANGLE

If the activity noted yesterday West of KAISERSLAUTERN was in fact caused by the detrainning of elements of the 2nd SS Division transferred from HUSKIRCHEN, those elements are probably to be found at present in wooded areas, and in the small villages situated at road intersections generally throughout the district Northwest of BITCHEM, especially between the ZIMMERBACHEN-PIELSEN road and the front lines.

Nothing further can be deduced regarding intended movements of the 9th SS Division reported yesterday to be headed into the LANDAU area, but it is probable that rail and road connections both West and South of Landau are in serviceable condition, permitting movements in either direction.

RHINE VALLEY SOUTH OF KARLSRUHE

In the COLE pocket, the enemy is still able to move necessary supplies and reinforcements over the main communication lines.

The main North-South line from KARLSRUHE to BASLE is believed still serviceable, with RHINE crossings open, including the road and rail bridges at BRUNSBACH and CHALATHE-NEUBURG.

INTELLIGENCE REQUIREMENTS

1. Further observations of rail movements South from BITCHEM and West and South from WIDENS, MALDEN, SPAYR, NEUSTADT and LANDAU.
2. Indication of M/T or AFV traffic in the KAISERSLAUTERN-SARREBUECKEL-BITCHEM triangle.
3. Indications of road traffic South of LANDAU.
4. Indications of troop, M/T and AFV concentrations in wooded areas and villages South of ZIMMERBACHEN.

WESTERN FRENCH AIR FORCE - (11/11, 5 missions).

7/7 A-24's flew one mission bombing a fortification in JAFFE-BOYAN sector - 5 tons GP dropped around target.  
2/2 Foislers flew 2 artillery adjustment missions.  
2/2 DB-7's flew escort to bombers.  
Claims: Nil. Losses: Nil.

GAF ACTIVITY - 26 Jan.

Y Service: Nothing to report.

Ground services: Nothing to report.

The only a/c which was sighted were two unidentified a/c painted white, and, therefore, probably enemy aircraft. These were sighted at 1500 hours by 50th Group between COLMAR and STRASSBURG. The a/c were on the deck and going east across the Rhine. There was no encounter.

STATUS OF COMMUNICATIONSMOSELLE-RHINE TRIANGLE

The north E/R bridge at BAD-MUNSTER is believed to be still unserviceable. Tac/R reports 20 trains and much activity just west of KAISERSLAUTERN, indicating that one or both of the E-W lines through WORMS and NEUSTADT are open. A captured enemy document indicates an intention to move two S.S. Divisions from LUSKIRCHEN in the Eifel sector into the PIRMASSEN-LEUNIKIRCHEN and LANDAU areas beginning 22 Jan. The activity west of KAISERSLAUTERN is in all probability the detrainning of elements of one of these divisions. The road net in this area is exceptionally favorable for detrainning and movement to the south on a broad front. The line LANDAU-ANNWEILER is also favorable for this type of operation.

RHINE VALLEY SOUTH OF KARLSRUHE

The main north south line KARLSRUHE-BASLE is believed to be serviceable.

INTELLIGENCE REQUIREMENTS

1. Further rail movement south from BINGEN and west WORMS-KAISERSLAUTERN, MAINHEIM-NEUSTADT and SPEYER-LANDAU.
2. Indications of M/T or AFV traffic on roads in KAISERSLAUTERN-SAARBRUCKEN-BITCHE triangle.
3. Indications of road traffic south of LANDAU.
4. Indications of troop concentrations, M/T and AFV parks in wooded assembly areas and villages south of ZWEIBRUCKEN.

2/33 Sq - (2 missions, 4 sorties).

4/4 a/c conducted 2 Tac/R missions. Claims: Nil. Losses: Nil.

Observations: Only area between MUNCHHAUSEN and NEU-BREISACH observed. Nothing to report at IRZEFELD. Canal between MUNCHHAUSEN and BREISACH frozen. A balloon at 300 feet observed at BREISACH.

ALL OTHER UNITS STOOD DOWN DUE TO WEATHER.

WESTERN FRENCH AIR FORCES: No operations.

E/A activity: From other sources - 1344 to 1453, Recce in TRIER area. 1650 to 1722, one unidentified landing in the RECKENHIL area.

## STATUS OF COMMISSIONS

Weather, which has prevented attacks of enemy installations during the past 24 hours, has also prevented observation of enemy activity. Information from ground sources, however, indicates continued movement of supplies in and about the vicinity of BITCHE, while renewed activity has been reported in the TRIER area.

Photo cover of 23 January indicates sufficient damage to the BULLAY rail and road bridge to temporarily block rail traffic in all directions in the immediate area.

## INTELLIGENCE REQUIREMENTS

Indications of renewed activity in the Trier area, as well as continued activity in the vicinity of Bitche, indicate the need of close observance for any signs of troop or supply concentrations in these two areas. Indications of enemy activity in the Colmar pocket would be of prime significance.

One ME-262 sighted at 14000 feet in OBERGHEIM area, two black contrails.

STATUS OF COMMUNICATIONS

MOSELLE-RHINE TRIANGLE

The enemy is attempting to restore his rail transportation in the Western area as evidenced by repairs to the Eller and Bonnweiler bridges now reported serviceable.

In the center section the rail line from Neuenkirchen towards Bad-Munster is apparently serviceable, and there was traffic between Neuenkirchen and Kaiserslautern.

No movement was observed on the Kaiserslautern-Bad-Munster, Kaiserslautern-Neustadt, or Landau-Pirmasens-Zweibrücken lines. Further south there was much M/T activity in Bitch and vicinity.

MANHEIM AND SOUTH TO BASLE

Very little movement was observed in the area with the exception of the Colmar pocket, scene of our present offensive, where 30 boxcars were present at the Colmar station, and much M/T and RGV traffic was observed going south towards Emsisheim.

INTELLIGENCE REQUIREMENTS

The present situation calls for determined effort on the part of all units to observe and report on the magnitude, character and direction of enemy movements of troops, equipment and supplies in the areas of immediate significance to military operations, viz:

1. The Rhine Valley from Mannheim to Basle, and the Black Forest region.
2. The Moselle Rhine triangle with emphasis on the lower portion.

8 AF

**CONFIDENTIAL**

Enemy air reported by ground: 4 flights of 1 ME262 each, dropped bombs at WEIT-  
BRUCH-RO317, in morning 23 Jan 1 soldier hurt, reported by 79 Div. At 1300 hours  
at KALTENHOUSE-RO721 nett. E/A bombed twice no casualties reported by 79 Division.

Reported by I: 2 Fighter mission 0937-1044 EAGLE-EAGLE probably 30 plus a/c.  
1 Fighter mission 1100-1146 SARGENT-STEED area probably 12 plus a/c, ungres-  
sive. 3 Recce missions 1147-1149 LINDA-C area. 1351-1401 EAGLE area. 1607-1624  
along 7th Army front. 60 sorties GAF along 6th AF front.

**STATUS OF COMMUNICATIONS****MOSELLE-RHINE TRIANGLE**

Activity reported upon during the past 24 hours is confined to the southern 3rd  
of this sector. Between Neunkirchen and Kaiserslautern a large movement south &  
S-E of M/T and some AFV was observed, an estimated 500 vehicles being involved.  
FEU of 22 Jan reports light activity in the Neunkirchen M/Y and on 23 Jan 1 train  
loaded with tanks, guns and M/T was seen.

In the area north N-E, S-E and south of Hilsche a moderate concentration of M/T  
and HDV were observed and attacked. Direction of movement of this activity is re-  
ported to be in a north and N-E direction.

Rail activity between Landau and Lingendorf was observed moderate and several  
successful attacks were claimed in this area. The claims involve rail cuts, the  
first on the line from Landau to Wissembourg immediately S-E of Landau, and the  
second on the line from Lingendorf to Gernsheim, the latter cuts being claimed at  
each end of the Lingendorf M/T. Enemy activity appears to be the result of the  
realization of our withdrawal and the need to fill the gap thus caused. The commu-  
nication network appears capable of handling the needs of such movement.

**STRASSEBURG SOUTH TO BASLE**

The rail line between Offenburg and Konzigen on the Offenburg-Freiburg line  
appeared to be fairly active as did the rail lines leading into this system. It is  
significant that 11 locomotives were claimed damaged on the line between Froudon-  
stett and Rastatt. The communications network in this entire area appears to be  
fully capable of handling all the needs of the enemy.

Tac/R reports that the rail bridge at Broisach, an already well defended target,  
is now camouflaged with trees.

Office of the Assistant Chief of Staff, G-2, SHAPE, reports from a fairly reli-  
able source dated 1 Jan 1945, that apparatus located immediately east of Strassburg  
and Rastatt are apparently continuously used for detrainning purposes.

**INTELLIGENCE REQUIREMENTS**

Three main areas continue to require close observation by all units for the  
character, quantity, and direction of road/rail traffic and for any abnormal concen-  
trations of vehicles and/or rolling stock. These areas are:

- 1) The road/rail net south from Strassburg to Basle and between the Rhine and a  
N-S line between Stuttgart and Tuttlingen.
- 2) The Moselle-Rhine triangle, with the emphasis on the southeastern portion.
- 3) The road/rail net north and west of the confluence of the Rhine and Moselle  
Rivers.

#### Western French Air Force

15 aircraft attacked a fortification at RHEIM in the LA ROCHELLE area.

11 tons of G.P. bombs were dropped with poor to fair results.

Claims: NIL.

Losses: NIL.

An unreported number of aircraft conducted 1 escort mission, 1 P/R mission and 1 artillery adjustment mission.

#### G.I.F.

A total of 2 FW 190's and 4 ME 109's were sighted by units of the First Tactical Air Force on 22 January 1945. These aircraft were in the general area of RHEIM and LA ROCHELLE. They were not aggressive and no encounters resulted.

Reported by 44 Division: At 1345 hours 2 P-47's with red tails, red noses and black crosses on wings, flew over a string of vehicles at Q-653. They did not attack, but flew South and strafed DHERACK (Q-6549). There were 2 P-47's with the same markings sighted and it is assumed the latter were flying top cover. Shortly after the strafing of DHERACK, 4 German marked P-47's strafed front line troops in the same locality and it is believed that the same A/C took part in this.

From other sources: 1710-1721 hours. 1 A/C bombing, probably recon. Landed in STUTTGART area. 1930 A/C airborne, probably recon.

#### STATUS of COMMUNICATIONS

In the MOSELLE-RHEIM triangle, chief interest during the past 24 hours centers in the South Eastern portion where enemy ground action has been considerable. Railroad-interdiction in this area had been negligible. Photo intelligence reveals that the enemy is using approximately 40 RAIL crossing including 4 rail and the remainder road pontoon bridge and ferry crossing between MANNHEIM and just North of STRASSBURG. The rail route from MANNHEIM to the front lines East of RHEIM is probably serviceable, although no reports of activity on this line have been reported.

Extensive N/T traffic was observed however, STRASSBURG-LUTHERSHEIM.

area moving in all directions. Additional M/T movement of considerable intensity was observed in the vicinity of BIECHS and 40 to 50 M/T vehicles were collected in the nearby woods.

No activity was observed at the important rail centers of LINDAU, NEUSTADT and KATZENBACH, though some rolling stock was present at all these points.

In the OFFENBURG-FREIBURG-COLMAR area some interdiction was reported. Rail cuts were claimed on the important OFFENBURG-KOLMAR line at a junction point 10 miles south west of OFFENBURG and a minor rail bridge was damaged and temporarily blocked 5 miles north west of FREIBURG. Road blocks were also reported at several points.

Although it seems unlikely that these attacks have accomplished any considerable interruption of traffic, the fragmentary observations which have been reported preclude an appraisal of status of communications east of the Rhine below STRASSBOURG. By the same token no definite exists with regards to the general status of enemy communications in or adjacent to the DRELLS-REIMS triangle.

 Moderate light, COLLIER, KNEUBERGSACH.  
 Scant light, V7311.

G.A.F. ACTIVITY

A total of 5 ME109's were sighted and encountered by a unit of 1st IAF on 20 Jan. It is a guess that the above E/A were on a training flight as they were not aggressive and avoided combat. One flight of P-47's made the attack and shot down 4 of them. One P-47 which was out of ammo dived on one E/A and rather than engage, pilot of ME109 bailed out without a shot being fired.  
Reports from other sources: C910 - unidentified a/c, 1007- 1016 a/c homing area North of HANOV. 1153-1204, A/C homing. 1219-1233 a/c homing NE of HANOV. 1657-1744, a/c homing probably landing.

OBSERVATIONS

At V3514 landing piers approximately 30 ft long and 30 ft apart extending from both banks. About 6 barges moored on both sides of river covered with snow at 0930 hours.

LUDWIGSHAFEN - no locomotives appeared damaged but some tracks appeared in use. No activity at air drome R3621. Snow covered runways.

Unknown type of bridge knocked out and road bridge intact at BULMERSHEIM, V6715, 3 road bridges observed at V7213.

STATUS OF COMMUNICATIONS

Cumulative evidence from P.W. interrogation of former DEUTSCHRAIL employees (SHAEF summaries) indicates a steady decline in quality of rail service and a growing inability to handle even priority traffic on schedule. This situation is attributed to:

1. Scarcity of locomotives
2. Damage to vital centers particularly repair facilities, signals installations and switchman equipment.
3. Shortage of personnel due to induction of experienced workers into the armed services

ROSSUM - RHINE Triangle

Rail movement into the eastern third of the triangle has not been appreciably restricted as evidenced by the continued activity observed however fighter bomber rail cutting may have hampered movement from the RHINE river into the sector west of LANDAU, METZELER and necessitating the establishment of de-training points from which troops are marched to the front lines.

The recent activity in the FELSLETT area, W and E of STRASBOURG was evidently the build up of reinforcements (troops and supplies) which has enabled an aggressive enemy (an estimated 10,000 troops with armor) to establish a strong salient threatening BISMILLER. A 17 Jan report states considerable troop transport moving from SCHAFFENBURG in direction of BASLETT which may have contributed to the buildup.

S and E of STRASBOURG at LAHR ground reports indicate a new armored division is grouping. The LAHR is well served by road and rail and LAHR itself is an excellent rail head, and could be supplied from the VILLINGEN-DOBERSCHINGEN or LOBACH area.

INTELLIGENCE REQUIREMENTS

3 main areas deserve the attention of all units with emphasis on concentrations of box cars and flats direction of movement and rail heads in -

1. The rail net in the ROSSUM triangle.
2. The rail net South and East of COBLENZ.
3. The communications net in the area STRASBOURG, BASLE and East to STUTTGART - TUEBINGEN.

CONFIDENTIALCOMMUNICATIONS SUMMARY

The most activity in the sector was observed opposite STRASBURG from OFFENBURG to LUDWIGSHAFFEN where the M/Y was 2/3 full and 10 locos had stern up. 2 M/T were observed going N in the vicinity of HOCKENHEIM. 30 M/T were S-W of RASTATT and 10 Tanks in vicinity of FREISTATT, HDV and M/T activity in vicinity ACHEN, where 50 plus boxcars, no loco, were reported. Between FREISTATT and SPYER 5 self-propelled barges are active as ferries.

No movement seen further north in Rhine Valley although at WILMINGEN there has been a slight but steady build up of boxcars. 40 boxcars were reported in IORACH, which is not unusual.

Rocco reveals that the SIMMERAN rail bridge in the Moselle Rhine river triangle is in which would allow traffic S-W from COBLENTZ as far as DILLWILLER where the rail bridge is believed still out, but where it might be possible to transship for points further south.

Considerable repair activity was observed in ST NEDEL M/Y which was believed 20% serviceable on the 16th.

No movement seen in SARGUEHEIM, SAARLUTHER.

On the 16th Jan photo cover of KAISERSLAUTERN showed 3 cuts on all tracks on the west side of the city. Heavies attacked on the 17th, but no information is available as to result. To the east rail cuts were effected between MARWIL and LANGMIL and LANGMIL and ECKENACK and HOCKENHEIM and NEUSTADT as no major damage was observed it is believed the lines will be only temporally unserviceable.

No observation was reported on BAD-KUNSPER.

PW's report LUDAU and LUTHELLER have been designated as detraining, entraining and rest centers. Although the M/Y at LUDAU has been temporarily out of commission, troops are detrained at LUDAU and LUTHELLER and marched to the front. The electric trolley line between LUDAU and NEUSTADT is being used daily for military traffic.

A train of 30 plus flats loaded with crates was observed going west towards LUDAU from GERNERSHEIM consistent with recent activity in that vicinity.

Q. Now, you said that you were not sure whether the person was a man or a woman, is that correct?

$\frac{d}{dt} \left( \frac{1}{r^2} \right) = -\frac{2}{r^3} \frac{dr}{dt}$

SUBJECT: Monthly Report of Operations.

TO : See Distribution.

1. Attached is a report showing certain phases of the operations of units of the First Tactical Air Force (Prov) for the month of December, 1944. The information is a summary of data from the written OPREPS and data submitted to this Headquarters through intelligence channels. Accuracy of a summary of this nature is dependent on the care and diligence with which the basic information is prepared by the operating unit and the importance of this cannot be over-emphasized. Future planning is based on such reports, and it is essential that correct information be available.

2. Following is an explanation of two of the items shown:

a. Percentage of Sorties to Standard. This is an arbitrary standard of 1 sortie per day for each average operational medium bomber, and 2 sorties per day for each average operational aircraft of every other type. This is simply a yardstick for comparison.

b. Maintenance Efficiency. Maintenance Efficiency is the percentage of assigned aircraft which are operational. The percentages shown represent the ratio of the actual operational aircraft to assigned rather than the ratio of the average operational to average assigned.

3. In the future similar summaries will be published as soon after the end of the month as information is available.

: Description:

1. Attached is a report showing, cert in phase of the current D/C OPS  
units of the First Tactical Air Force (FAC) for the month of D/C ADM  
October, 1944. The information is a summary of data from the  
written reports and data submitted to this headquarters through the  
intelligence channels. Accuracy of a summary of this nature is de-  
pendent on the care and diligence with which the basic information  
is reported by the operating unit and the importance of this cannot  
be over-emphasized. Future planning is based on such reports and  
it is essential that correct information be available.

2. Following is an explanation of two of the items shown:

a. Percentage of sorties to standard. This is an  
arbitrary standard of 1 sortie per day for each  
average operational medium bomber, and 2 sorties  
per day for each average operational aircraft of  
every other type. This is merely a statistical  
comparison.

b. Maintenance efficiency. Maintenance efficiency  
the percentage of assigned aircraft which are  
operational. The percentages shown represent the  
ratio of the actual operational aircraft to assigned  
or than the ratio of the average operational to  
assigned.

3. In the future similar summaries will be published  
after the end of the month as information is available.

SUBJECT: Monthly Report of Operations

TO : See Distribution

1. Attached is a report of certain phases of the operations of units of the First Tactical Air Force (Prov) for the month of January 1945. The sources of this information is the Daily 110-A Report, CPREPS, and data submitted by the tactical units through intelligence channels.

2. Following is an explanation of two of the items shown:

a. Percentage of Sorties to Standard. This is an arbitrary standard of 1 sortie per day for each average operational medium bomber, and 2 sorties per day for each average operational aircraft of every other type. This is simply a yardstick for comparison.

b. Maintenance Efficiency. Maintenance Efficiency is the percentage of assigned aircraft which are operational. The percentages shown represent the ratio of the actual operational aircraft to assigned rather than the ratio of the average operational to average assigned.

3. An improvement in the accuracy of the CPREPS over the preceding month has been noted. The claims indicate a more careful screening and evaluation by the reporting units. These reports are still unduly late in arriving at this Headquarters. In order to meet schedules, an operations report must be prepared on the day following a mission and must leave the reporting unit by regular courier not later than the second day following the mission. If this time schedule is strictly adhered to, then even with occasional transmission delays this Headquarters will be able to meet deadline set by higher echelons.

By command of Brigadier General SAVILLE:

2527

THOMAS G. KRONBERG,  
Major, Air Corps,  
Asst Adj General.

G. A. F. ACTIVITY 10 JAN.

A total of 108 enemy sorties were reported in First TACAF area on 10 Jan 45, of which 66 were actual sightings. Three encounters took place resulting in two ME 109's destroyed for a loss of 1 P-47. One ME 109 was destroyed by flak.

The lone enemy aircraft which attacked our flight of 8 P-47's of the 324th Group was of an unidentified type and the flight of 30 plus ME 109's engaged between WIESSMUEBURG and BIEHE contained some with clipped wing tips, some with rounded. Except for the lone unidentified aircraft and the jets, all avoided combat.

Jet aircraft activity: A total of 19 jet aircraft were sighted, all probably ME 262's. Seven engaged in strafing and bombing of ground forces, one apparently engaged on reconnaissance, and 1 evidently scouting for other aircraft were all operating in the general vicinity of HAGELAU. The ten seen in the area of LINDAU seemed also to be scouting but from their action their mission could not definitely be determined.

## GAF ADVERT - 14 Jan.

A total of 71 ME-109's and FW-190's plus 6 ME-262's were sighted and encountered by P-47's of 1st TACAF. A flight of 6 ME-262's flying at 25,000 feet seemed to act as top cover for 50 assorted ME-109's and FW-190's flying at 18,000 feet. This was in the area 5 miles S-W of G. S at 1535 hours. The GAF seemed more aggressive than they have been in the past 10 days, but in their tactics against our a/c seemed to make only one pass and then continue on in flight. See mission reports for E/A encounters. E/A reported by ground: 1835 hours JA fired on 1 unidentified a/c flying W vicinity of Q5454. 1835 hours estimated by multi-engine, unidentified a/c passed over Q5454 from E to W. 150 hours 1 single engine unidentified a/c flying S-E to N-W at 15454. 1855 hours 1 single engine unidentified a/c flying N-W to S-E over Q5756. 2015 hours 1 unidentified a/c dropped a flash flare at Q5557.

STATUS OF COMMUNICATIONS

RAILROADS

In the MOSELLE-RHINE triangle, rail movement from the North appears to be halted by interdiction at the line of the MOSELLE or by damage to the bridges at NONWEILER and BAD MUNSTER. Recent reconnaissance reports the bridge at BAD MUNSTER, claimed impassable following attack by the 9th Air Force, is again serviceable, but no movement was seen on the BAD KREUZNACH-HOMBURG-SAARBRUCKEN lines.

One bridge over the RHINE at MAINZ was seen to be out, but the remaining rail bridges between COBLENZ and KARLSRUHE are serviceable, having RHINE crossings uninterdicted.

Rail cuts claimed by fighter bombers on the 13th and 14th January have rendered u/s the North-South line from BINGEN to NEUSTADT as well as the East-West line between LANDAU and FIRMASENS. Movement into the area by rail as far West as a North-South line, NEUSTADT-LANDAU is probably possible and rail heads may well be functioning between these points and the RHINE. Shuttle traffic between BAD MUNSTER and the HOMBURG-ZWIEBRUCKEN-NEUNKIRCHEN area may be possible.

In the STRASBOURG-COLMAR-BLACK FOREST area the cuts claimed by fighter bombers in the past few days are believed to have achieved only short time interdictions and all lines are probably serviceable. While current supplies are apparently being moved into the COLMAR pocket by rail at the rate of one or two trains daily. The bulk of troop movements are believed to be from rail heads East of the RHINE between OFFENBURG and FREIBURG. The considerable movement in this area during the past few days is believed to be largely in connection with replacement or relief of exhausted units, although some reinforcements may be involved.

ROADS

The indications of M/T movement in the vicinity of FIRMASENS and between FIRMASENS and LANDAU are probably connected with known supply installations, although the possibility of troop movements in this area should not be overlooked.

One small boat crossing Rhine going East at R160125. 30 box-cars HAMBURG M/Y; 20 plus RR cars in M/Y L586613. 4 trains box-cars each. 2 trains 30 flat cars each Q906723. Main road PIRLSHEIM to LANDAU appears to have been in use, no traffic. Possible supply dump, 1 shaped blage R360266, 1 blage at R320399 possible dump. 5 large camouflaged huts under white nets in open field on hill believed to be Q950645. 3 heavy flak guns along RR Q740725. 75 Box-cars, snow on top, M/Y Q9075.

STATUS OF COMMUNICATIONS

In the RHINE MOSELLE triangle rail movement to the South West from QUELINZ is believed possible, with the restoration of the SIEGEN Rail bridge, as far as MOSELLE bridge, which, although repair activity is observed, is still unserviceable. South East on the West bank of the Rhine at least as far South as LANDAU and GEMERSHEIM, (a cut on the GEMERSHEIM line by Fighter-Bombers will probably temporarily prevent traffic South beyond this point) traffic is possible in the general North and South direction as well as across the Rhine where most of the bridges are still serviceable in spite of recent bombings.

Examination of photos taken 14 Jan reveals the Northern-most BAD MINTSTER rail bridge is virtually destroyed and will prevent traffic South from BAD KREUZBACH to KANIKIRCHEN, HAMBURG, KAISERLAUTERN. Fighter Bombers collapsed the ends of a tunnel on the KAISERLAUTERN NEUSTADT line preventing restoration of a direct route for another few days.

CONFIDENTIAL

C O N F I D E N T I A L

Four tail cuts in the ZWIEBRUCKEN LANDAU line yesterday just East of THLEIS-CHWEILLER junction and two today West of LANDAU should keep that line interrupted for another day.

The M/Y's in this triangle show no great activity. 200 Box-cars were seen in M/Y at ZWIEBRUCKEN 100 Box-cars at HOMBURG, SAAR (which is fully servicable with moderate activity although the local shed is 50% unservicable) but lines are unservicable from there to ALSTADT and HOMBURG ( SAAR ALSTADT ).

200 Box-cars were observed in NEUNKIRCHEN (occupied 75% by unservicable equipment). M/Y at ALEY (no movement seen) and ZWIEBRUCKEN more  $\frac{1}{2}$  full. EISENROSEN  $\frac{3}{4}$  full and NEUSTADT contained 170 R/Load cars.

No movement was observed near rail bridge at GIESE SHIM but 100 Box-cars were seen between nearby SCHLESSELSSTADT and SPYER and 100 Box-cars in FRANK-ENTHAL ( 15 - 20% loading activity). In the entire triangle rail movement has been very limited which may mean that a large part of the enemy traffic has been forced by the recent interdictions onto the highways, as reconnaissance reveals all roads worn clear of snow. Not much M/T activity has been noted during day time but evidently the bulk of such movement is being conducted under cover of darkness.

The rail yds and rail roads on the Eastern side of the river are active. KARLSRUHE, SEUFERT, VILLINGEN and the entire BLACK FOREST network was perhaps more active than usual, though not really heavy.

The direct hit on the AASTATT rail bridge by medium bombers should interfere with traffic from the KARLSRUHE area South to the Eastern side of the Black Forest.

GAF ACTIVITY- 17 Jan.

Reported by 64th Fighter Wing: At 2205 on 17 Jan an unknown number of enemy para-troopers dressed in US ARMY uniforms were reported to have been dropped 12 miles N-E of LUREUIL-KOC. 3 enemy paratroopers were captured and one was killed. It is believed that there were more than 4 men dropped in the area. An aircraft was heard overhead at the time the Germans were captured.

Reported by Western French Ground Forces: One or two enemy aircraft landed around 170015 in the region of ROYAN. At least one enemy aircraft left at 170200. This enemy air activity seems to indicate nothing more than attempts to supply trapped German forces from the air.

Reported by Western French Air Force: One enemy aircraft was seen taking off from MEDIS airfield in ROYAN sector. Two aircraft were scrambled to meet this enemy aircraft but could not get altitude due to mist and were forced to return to base. No time was given on this report.

STATUS OF COMMUNICATIONS

No change in enemy communications status in this sector as neither this Air Force nor the 9th Air Force operated during the day. The 9th Air Force operations on Night 16/17 did not change the status.

No GAF sightings 18 Jan. Reports over radio: 1543-1610 - Recce a/c STRASSBURG.  
1736-1744 - a/c landing STUTTGART.

## STATUS OF COMMUNICATIONS

The past ~~4~~ days of bad weather prevented flying in the 7th Army sector and has given the enemy time to repair the recent rail cuts and restore traffic on the E-W lines between KAISERSLAUTERN and MAINHEIM or SPEYER and NUREMBERG and LANDAU.

It is doubtful that the ROHNWEILER and BAD-MUNSTER bridges have been repaired, which would mean that any BINGEL-NEUSTADT traffic required shuttling.

Night fighters on the night of 16/17 Jan. observed heavy highway traffic in the vicinity of SARRBRUCKE, LEBACH, HOMBURG, NUREMBERG and ST WENDEL, confirming that a great deal of M/T activity takes place at night and indicating that those are still vital supply points for his troops in that area.

Observations of M/T activity and rail movement on 16 Jan. indicates normal supply transport by rail across the Rhine to LANDAU-NEUSTADT area and thence further West and South by M/T. Some troop movement may be taking place, but no evidence of a major shift was seen.

CONFIDENTIAL

## CONFIDENTIAL

Movement South of KARLSRUHE appears somewhat heavier than justified by normal supply requirements. A ferry is operating in the vicinity of the RASTATT Rhine rail bridge. Medium bombers attacking on the 16th may have damaged the RASTATT-MURG river rail road bridge. Strike photos do not show positive interdiction.

On the East bank of the Rhine opposite BISCHWEILER on 16 Jan. there was very heavy M/T and supply activity which may indicate a large build up in support of his bridgehead North of STRASSBURG.

Intelligence requirements:

1. Indications of repair activity or movement on BINGEN-NEUSTADT-LANDAU-FIRMASENS-NEUSTADT-KAISERSLAUTERN rail lines.
2. Indication of Bivouac areas, supply installations, troop movements, M/T or AFV parks in area KARLSRUHE-OFFENBURG.

CONFIDENTIALCOMMUNICATIONS SUMMARY

The most activity in the sector was observed opposite STRASBURG from OFFENBURG to LUDWIGSHAFEN where the M/Y was 2/3 full and 10 locos had steam up. 2 M/T were observed going N in the vicinity of HOCKELHEIM. 30 M/T were S-W of RASTATT and 10 Tanks in vicinity of FREISTATT, HDV and M/T activity in vicinity ACHEN, where 50 plus boxcars, no loco, were reported. Between FREISTATT and SPEYER 5 self-propelled barges are active as ferries.

No movement seen further north in Rhine Valley although at VILLINGEN there has been a slight but steady build up of boxcars. 40 boxcars were reported in DORACH, which is not unusual.

Rocco reveals that the SIMMERAN rail bridge in the Moselle Rhine river triangle is in which would allow traffic S-W from COBLENZ as far as KOTTWILLER where the rail bridge is believed still out, but where it might be possible to transship for points further south.

Considerable repair activity was observed in ST WENDEL M/Y which was believed 20% serviceable on the 16th.

No movement seen in SAARGEMUND, SAARLAUTER.

On the 16th Jan photo cover of KAISERSLAUTERN showed 3 cuts on all tracks on the west side of the city. Heavies attacked on the 17th, but no information is available as to result. To the east rail cuts were effected between MARVEN and LANGHEIL and LANGHEIL and ECKELBACK and HOCHSPYER and NEUSTADT as no major damage was observed it is believed the lines will be only temporally unserviceable.

No observation was reported on BAD-KONIGSBERG.

PW's report LANDAU and METZELER have been designated as detraining, entraining and rest centers. Although the M/Y at LANDAU has been temporarily out of commission, troops are detrained at LANDAU and METZELER and marched to the front. The electric trolley line between LANDAU and NEUSTADT is being used daily for military traffic.

A train of 30 plus flats loaded with crates was observed going west towards LANDAU from GERMERSHEIM consistent with recent activity in that vicinity.

 Scant heavy, V8513.  
 Intense light, V9027, and V8513.  
 Moderate light, OLLMAR, REINISACH.  
 Scant light, V7611.

/G.A.F. ACTIVITY/

A total of 5 ME109's were sighted and encountered by a unit of 1st TAF on 20 Jan. It is assumed that the above E/A were on a training flight as they were not aggressive and avoided combat. One flight of P-47's made the attack and shot down 4 of them. One P-47 which was out of ammo dived on one E/A and rather than engage, pilot of ME109 bailed out without a shot being fired.

Reports from other sources: 0910 - unidentified a/c, 1007- 1016 a/c homing area North of REINISACH. 1158-1204, A/C homing. 1219-1233 a/c homing NE of NANCY. 1657-1746, a/c homing probably landing.

/OBSERVATIONS/

At V8514 landing piers approximately 30 ft long and 30 ft apart extending from both banks. About 8 barges moored on both sides of river covered with snow at 0930 hours.

LUDWIGSHAUSEN - no locoms appeared damaged but some tracks appeared in use. No activity at air drome RE621. Snow covered runways.

Unknown type of bridge knocked out and road bridge intact at EULERSHEIM, V6715, 3 road bridges observed at V7218.

/STATUS OF COMMUNICATIONS/

Cumulative evidence from P.W. interrogation of former REINISACH employees (SHAEF summaries) indicates a steady decline in quality of rail service and a growing inability to handle even priority traffic on schedule. This situation is attributed to:

1. Scarcity of locomotives
2. Damage to vital centers particularly repair facilities, signals installations and switching equipment.
3. Shortage of personnel due to induction of experienced workers into the armed services

ROSELE - REINE Triangle

Rail movement into the eastern third of the triangle has not been appreciably restricted as evidenced by the continued activity observed however fighter bomber rail cutting may have hampered movement from the REINE river into the sector west of LAHRAU. REINISACH and necessitating the establishment of de-training points from which troops are marched to the front lines.

The recent activity in the REINISACH area, N and E of STRASSBURG was evidently the build up of reinforcements (troops and supplies) which has enabled an aggressive enemy (an estimated 10,000 troops with armor) to establish a strong salient threatening DISCHEN. A 17 Jan report states considerable troop transport moving from STRASSBURG in direction of RASTATT which may have contributed to the buildup.

S and E of STRASSBURG at LAHR ground reports indicate a new armored division is grouping. The LAHR is well served by road and rail and LAHR itself is an excellent rail head, and could be supplied from the VILLINGEN-DONAUESCHINGEN or LORRACH area.

INTELLIGENCE REQUIREMENTS

3 main areas deserve the attention of all units with emphasis on concentrations of box cars and flats direction of movement and rail heads in -

1. The rail net in the ROSELE triangle.
2. The rail net South and East of COBLENZ.
3. The communications net in the area STRASSBURG, BASLE and East to STUTTGART - TUEBLINGEN.

NOTE: During night 19/20 a German plane was obliged to land in a marsh near AUJAC, S-3 of ST JEAN ANGELY. The six passengers are dead. Among them was a Lt. Colonel of the Infantry. The plane was going to ROYAN area with mail.

GAF ACTIVITY - 21 Jan.

Reported by XII TAC: On Saar Rhine front 2 plus possible recon sorties. From 1434 to 1555 hours fighter a/c active in Stuttgart area intercepting single fortress apparently out of control. There were no contacts with c/a in this sector and no jet propelled c/a reported. Generally poor weather conditions would account for this inactivity.

STATUS OF COMMUNICATIONS

Bad weather restricted aerial observation for two days.

In the Moselle Rhine river triangle western and center areas, where the enemy front line has been quiet, rail traffic seems to have been slight, and there have been no reports of large M/T activity.

Reconnaissance of 16 Jan. reveals that the rail bridge at Kong Karthaus is unserviceable for rail traffic, but is in use as a road bridge, which may permit M/T traffic from Trier to the Saar.

The bad weather may have enabled repair of the rail cuts recently made by our fighter bombers.

In the eastern area where our sector is most active there is no report other than that the Worms rail bridge was unserviceable on 19 Jan. but under repair, and there were numerous ferries active between just south of Strassburg and Rastatt.

East of the Rhine the R/R centers of Heilbronn, Pforzheim, Mannheim and Stuttgart were attacked by heavy bombers on 20 Jan., but no results were observed.

Intelligence requirements remain the same as set forth yesterday.

#### Western French Air Force

15 Aircraft attacked a fortification at VILLON in the LA ROCHELLE area.

11 tons of G.P. bombs were dropped with good to fair results.

Claims: NIL.

Losses: NIL.

An unreported number of aircraft conducted 1 escort mission, 1 P/R mission and 1 artillery adjustment mission.

#### G.A.F.

A total of 2 F4U's and 4 P-47's were sighted by units of the First Tactical Air Force on 22 January 1945. These aircraft were in the general area of HAGELAU and LAUSANNE. They were not aggressive and no encounters resulted.

Reported by 44 Division: At 1345 hours 2 P-47's with red tails, red noses and black crosses on wings, flew over a string of vehicles at Q-653. They did not attack, but flew South and strafed LAUSANNE (Q-649). There were 2 P-47's with the same markings sighted and it is assumed the latter were flying top cover. Shortly after the strafing of LAUSANNE, 4 German marked P-47's strafed front line troops in the same locality and it is believed that the same A/C took part in this.

From other sources: 1710-1721 hours. 1 A/C bombing, probably recon. Landed in STUTTGART area. 1930 A/C airborne, probably recon.

#### STATUS of COMMUNICATIONS

In the MOSELLE-RHINE triangle, chief interest during the past 24 hours centers in the South Eastern portion where enemy ground action has been considerable. Railroad-interdiction in this area had been negligible. Photo intelligence reveals that the enemy is using approximately 40 RAILCROSS crossing including 4 rail and the remainder road, pontoon bridge and ferry crossing between MANNHEIM and just North of STRASSBURG. The rail route from MANNHEIM to the front lines East of HAGELAU is probably serviceable, although no reports of activity on this line have been obtained.

Extensive H/T traffic was observed however, MOSELLEBURG-LAUTERBURG-HATTEN

area moving in all directions. Additional I/T movement of considerable intensity was observed in the vicinity of BUCHS and 40 to 50 I/T vehicles were collected in the nearby woods.

No activity was observed at the important rail centers of LUDWIG, REUSTADT and KATZENBACH, though some rolling stock was present at all these points.

In the OFFENBURG-MANNHEIM-BOCHUM area some interdiction was reported. Rail cuts were claimed on the important OFFENBURG-MANNHEIM-BOCHUM line at a junction point 10 miles south west of OFFENBURG and a river rail bridge was damaged and temporarily blocked 5 miles north west of OFFENBURG. Road blocks were also reported at several points.

Although it seems unlikely that these attacks have accomplished any considerable interruption of traffic, the fragmentary observations which have been reported preclude an appraisal of status of communications east of the Rhine below STRASSBURG. In the same action no changes were reported with regards to the general status of enemy communications in or adjacent to the BOCHUM-MANNHEIM triangle.

Enemy air reported by ground: 4 flights of 1 ME262 each, dropped bombs at WET-  
KHUCH-BO317, in morning 23 Jan 1 soldier hurt, reported by 79 Div. At 1300 hours  
at KALTENHOUSE-BO721 batt I/A bombed twice no casualties reported by 79 Division.

Reported by I: 2 Fighter mission 0937-1044 BADEN-BADEN probably 30 plus a/c.  
1 Fighter mission 1100-1146 SAARGURTEL-ITZCH area probably 12 plus a/c, unagres-  
sive. 3 Recon missions 1147-1149 LANDAU area. 1351-1401 HAGELAN area. 1607-1624  
along 7th Army front. 60 sorties GAF along 6th AB front.

STATUS OF COMMUNICATIONSMOSELLE-RHINE TRIANGLE

Activity reported upon during the past 24 hours is confined to the southern 3rd  
of this sector. Between Neuenkirchen and Kaiserslautern a large movement south &  
S-E of M/T and some AFV was observed, an estimated 500 vehicles being involved.  
PRU of 22 Jan reports light activity in the Neuenkirchen M/T and on 23 Jan 1 train  
loaded with tanks, guns and M/T was seen.

In the area north E-E, S-E and south of Hirsch a moderate concentration of M/T  
and HDV were observed and attacked. Direction of movement of this activity is re-  
ported to be in a north and E-E direction.

Rail activity between Landau and Lingensfeld was observed moderate and several  
successful attacks were claimed in this area. Two claims involve rail cuts, the  
first on the line from Landau to Wissembourg immediately S-E of Landau, and the  
second on the line from Lingensfeld to Gernersheim, the latter cuts being claimed at  
each end of the Lingensfeld M/T. Enemy activity appears to be the result of the  
realization of our withdrawal and the need to fill the gap thus caused. The com-  
munication network appears capable of handling the needs of such movement.

STRASSBURG SOUTH TO BASLE

The rail line between Offenburg and Karsig on the Offenburg-Freiburg line  
appeared to be fairly active as did the rail lines leading into this system. It is  
significant that all locomotives were claimed damaged on the line between Frouden-  
stadt and Rastatt. The communications network in this entire area appears to be  
fully capable of handling all the needs of the enemy.

Tac/R reports that the rail bridge at Breisach, an already well defended target,  
is now camouflaged with trees.

Office of the Assistant Chief of Staff, G-2, SHAHQ, reports from a fairly reli-  
able source dated 1 Jan 1945: that Appenweier located immediately east of Strassburg  
and Rastatt are apparently continuously used for detrainning purposes.

INTELLIGENCE REQUIREMENTS

Three main areas continue to require close observation by all units for the  
character, quantity, and direction of road/rail traffic and for any abnormal concen-  
trations of vehicles and/or rolling stock. These areas are:

- 1) The road/rail not south from Strassburg to Basle and between the Rhine and a  
N-S line between Stuttgart and Tuttlingen.
- 2) The Moselle-Rhine triangle, with the emphasis on the southeastern portion.
- 3) The road/rail not north and west of the confluence of the Rhine and Moselle  
Rivers.

## GAF ACTIVITY - 24 Jan.

No GAF S/E Fighters on Saar-FRONT front daylight period 24 Jan. Five possible ME-109's or FW-190's sighted by allied F/B missions in LARSTADT area at 1445 hrs going south - no contact. Addition to GAF 23 Jan. report now reveals ME-262 activity may have reached 20 plus sorties in SCHNEPPHUTZ-WERTSBUCH-ROSLER area, bombing and strafing carried out. One ME-262 sighted at 14,000 feet in OBERGHEIM area, two black contrails.

## STATUS OF COMMUNICATIONS

## MOSELLE-RHINE TRIANGLE

The enemy is attempting to restore his rail transportation in the Western area as evidenced by repairs to the Ellor and Nonweiler bridges now reported serviceable.

In the center section the rail line from Neuenkirchen towards Bad-Munster is apparently serviceable, and there was traffic between Neuenkirchen and Kaiserslautern.

No movement was observed on the Kaiserslautern-Bad-Munster, Kaiserslautern-Houstadt, or Landau-Pirmasens-Zweibrücken lines. Further south there was much M/T activity in Bitch and vicinity.

## MANHEIM AND SOUTH TO BASLE

Very little movement was observed in the area with the exception of the Colmar pocket, scene of our present offensive, where 30 boxcars were present at the Colmar station, and much M/T and HGV traffic was observed going south towards Ensisheim.

## INTELLIGENCE REQUIREMENTS

The present situation calls for determined effort on the part of all units to observe and report on the magnitude, character and direction of enemy movements of troops, equipment and supplies in the areas of immediate significance to military operations, viz:

1. The Rhine Valley from Mannheim to Basle, and the Black Forest region.
2. The Moselle Rhine triangle with emphasis on the lower portion.

ALL OTHER UNITS STOOD DOWN DUE TO WEATHER.

WESTERN FRENCH AIR FORCES: No operations.

2/A activity: From other sources - 1344 to 1453, Recce in TRIER area. 1650 to 1722, one unidentified landing in the PFORZHEIM area.

STATUS OF COMMUNICATIONS

Weather, which has prevented attacks on enemy installations during the past 24 hours, has also prevented observation of enemy activity. Information from ground sources, however, indicates continued movement of supplies in and about the vicinity of BITCHE, while renewed activity has been reported in the TRIER area.

Photo cover of 23 January indicates sufficient damage to the BULLAY rail and road bridge to temporarily block rail traffic in all directions in the immediate area.

INTELLIGENCE REQUIREMENTS

Indications of renewed activity in the Trier area, as well as continued activity in the vicinity of Bitche, indicate the need of close observance for any signs of troop or supply concentrations in these two areas. Indications of enemy activity in the Colmar pocket would be of prime significance.

GAF ACTIVITY - 26 Jan.

Y Services: Nothing to report.

Ground services: Nothing to report.

The only a/c which was sighted were two unidentified a/c painted white, and, therefore, probably enemy aircraft. These were sighted at 1600 hours by 50th Group between COLMAR and STRASSBURG. The a/c were on the deck and going east across the Rhine. There was no encounter.

STATUS OF COMMUNICATIONSMOSELLE-RHINE TRIANGLE

The north R/R bridge at BAD-MUNSTER is believed to be still unserviceable. Tac/R reports 20 trains and much activity just west of KAISERSLAUTERN, indicating that one or both of the R-V lines through WORMS and NEUSTADT are open. A captured enemy document indicates an intention to move two S.S. Divisions from LUSKIRCHEN in the Bifel sector into the PIRMASSEN-NEUMUNSTER and LANDAU areas beginning 22 Jan. The activity west of KAISERSLAUTERN is in all probability the detraining of elements of one of these divisions. The road net in this area is exceptionally favorable for detraining and movement to the south on a broad front. The line LANDAU-ANNWEILER is also favorable for this type of operation.

RHINE VALLEY SOUTH OF KARLSRUHE

The main north-south line KARLSRUHE-BASLE is believed to be serviceable.

INTELLIGENCE REQUIREMENTS

1. Further rail movement south from BINGEN and west WORMS-KAISERSLAUTERN, MANNHEIM-NEUSTADT and SPIDER-LANDAU.
2. Indications of M/T or AFV traffic on roads in KAISERSLAUTERN-SAARBRUCKEN-BITCHE triangle.
3. Indications of road traffic south of LANDAU.
4. Indications of troop concentrations, M/T and AFV parks in wooded assembly areas and villages south of SAARBRUCKEN.

WEAF: No reports received.

## GAF ACTIVITY - 27 Jan.

No E/A activity reported for period. Reports indicate that large scale reinforcements of the GAF on the Eastern Front are being made by withdrawal of GAF units from the Western Front. So far there is no definite indication as to the number of units involved, but it may likely affect units operating against the 7th US Army Front in the FRANKFURT and STUTTGART areas.

## STATUS OF COMMUNICATIONS

No observations or reports have been received today relative to the status of communications on either the 7th US Army or the First French Army fronts. However, the indications of enemy movements as reported yesterday permit some further comment.

## MOSELLE RHINE TRIANGLE

If the activity noted yesterday West of KAISERSLAUTERN was in fact caused by the detraining of elements of the 2nd SS Division transferred from KESKIRCHEN, those elements are probably to be found at present in wooded areas and in the small villages situated at road intersections generally throughout the district Northwest of BITCHE, especially between the ZIEBROUCK-PIELARS road and the front lines.

Nothing further can be deduced regarding intended movements of the 9th SS Division reported yesterday to be headed into the LANDAU area, but it is probable that rail and road connections both West and South of Landau are in serviceable condition, permitting movements in either direction.

## RHINE VALLEY SOUTH OF KARLSRUHE

In the GOLLAR pocket, the enemy is still able to move necessary supplies and reinforcements over the main communication lines.

The main North-South line from KARLSRUHE to BASLE is believed still serviceable, with RHINE crossings open, including the road and rail bridges at BREISACH and CHALAMPE-NEUBURG.

## INTELLIGENCE REQUIREMENTS

1. Further observations of rail movements South from BIELE and West and South from DORMS, MUEHEIM, SPYER, HUNSLDT and LANDAU.
2. Indication of M/T or AFV traffic in the KAISERSLAUTERN-SAARBRUCKEN-BITCHE triangle.

STATUS OF COMMUNICATIONS

Again no observations were possible relative to the status of enemy communications on the 7th US Army or the First French Army fronts, but indications of enemy movements call for some further comment.

MOSELLE-RHINE TRIANGLE.

During the bad weather period which has prevented aerial observations, the enemy has had the opportunity to make full use of available road and rail facilities without interference from our air forces. There are indications, moreover, that the enemy's disposition has been undergoing some change. The most significant recent report relates to a possible withdrawal of one panzer division northward from the HAGENAU area.

RHINE VALLEY SOUTH OF KARLSRUHE.

No activity has been reported in the OBER area, but the enemy is presumably free to make full use of the main communication lines.

INTELLIGENCE REQUIREMENTS:

1. The serviceability of rail connections south of BIELE and east of KAISERSLAUTERN.

2. Indications of M/T and AFV traffic in the NORMS, SAARBRUCKEN, HAGENAU triangle.

CONFIDENTIALGAF ACTIVITY - 29 Jan.Reported by XII TAC:

Estimated 35 to 50 S/E fighter sorties on SAAR/RHINE Front daylight period 29 January comprising one flight of 15 plus fighters of J 53 in SPEYER area from 1050 to 1205 hours. Enemy aircraft very unaggressive, and although sighting allied fighter or bomber formations, went out of way to avoid combat. Also isolated strafing incidents, little damage reported.

4 to 6 possible Jet a/c active from GIEBELSTADT area. 2 ME-262's dropped bombs at V805500 at 1454 hours. No damage.

Remainder of enemy air activity confined to Recco, including 2 ME-109's which landed in STUTTGART/BOETTINGEN area.

Reported from other sources:

At 1230 hours 4 ME-109's strafed 8 machine guns at Q6547, flying East to West. One dropped an American fuel tank.

At 1240 hours 3 ME-109's strafed north of Wyandotte Sub Strip, destroying one L-4. AAA engaged and destroyed 1 ME-109.

STATUS OF COMMUNICATIONS

Improved weather during the day permitted extensive reconnaissance of both Army fronts, although observations were somewhat restricted in the Western portion of the US 7th Army front.

Generally speaking, there were no notable indications of either heavy concentrations or withdrawals of enemy forces.

MOSELLE-RHINE TRIANGLE

The Western portion of the triangle was generally quiet, and little significant activity was observed. Road traffic from SAARBRÜCKEN to ZWILLERBÜCKEN and FRIEDLARS was light; the autobahn N-E from KAISERSLAUTERN was snow-covered and untraveled nearly half way to MORMS, and from BAD-DÜRCKHEIM to LUDWIGSHAVEN the road was also snow-covered and bad. Roads South and East of FRIEDLARS, however, appeared well used, with traffic apparently moving chiefly South and East. Marshalling yards at KAISERSLAUTERN and KOBLENZ were fairly full, but no significant rail activity was observed.

One rail bridge at HUNSCHENHAUSEN-Q774912 was seen to be damaged, with South-bound traffic blocked, but North-bound passable.

In the South-east portion of the triangle, M/T and troops were observed, especially in the vicinity of SELZ and on the road from LUTTERBURG to LANDAU, moving chiefly towards the North. One large convoy was sighted between LANDAU and KARLSRUHE - no direction given. There were no points of congestion, however, nor other indications of a concentrated withdrawal.

RHINE VALLEY KARLSRUHE TO BASLE

No significant movements were observed either into or out of the COLMAR pocket. Bridges at CHAMPE-NUREMBURG and BREISACH were intact.

INTELLIGENCE REQUIREMENTS

1. Observations of possible entraining points for troops seen to be moving North from LAUTERBURG, namely: LANDAU, NEUSTADT, GERMERSHEIM, SPEYER, and KARLSRUHE and along the road from LANDAU to ANNEHEIM.
2. Observations of further movements in this area indicative of a continued thinning out, or possible withdrawal.
3. Indications of possible thinning out in the COLMAR pocket.

G.A.F. Activity 29/30 January

There were no visual sightings of enemy aircraft during this period. An estimated 15 plus single engined fighter aircraft comprising one flight of JG53 (German Group NO.) was in STRASBURG. KARLSRUHE area from 0930 to 1030 hrs. This report came from ground sources but there was no allied contact. Formation did not cross RHINE and appeared to have mission of free-lance patrol in line of communication area only. There was also a recon in Seventh Army area between 1545 1615 hours. There were approximately 25 sorties along southern sector of front during the 24 hour period.

STATUS OF COMMUNICATIONS

9 P/B and 7 T/R missions resulted in observations in the following areas:

1. SAARLAUTERN, KAISERSLAUTERN, HEUSTADT, LANDAU, PIRMASENS.
2. KARLSRUHE, HOFENBERG, HIEHLERON, FROZHEIM.
3. OFFENBURG, FREIBURG, COLMAR.

P/R was flown and observations were scant due to weather.

MOSELLE - RHINE 4-TRIANGLE

The Seventh Army front was generally quiet. Rail activity in the KAISERSLAUTERN, KARLSRUHE, SAARBRUCKEN triangle was chiefly observed in the yards. No rail movement was observed on the lines from SAARBRUCKEN to LANDAU or from SAARBRUCKEN to NEUSTADT.

Roads in the vicinity of SAARBRUCKEN appeared to be heavily travelled and heavy M/T traffic was observed in all directions out of LANDAU. Elsewhere in this area no unusual road activity was observed, but it has been reported that M/T traffic was increased in the Western portion, rail traffic having been interrupted by bombing.

RHINE VALLEY & KARLSRUHE to BASLE

No significant movements were observed in the RHINE VALLEY South of KARLSRUHE, but photo cover of 29 January shows rail bridges serviceable at BREISACH and NEUBURG.

XII TAC: No operations due to weather.42 BOMB WING: No operations due to weather.FR TAC: No operations due to weather.WEAF: No operations due to weather.GAF ACTIVITY -- 31 Jan.

Photographic reconnaissance of 28 January indicate repairs in progress on Kerlin Bastard air field 4 miles W-N-W of IORIENT which is still in enemy hands, indicating possible activity against the Western French Air Force from this point.

STATUS OF COMMUNICATIONS

No air observations were made today due to weather. P/R of 30 January, however, supplies important information on the status of enemy communications, and intelligence from other sources indicates possible enemy movements of the greatest significance.

MOSELLE-RHINE TRIANGLE

Evidence accumulated during the past two days indicates considerable M/T activity, especially in the S-E portion of this area: in both directions between LANDAU and WISSEMBURG on the 29th; eastward from PIRMASINS to LANDAU on the 29th; and in all directions from LANDAU on the 30th. East of the Rhine the heavy rail traffic, reported 30 January, moving eastward from KARLSRUHE to ILLINGEN and in both directions between MANNHEIM and HEILBRONN and between MANNHEIM and HOCKENHEIM is thought to bear significant relation to activity within the triangle.

RHINE VALLEY KARLSRUHE TO BASLE

Generally weakening resistance to our advances in the Colmar pocket indicates a likely withdrawal of enemy forces in this area. No large-scale traffic movements have been reported in the past two days, but P/R of 29 January reported BREISACH and NEUBURG rail bridges intact and near BREISACH 8 sections of pontoon with tug along shore ready to move into place.

INTELLIGENCE REQUIREMENTS

1. Indications of enemy withdrawals from the Colmar pocket, with especial reference to the character of traffic at all serviceable Rhine crossings.
2. Indications of armored vehicle and troop concentrations S-E of STRASBURG, and of the character of traffic both sides of the Rhine and at river crossings from STRASBURG to WORMS. Especial significance attaches to any congestion at possible entraining points in the area inclusive of LAUTERBURG, WISSEMURG, ANNEWILLER, LANDAU, NEUSTADT, SPEYER and GERMERSHEIM.
3. Observations of road-rail activity and troop or vehicle concentrations in the PIRMASINS-NEUMKIRCHEN-KAISERSLAUTERN area.

Both P-47 and P-51 fighters of the First Tactical Air Force today hammered at Germany's dwindling air force, in nine attacks on seven Luftwaffe airfields.

More than 70 aircraft were claimed as destroyed and 100 damaged by General Henry H. Hapgood's First Tactical Air Command P-47's alone, on the basis of incomplete reports. The air force, in P-47's alone, were credited with the interception of 100 aircraft, but only 10 were hit. They covered the battle area at the same time, as the P-47's, 10 miles southeast of Jm, with 50 tons of fragmentation bombs. The French-flown fighters were first the fighters of the Luftwaffe.

The same fighters were hit by American P-47's, and in addition they hit others at Ingolstadt, Ulf, Rhingen, 10 miles SE of Jm; Klet, just east of Munich, Augsburg, and Warburg, 10 miles northeast of Munich.

The 11th Tactical Thunderbolts also attacked the railway yard, and at Ebenhausen, 10 miles south of Ingolstadt, and at Stadelheim, 10 miles SE of Jm. In these attacks on transportation, 155 rail cars were destroyed and 219 were damaged.

A number of close cooperation missions were flown against objectives in the Seventh Army area and 110 defended buildings were destroyed and 25 were damaged.

American-flown B-26 Marauders today attacked an ammo dump in Ingolstadt. Four missions successfully attacked built up areas of the target which is an important ammo dump serving enemy forces in SW Germany.

Huge explosions with smoke rising to 10,000 feet were set off. Explosions were still continuing when the Marauders were 40 miles away on the return trip. S/Sgt Glen T. Ludy, tail gunner from Haynesburg, Ohio said, "The first explosion sent flame up to 4000 feet and the smoke skyrocketed until it was as high as we were. Fifteen minutes later I looked back and saw at least 3 3 pillars of smoke as high as the first one."

One B-26 Marauder with more than 1,000 hours of combat flight flew its 150th mission today, leading the Ugly Duckling Squadron of the Boomerang Group. The plane entered combat in June of 1943 against targets in Pantelleria. S/Sgt Fredrick W. Working, Route #1 Ligonier, Indiana, is its crew chief.

French Marauders bombed the Laupheim airdrome 12 1/2 miles Southwest of Ulm where they dropped 50 tons of frag bombs on the dispersed areas with excellent results.

There were no reports available on French First Air Corps Thunderbolts and the operations of the French Atlantic Air Command on the Atlantic Coast.

"The explosion with smoke rising to 10,000 feet were set off. Explosions were still continuing when the bombers were 17 miles away on the return trip. At 6:08 P. M., a pilot from Birmingham, Ala. said, "The first explosion sent flames to 10,000 feet in the air." The pilot also said he saw a large fireball. Fifteen minutes later another bomber reported seeing a large fireball of about 10,000 feet high."

One of the major problems in the development of a flight program for a robot is the problem of the control of the robot's motion. The robot must be able to move in a controlled manner, and this requires a system of control. The control system must be able to sense the robot's position and velocity, and to adjust its motion accordingly. This is a complex task, and it is one of the major challenges in the development of a flight program for a robot.

FIRST TACTICAL AIR FORCE HEADQUARTERS, FRANCE: Bad weather in Southern Germany hampered operations of the First Tactical Air Force, but French-flown B-26's and Thunderbolts of the XII Tactical Air Command carried out limited operations.

The Thunderbolts, flying in cloud conditions that varied from 2/10 to 10/10, flew more than 150 sorties against German transport and enemy positions in the Seventh Army area.

The Marauders attacked an ordnance depot at Neu Ulm servicing the enemy troops facing the First French Army and a supply dump at Longeschlag. Hits on buildings were reported at both targets, but no further estimate of results could be made.

1st Lt David L. Lobeck, 21-year-old 1st TACAF B-26 pilot, of 2020 Southwest 12th Ave., Miami, Fla., flew his medium bomber "King of Diamonds" home from Schussenried, Germany, with more than 100 holes caused by enemy aircraft fire. Both wings were peppered; two props had holes in them and the left engine was hit ~~hearts~~

One burst left a six-inch hole in the top turret but missed the gunner. ~~and~~ <sup>luck</sup> not a man in the crew was scratched."

Landing at his home base, with a flat left tire, the wheel burst into flame, but Lobeck guided the bomber to a stop safely and the fire was put out.

1st Lt. Herbert E. Van Keuren, a 23-year-old veteran B-26 and P-47 pilot, stopped off on his way home to 14 Nevins St., Ellenville, N. Y. today and flew with the "Boomerang" <sup>medium bomber group</sup> over Germany to complete his 101st combat mission.

As a Marauder flight leader, Van Keuren <sup>flew</sup> completed 65 missions in the Mediterranean and ETO. Then, instead of going home, he transferred to a P-47 group and flew 35 fighter missions over Germany, strafing, dive-bombing and sweeping enemy territory west and east of the Rhine.

"I don't know whether I like the fighters or bombers best," Van Keuren said. "After a few fighter missions, today's bomber trip seemed like a long ~~and~~ ride."

30

A First TACAF B-26 Marauder crew chief, Technical Sergeant Stanley F. Moody, 510 E. Cross St., Ypsilanti, Michigan, saw his medium bomber return from its 100th mission today, to become the 15th Marauder in the "Ugly Duckling" squadron to reach that mark.

For M/Sgt Donald C. Mirth, Route 1, Dunkirk, N. Y., the event was the realization of a long cherished ambition, held since he came overseas 31 months ago. For the "Ugly Duckling" flight chief, the century trip of the nameless Marauder meant that all six medium bombers in his flight have passed the 100-mission mark.

Pilot in the plane today, was John E. Guepel, 2727 Shelby St., Indianapolis, Ind., who flew his first mission as a 1st Lt.

FIRST NIGHT AIR FORCE WING, FRANCE: First Tactical Air Force medium bombers and fighter-bombers took place some 700 sorties against enemy airfields, rail yards, and strong points in Southern Germany.

American-flown B-24 Liberator of Brigadier General Glenn D. Jones' 1st Tactical Air Command concentrated particularly on rail communications and transport along the Southern sector of the Western Front, hitting yards at Imholzstet, Wiedstatt, 30 miles south of Wurzburg; Gunzenhausen, 40 miles southwest of Wurzburg; and Benningen, 50 miles southwest of Stuttgart. In these attacks, four locomotives were destroyed and 12 damaged, and 50 railroad cars were destroyed and 100 damaged.

Other fighter-bombers, flying escort for B-24 medium bombers of 1st Tactical AF, attacked airfields at Seussenheim, Leipheim and Albstissen, all in the Ulm area. Four enemy aircraft were damaged on the ground at these fields.

Escorted French and American bombers of General John P. Hoyl's medium bomb wing, flying nearly 200 sorties, dropped two tons of fragmentation bombs on airfields in southwest Germany near Ulm.

Two waves of American-flown medium bombers attacked an airbase at Seussenheim, 30 miles southwest of Ulm, blanketing the area.

The French also flying two waves, struck at an airfield 10 miles southwest of Ulm causing fires and explosions. Smoke rose to 10,000 feet, crew men said.

All the formations encountered flak, but the medium bombers suffered no losses. They met no enemy air opposition.

The first wave of American B-26's, was led by Col. Ashley E.

FIRST TACTICAL AIR FORCE HEADQUARTERS, FRANCE: French-flown B-26 Marauders of the First Tactical Air Force today attacked German pockets along the Gironde estuary for the fourth successive day without loss.

The French medium bombers flew the unescorted missions for a total of more than 120 sorties. This morning they attacked artillery positions on the Pointe de la Coubre, and they went back again in the afternoon to hit the German fort of Chateau d'Oleron on the Ile d'Oleron, an enemy strongpoint, <sup>commanding</sup> in its field of fire one of the routes by French troops in their advance toward the sea.

American-flown medium bombers today switched from the Gironde estuary targets to resume their attacks on German installations on the Southern section of the Western Front. Today's targets were two ammunition dumps in the Ansbach area, the first at Alten Lettelau, 10 miles east of Ansbach, and the second at Gunzenhausen, 10 miles southeast of Ansbach. At the first dump, the Marauders set off explosions, with smoke rising to 10,000 feet. Good results were also claimed at Gunzenhausen.

An ME-262, the first jet plane to join combat with First Tactical Air Force Marauders, was claimed as probably destroyed by Staff Sergeant Harold S. Chestnut, 1237 87th Ave., Oakland, California, a bombardier. Sgt Chestnut saw his tracers hit near the cockpit of the German plane before it rolled over and plunged toward the ground.

An ME-109 was destroyed by P-47's of General Glenn O. Barcus' XII Tactical Air Command, which furnished area cover for the American

Two more jets were claimed as "probables" and four were damaged by the P-71s.

Ten ME-109s attacked the Meinferters in the wake-off. Four of them bomb run at Alten (see below) and the others were in the attack. Two of the ME-109s were probably destroyed and two were in this encounter.

Another flight of five jets (see below) was in the wake-off. The second formation was in the attack. Two of them were probably destroyed and two were in this encounter.

The ME-109 was shot down by 1st Lt. James T. Jordan, Captain, Mississippi, 10 miles south of Alten. The ME-109 was down from 20,000 feet to 10,000 feet. Lt. Jordan's formation.

"They were on us in pairs," Lt. Jordan said. "It was the best tactics I've ever seen. I saw them to get on the tail of one and give him a squirt. It must have hit the pilot, because he spun in after the first burst."

An ME-109, believed to be the same formation plane, was also shot down by a P-47, near Neuenburg.

Other XII TAC Thunderbolts attacked rail lines at Pottlingen; Esslingen, 6 miles southeast of Stuttgart; Apfenberg, 3 miles south of Oberndorf; and Weinsingen; in addition to continuing their attacks on enemy ground positions in cooperation with U. S. Seventh Army troops.

On the basis of early reports covering approximately 375 XII TAC sorties, 37 railroad cars and 16 locomotives were destroyed and 121 railroad cars and 16 locomotives were damaged, and

Two more jets were claimed as "probables" and four were damaged by the P-7's.

Ten ME-104's attacked the Marauders as they broke off after their bomb run at Alten (L-15) and the Thunderbolts came in to the attack. Two of the enemy were probably destroyed and two damaged in this encounter.

Another flight of five jet fighters attacked a straggling Marauder after the second ammunition dump was bombed. Thunderbolts also drove these attackers off, damaging two of them.

The ME-109 was shot down by 1st Lt. James T. Jordan, Poplar, Mississippi, 10 miles south of Alten. Sixteen ME-109's came down from 20,000 feet to attack Lt. Jordan's formation.

"They came on as in pairs," Lt. Jordan said. "It was the best tactics I've ever seen them use. I managed to get on the tail of one and gave him a squirt. It was over it the pilot, because he spun in after the first burst."

American-flown P-47's of the XII Tactical Air Command, flying 240 sorties before noon today, destroyed a German ME-109, attacked enemy gun positions 3 miles east of Nurnberg, and hit a German strong point at Glaubach, 10 miles northwest of Crailsheim.

Other fighter-bombers struck at a marshalling yard at Geisingen, 30 miles east of Freiburg.

Unescorted French-flown B-26's for the fourth consecutive day, continued close cooperation attacks with French forces on the Gironde estuary, attacking enemy artillery positions in the Pointe de le Coubre.

American-flown B-26's attacked an ammunition dump near Alten Dettelshail, 10 miles east of Ansbach.

The ME-109 destroyed was shot down by XII TAC P-47's which gave them area cover.

A FIRST TACTICAL AIR FORCE B-26 MARAUDER BASE, FRANCE - American flown B-26 Marauders today added their punch to that of the French-flown mediums of the First TACAF against German positions on the Gironde estuary as the offensive against Nazi pockets in the Atlantic Coast went into its third day.

First TACAF fighter-bombers of Brigadier General Glenn C. Barnes' XII Tactical Air Command continued their attacks on German defensive and communications ahead of the American Seventh and French First Armies.

The Marauders, in one of their biggest days since they started operations in France, flew from early morning until after 8 p.m. tonight. Heavy calibre guns, entrenchment, pillboxes, and reinforced buildings were attacked with good effect.

More than 400 tons of bombs, including 500, 1,000 and 2,000 pound bombs, were dropped. The Marauders encountered neither flak nor enemy fighters and there were no losses.

On the basis of early reports covering a, approximately 400 of the more than 560 sorties flown by XII Tac Thunderbolts, 122 railroad cars and 17 locomotives were destroyed or damaged in attacks on four marshalling yards, two of them at Roulingen, 30 miles South of Stuttgart, and one each at Werbertingen, 30 miles N of Friedrichshafen, and at Ulm.

Six enemy strongpoints on and immediately beyond the frontlines in the Heilbronn - Hall sector were bombed and strafed.

**FIRST TACTICAL AIR FORCE HEADQUARTERS, FRANCE:** French-flown B-26's of the First Tactical Air Force today pounded at defensive positions along the Gironde estuary. Two waves of Marauders attacked strong points and pillboxes near Jaffe, 2 miles northeast of Royan, while an additional force dropped high explosive and fragmentation bombs on trenches, rifle pits, block houses and other defenses near Roube, one and a half miles east of St. Georges Diddone.

Eight formations of American-flown B-26 Marauders attacked enemy defenses in the Jaffe and Roube districts surrounding the city of Royan, controlling the estuary of the Gironde river north of Bordeaux. The veteran B-26 groups for the first time in more than two years of combat, flew westward to attack an objective. The defense areas were well covered with demolition and fragmentation bombs. They encountered little anti-aircraft defense, no enemy fighters and suffered no losses.

Meanwhile, P-47's of the XII Tactical Air Command, limited in activity by bad weather in the target areas, continued their attacks on enemy defensive positions and communications ahead of the U. S. Seventh Army.. Strong points in the vicinity of Loewenstein were again attacked this morning, and Unter Heiarist, a small town about three miles west of Loewenstein was left in flames.

Enemy positions at Heuchlingen, 35 miles east of Stuttgart; Heltenberg, 33 miles east of Stuttgart and Steinbach, 30 miles northeast of Stuttgart were also attacked. Steinbach is reported to be left in flames.

First TACAF ops 15 April

FIRST TACTICAL AIR FORCE HEADQUARTERS, FRANCE: French-flown B-26's of the First Tactical Air Force today pounded at offensive positions along the Cironne estuary. Two waves of raiders attacked strong points and pillboxes near Joffe, 2 miles northeast of Royan, while an additional force dropped high explosive and fragmentation bombs on trenches, field pits, bunkers and other defenses near Houde, one and a half miles south of St. Georges la Riviere.

A tight formation of American-flown B-26's attacked enemy defenses in the Joffe area. The raiders hit the city of Royan, controlling the estuary of the Cironne river north of Bordeaux. The veteran raid group, for the first time in more than two years of combat, flew westward to attack an objective. The defense areas were well covered with demolition and fragmentation bombs. They encountered little anti-aircraft defense, no enemy fighters and suffered no losses.

Meanwhile, P-47's of the XII Tactical Air Command, limited in activity by bad weather in the target area, continued their attacks on enemy defensive positions and communications lines of the U. S. Seventh Army. Strong points in the vicinity of Loewenstein were again attacked this morning, and Unter Heinriet, a small town about three miles west of Loewenstein was left in flames.

Enemy positions at Heuchlingen, 15 miles east of Stuttgart; Maltenberg, 33 miles east of Stuttgart and Steinbach, 30 miles northeast of Stuttgart were also attacked. Steinbach is reported to be left in flames.

French-flown B-26 Marauders of the First Tactical Air Force today mark their second year of combat operations with an attack on enemy positions in the Roan sector. Flying throughout the Mediterranean and European Theatres during the past year, the French firm have flown more than 3500 sorties on more than 100 missions over Italy, Southern France and Germany; and have dropped more than 6,000 tons of bombs.

The 81st Bombardment Group, is the outgrowth of an American-trained French B-26 squadron which began operations from England under a Marauder wing commander, Brigadier General Robert M. Weaver, now Major General Weaver and in the First Tactical Air Force.

Operationally, it still is guided by the American medium bomber wing, commanded now by Brigadier General John H. H. H.

Many of the aircraft in the group were veterans of the French Air Force prior to German occupation of France, and have flown through the African campaigns on the fight for Sicily to there in the course of time.

One French group, thus formed has been cited by General Eisenhower and awarded the Croix de Guerre with Palm for outstanding accomplishment during the Allied offensive in Italy last spring.

French-flown B-26 Marauders of the First Tactical Air Force today began their second year of combat operations with an attack on enemy positions in the Bayan pocket. Flying throughout the Mediterranean and Europe in the past year, the French airmen have flown more than 3500 sorties on more than 100 missions over Italy, Southern France and Germany; and have dropped more than 5,000 tons of bombs.

In 1944, the B-26 Marauders, in the outgrowth of an American-trained French unit, began operations from Sardinia under the command of General Robert L. ... General ... the First Tactical Air Force.

Operationally, it is ... by the same American medium command, ... General John H. Boyle.

Many of the airmen in the unit were members of the French Air Force prior to the occupation of France, and have either flown through the difficult ... the fight or ... there in the course of time.

One French group thus formed has been cited by General De Gaulle and awarded the Croix de Guerre with Palm for outstanding accomplishment during the Allied offensive in Italy last Spring.

1. 100-100-100

French airmen of the First Tactical Air Force were unconcerned this morning when it was announced for the first time that briefing there were almost forgotten enemy positions on the west coast of France today.

There was no reaction in the air force headquarters for a long of excited comment on the news. The air force headquarters was for target information and study of the situation. Photographs of the areas to be attacked. In spite of the fact that they were in France it was heard, another mission to them.

Airmen for the first time were not surprised to hear they were to bomb France. "It only matters that Germans are there; one of them said.

"Another word, 'In France the Germans they've got to be defeated."

An enlisted bombardier whose wife and child live in Bordeaux, and who has relatives near Bordeaux also expressed some concern. "I'd like to go," he said. "As long as the Germans are there our people live a terrorized life. If this is going to help clear the situation, my only hope is that few Frenchmen will be hurt."

As pilot, resident of Paris, added, "If there are Germans in France and they have to be bombed," well, we're fighting a war and it must be done."

All the airmen voiced concern for the French who might be in the areas under attack.

Another pilot from Bizerte, Tunis, said, "It's easy enough to hit the target, but there may be French within our target area."

14 March 1945

French airmen of the First Tactical Air Force were unconcerned this morning when it was announced for the first time at briefing they were almost forgotten enemy positions on the west coast of France today.

There was no reservation in facial expressions nor exchange of excited comment between B-26 bombardier airmen. A time consideration was for target information and study of maps and photographs of the areas to be attacked. In spite of the fact that they were bombing France it was merely another mission to them.

Airmen for the most part were non-committal though they were to bomb France. "It only matters what the Germans are doing and what they say."

"Another added, "In France and Germany they've got to be defeated."

"An enlisted bombardier whose wife and family live in Bordeaux, and who has relatives near Noyen did express some concern. "I'm glad to go," he said. "As long as the Germans are there our people live a terrorized life. If this is going to help clear the situation, my only hope is that few Frenchmen will be hurt."

As pilot, resident of Paris, added, "If there are Germans in France and they have to be bombed," well, we're fighting a war and it must be done."

All the airmen voiced concern for the French who might be in the areas under attack.

"Another pilot from Bizerte, Tunis, said, "It's easy enough to hit the target, but there may be French within our assigned area."

FIRST TACTICAL AIR FORCE HEADQUARTERS, FRANCE: Sixty enemy aircraft were destroyed and another 67 damaged yesterday (Thursday) in a continuation of the resultful attacks on German airfields that have marked the operations of Gen. Glenn O. Barcus' Twelfth Tactical Air Command P-47's this week.

Delayed by weather until mid-morning, the American Thunderbolt pilots scored heavily against the grounded Luftwaffe on nine airfields as soon as ground haze lifted. Only on a few they challenged in the air. On this one alone one ME-109 was destroyed and another damaged. Fifty-nine combat aircraft, most of them single-engine fighters, were destroyed on the ground and 67 damaged. Thirty-seven still were in a single group high stacked at the airfields of Rott, Albstadt, and Nuremberg. Other airfields held a good number of enemy aircraft were at Augsburg, Ulm, Ingolstadt, Oer, and Oettingen. Another group claimed 16 ~~taxative~~ destroyed and 18 damaged at Bayreuth.

Flying more than 150 sorties on 12 April, 111 TACAF P-47's also scored against enemy transport, claiming 76 motor transport, 37 rail cars and one locomotive, with damage to 18 other locomotives. During attacks on airfields, two hangars were destroyed and four damaged. More than 200 buildings were destroyed and four damaged. More than 200 buildings were destroyed in attacks on two small defended villages.

Medium bombers were grounded by weather.

FIRST TACTICAL AIR FORCE HEADQUARTERS, FRANCE: French and American flown medium bombers of the First Tactical Air Force, more than 200 strong, today blasted the town of Schweinfurt in the path of American Seventh Army troops, while XII Tactical Air Command P-47's attacked other towns in the same area.

In addition, the fighter-bombers attacked marshalling yards, airbases, and flew patrols deep into Germany as Munich.

American and French Mustangs in direct cooperation with advancing American Seventh Army forces today pounded the German town of Schweinfurt, 24 miles northeast of Nuremberg, striking areas reported excellent concentrations in good coverage of assigned areas in the towns.

American airmen reported explosions and fires resulting from their attacks. First wave over the town were Mustangs from the AAF's oldest medium bomber group, led by Colonel Wallace C. Barrett, group commander, of 1730 M. St., Northwest, Washington, D. C.

Bombardier, 1st Lt. Harold C. Burns, 490 Washington, Denver, Colorado, reported, "As we broke away from the target, I saw buildings burning and smoke rising to about 5000 feet, and bombs still were dropping into the area."

Flying more than 200 sorties today, the medium bombers had no losses, although they encountered from scant to intense flak over the towns. The aerial assault was preceded by artillery preparations laid down by the Army on enemy ack-ack positions.

dropped more than half a thousand high explosive demolition bombs.

Following up the mid-day attack on the enemy fortified town of Schweinfurt, Marauders of the "Boomerang" Group, led by their commanding officer, Colonel Ashley E. Woodruffe, 310 W. Market St., Philadelphia, Pa., covered their assigned area, causing additional fires and smoke, which rose to several thousand feet.

Staff Sergeant Max E. Good, bombardier, of 101 S. James St., Springfield, Pa., reported, "We knocked down our section of the town and left it smoking." The final assault on the town was carried out by 69 planes, without loss, although some flak was encountered. There was no enemy aircraft opposition.

Totals for the days operations show 200 bombs dropped in an area measuring three fourths by one mile/which covered more than 1200 high explosive demolition bombs, or some 380 tons. The entire operations were carried out without loss.

2nd Lt. Chesley E. Lightfoot, a pilot, from Chula, Cal., flying in the last flight over Schweinfurt, said, "There were bombs all over the damned place. I never saw so many."

As the Marauders hit Schweinfurt, XII Tactical Air Command P-47's dive-bombed and strafed gun positions nearby. They attacked fortified enemy positions in three small towns in the Schweinfurt vicinity, and in Rothenburg, 30 miles southeast of Nuremberg, and Beurlbach, 2 miles north of Crailsheim.

Three airdromes, at Illesheim, 30 miles west of Nuremberg, and near Munich, were strafed and 11 enemy aircraft were destroyed and four damaged.

HEADQUARTERS, FIRST TACTICAL AIR FORCE, Germany -- Three enemy aircraft were destroyed in the air and two more on the ground by XII Tactical Air Command P-47's which flew more than 360 sorties before one o'clock today.

Meanwhile, complete reports on yesterday's attacks on airdromes in the Wurzburg-Nuremburg region brought the total destroyed on the ground to ~~72~~ 72. and 77 Damaged

The three aircraft destroyed in combat this morning were members of a flight of Me 109's which attacked the American Thunderbolts near Anabach, approximately 25 miles Southwest of Nuremburg. The other two were destroyed by strafing on the airdrome at Heilbronn.

Two bombing and strafing attacks were made on the frontline town of Neiderstetten, 28 miles south of Wurzburg and 15 buildings were destroyed there, and the marshalling yard at Bamberg was attacked.

Forty railroad cars and three locomotive were destroyed in this and other attacks on German transport.

MARSHALLING YARDS, AIRDROMES ATTACKED: 29 PLANES

DESTROYED AND 47 DAMAGED BY FIRST TAC AF

FIRST TACTICAL AIR FORCE HQ., France, April 8:— Fighter-bombers and medium bombers of the First Tactical Air Force today flew approximately 900 sorties, striking repeatedly at marshalling yards, airdromes and enemy strong points ahead of the Sixth Army Group's most forward positions.

Twelfth Tactical Air Command P-47s struck at five marshalling yards in the Muenburg area, knocking out 33 locomotives and damaging 45 and destroying 177 railcars and damaging 472.

Other Thunderbolts destroyed 29 enemy aircraft, accounted for two probables and damaged 45 in attacks on eight different airdromes, also in the Muenburg area.

At Wassertrudingen, 25 miles southwest of Muenburg, pilots of the 324th Fighter Group, commanded by Col. Leonard C. Lydon of Stuart, Iowa, reported seeing the "biggest explosions we've ever seen." While attacking a marshalling yard there they hit a storage building and the explosion sent flames 4000 feet into the air and smoke to 7000 feet.

Another group of fighter-bombers hit enemy strong points in the Heilbronn area, in close co-operation with the Sixth Army Group troops; 122 buildings were destroyed and 85 damaged in the towns of Neckarsulm, Degmarn, Kockerturn and Sindringen, all in an area from three to 15 miles north of Heilbronn.

For the second time in three days American B-26s attacked ammunition storage areas at Klein-Engstingen, 30 miles south of Stuttgart. Hitting in four waves in less than two hours, medium bomber crews reported excellent bomb patterns in two areas measuring approximately 1800 by 2000 feet. The bomb strikes caused fires and explosions, and sent columns of smoke rising as high as 8000 feet.

French medium bomber crews reported that their high explosives caused seven columns of black smoke to rise from their oil storage targets.

American mediums were escorted by P-47s and although they encountered light attack suffered no losses.

For the second time in 3 days, the American B-26 Marauders attacked ammunition storage areas at Klein-Engstingen 30 miles south of Stuttgart. First crews to land after the attack reported fires and severe concussions.

The French-flown Marauders attacked oil stores 34 miles southeast of Stuttgart, near Geislingen.

~~First Tactical Air Force fighters~~ American P-47 Thunderbolts of the First Tactical Air Force, flying more than 125 sorties before noon today, bombed and strafed airbases and marshalling yards in the Nuremberg area.

At Vassertrodingen, 25 miles southwest of Nuremberg, pilots of the veteran 324th Fighter Group, commanded by Col. Leonard C. Lyon, of Stuart, Iowa, reported hitting a marshalling yard, and exploding a building which sent flames shooting 2000 feet into the air and smoke to 7000 feet. The explosion left a crater 100 feet wide and 20 feet deep. Another marshalling yard was attacked at Bamberg, 50 miles north of Nuremberg.

Two airbases were attacked by the fighters--at Veitsronn, 8 miles northwest of Nuremberg, and at Heilbronn. Four Ju-88's were destroyed on the ground at Veitsronn, two probables were accounted for, and 8 were damaged--all on the ground. At Heilbronn, no Ju-88's were destroyed and 2 damaged. ~~xxxxxxx~~ A tunnel was also destroyed at Heilbronn in the same attack.

~~xxxxxxx~~ A troop concentration at Cappel, 7 miles north of Heilbronn, was ~~attacked~~.

Claims for the early part of the day were:

Two formations of 20 ME-109's each -- largest force the fuel-starved Luftwaffe has put up ~~XXXXXXXXXX~~ ~~XXXX~~ against the First Tactical Air Force in weeks -- were engaged by 1st TAC AF P-47 Thunderbolts this afternoon, and two of the enemy were shot down without loss of ~~any~~ <sup>an</sup> American plane.

The P-47's, all of them American flown XII Tactical Air Command aircraft, were limited to slightly more than 300 sorties today, after being grounded by weather until mid-afternoon.

Most of the ~~xxxx~~ day's operations were concentrated on and near the town of Gochheim, 10 miles north of Heilbronn. Enemy strong points in the town were hit, and 10 buildings were destroyed; the Gochheim airfield was ~~being~~ attacked, and ~~an~~ <sup>an</sup> unidentified twin-engined plane was ~~destroyed~~ <sup>probably destroyed</sup>, and a hangar damaged.

The battle between the 40 Messerschmitts and eight P-47's, all members of the veteran Invader group, also took place over Gochheim ~~after the Thunderbolts~~ as the Thunderbolts were returning from an armed reconnaissance mission.

"The ME-109's were flying ~~XXXXXXXXXXXX~~ low, level with us, at about 500 feet," said 1st Lt. Henry Augerter Jr, Wenebec, Wisc., who got one of the enemy planes.

"They made one head-on pass, then all broke off into the clouds."

Regenter and 1st Lt. Marion L. Green, Lone Tree, Iowa, the other pilot to score a victory, got theirs in almost identical manner.

In both cases the Messerschmitts broke off right after the first pass; ducked into the clouds. Green and Regenter each followed his man into the clouds and fired at about 50 yards, in an open space in the clouds. Both ~~planes~~ ME-109's came to rest, crashed and exploded.

Because of the bad flying conditions, no claims were made except the 10 buildings destroyed, the 100 planes shot down, the plane probably destroyed on the ground and the engine damaged.

There were no losses during the day.

In spite of cloudy weather which made observation of results difficult, fighter bombers and medium bombers of the First Tactical Air Force today carried out more than 450 sorties, as they continued their assault on enemy strong points, communications, supplies and airfields ahead of the Sixth Army Group's troops.

B-26 Marauders flown by American crews struck at a big ammunition dump at Gailenkirchen, 21 miles east of Heilbronn. They bombed by instrument and there was no observation of results. Escorted by P-47 Thunderbolts of the XII Tactical Air Command, they encountered no flak or fighters, and all returned safely. The Gailenkirchen dump is a major enemy storage installations, covering an area 3,000 feet by 800.

Other XII TAC P-47's attacked defensive positions, troop concentrations and communications in the towns of Ellwangen, 42 miles east of Stuttgart; Gollhofen, 20 miles southeast of Wurzburg; Loewenstein, seven miles east of Heilbronn, and Hall, 23 miles east of Heilbronn.

An airfield at Illesheim, 30 miles west of Nuremberg, was hit by the fighter bombers and they destroyed three ME-109's and damaged nine-- the only aircraft on the field.

Three marshalling yards in the outskirts of Stuttgart were hit, and more than 400 rail cars were disabled or damaged.

French-manned aircraft of the First Tactical Air Force yesterday had their most active day to date, flying more than 1,000 450 fighter, fighter-bomber and medium bomber sorties in cooperation with the French First Army and against German resistance areas on the French Atlantic coast.

B-26 Marauder medium bombers attacked an oil storage depot at Geislingen, 13 miles north of Ulm. Escorted by French First Air Corps P-47 Thunderbolts, they encountered no enemy opposition. The Geislingen depot contained ~~one~~ <sup>QUANTITIES</sup> of the Germans dwindling fuel supply needed for any troops opposing the French Army's progress.

Thunderbolt fighter-bombers of the French First Air Corps flew air cooperation missions with the French ground forces and the U. S. Seventh Army, bombing and strafing many defended villages in the Heilbronn-Stuttgart-Pforzheim area, destroying 132 fortified buildings and damaging 12. One French group alone destroyed 89 buildings.

Meanwhile French First Air Corps Spitfires, and P-47's flying as fighters, ~~Spitfires~~ carried out effective strafing operations against railways and motor transport in the same general area. The Corse, Nice and Champagne Spitfire squadrons (groupes, according to French nomenclature) damaged 100 railway cars with their machine-guns.

Bombers of the French Atlantic Air Command attacked a fuel dump at Talais, in the Pointe de Grave sector, and pilots reported a huge explosion. Missions against enemy strong points in the Royan area also were flown.

FIRST TACTICAL AIR FORCE HEADQUARTERS, FRANCE: French and American B-26 Marauders of the First Tactical Air Force struck today at the ammunition and fuel supplies of German troops facing the U.S. Seventh and the French First Armies, while P-47 Thunderbolts flown by American and French pilots carried out a series of attacks against troop concentrations and communications just ahead of the fighting lines, and against five German airfields farther east.

More than 800 sorties were carried out during the day, although the weather was cloudy much of the time. In the attacks on the airmen, 14 enemy planes were destroyed, 12 were probably destroyed and 19 were damaged, but not a single enemy plane rose to meet the First TAC AF planes. There were no losses.

Three waves of American-flown B-26 Marauders successfully attacked an ammunition storage area at Klein Engstingen, 28 miles southeast of Stuttgart, while the French mediums struck at an oil storage depot near Geislingen, 13 miles northwest of Ulm. Both installations contained large quantities of supplies needed for any forces opposing the U.S. Seventh and French First Armies. The French and American bombers carried out well over 125 sorties, without incident or loss. XII Tactical Air Command P-47's provided escort.

Many fires and explosions were started at Klein Engstingen ammunition stores, which cover a wide area and are made up of more than 100 buildings. Crews in the final wave reported explosions

which rocked their planes at 10,000 feet, and smoke which rose to the level of the bombers.

Because of cloud cover, the second wave of U.S. Raiders had to make four runs over the target before releasing the bombs.

"When we broke from the last run after letting them go, there was a big explosion that shook the whole ship," said the lead bombardier of the second formation, 1st Lt. Delia Thomas, 1817 Warren Avenue, Seattle, Wash. "The bomb pattern was flowering out like a geranium."

Sgt. Raymond H. Sheehy, 3112 East 41st Street, Chicago, reported that "After our bombs hit the target the explosions below bounced as around like flak."

P-47's of the XII Tactical Air Command had one of their most successful days against grounded German aircraft, locating German airfields at Ansbach, 43 miles west of Nuremberg; Weil, 22 miles east of Reilbronn; Oralsheim, 37 miles east of Reilbronn; a fourth 12 miles west of Nuremberg and a fifth three miles west of Augsburg. Eleven JU-88's were destroyed at Ansbach by pilots of the group led by Col. Harvey L. Case, Jr., 5717 Sherman St., Houston, Tex. The airman said that the planes were camouflaged with nets, and they reported no activity on the fields. On the same field four other JU-88's were probably destroyed and nine damaged. At the other German bases, two ME-62's and an unidentified twin-engined plane were destroyed; a ME-109's, an Hk-111 and an FW-190 were probably destroyed; five FW-190's and five ME-109's were damaged.

Seven frontline towns, just ahead of the Seventh Army's most forward positions, were hit repeatedly by the XII Tactical Air Command's P-47's, and two attacks were delivered against the city of Heilbronn. In one of them a gasoline fire apparently was set off, and the whole town was enveloped in flames.

Other Thunderbolts attacked road and rail transport, all of which was reported moving east, in an area bounded by Karlsruhe, Nuremberg and Stuttgart.

Complete reports had not been received tonight on operations of the French First Air Corps, but one Thunderbolt group, concentrating almost entirely on close cooperation missions in the Heilbronn-Stuttgart-Pforzheim area, flew 92 sorties, destroying 89 buildings and causing many fires in a number of small towns which serve as communications centers or which have been fortified to resist the Allied advance. At Stenbach, 12 miles west of Heilbronn, an enemy barracks area was bombed and strafed, and four buildings were destroyed. Troop concentrations and communications in the towns of Lauffen, four miles south of Heilbronn; Dusingen, four miles northeast of Stuttgart; Dietlingen, three miles west of Pforzheim, and Motingen, six miles northwest of Pforzheim also were attacked. This French group also made the following claims: four anti-aircraft guns silenced, four motor transports destroyed and four damaged; one gun position knocked out and three damaged; one road blocked at an intersection. This group suffered no loss.

FIRST TACTICAL AIR FORCE HEADQUARTERS, April 14-1947  
Thunderbolts of the First Tactical Air Force today carried out widespread and heavy attacks against communications, troop concentrations, and German defensive positions in a wide area bounded by Bamberg, Nuremberg and Heilbronn, and roughly circling the Wehrmacht Army's easternmost thrust.

In spite of weather which was cloudy during part of the day and made observation difficult, all aircraft of First TACF completed more than 700 sorties, all carried out without loss. Eight jet-powered planes were encountered, and two of the enemy fighters, one probably destroyed and one damaged. One of the planes destroyed was a Messerschmitt, first to be seen by First TACF pilots.

Bombing, rocket-firing and strafing attacks were continued by XII Tactical Air Command B-24's against troops and communications in the towns of Schweinfurt, Rosenheim (10 miles southeast of Nuremberg), Herstruch (10 miles northeast of Nuremberg), Markst-kt (10 miles southeast of Nuremberg), Jandeln (eight miles north of Heilbronn), Offenheim (23 miles southeast of Nuremberg), and Grailsheim (27 miles east of Heilbronn). An airfield at Leipsheim, 10 miles northeast of Ulm, was attacked, and three buildings were destroyed there. Pilots saw no planes on the field.

At Schweinfurt, the marshalling yards were attacked and much rolling stock was disabled and damaged. At Grailsheim, pilots said seven city blocks were ablaze.

Meanwhile a small force of B-26 Marauders of First TAC AF, manned by American crews, bombed enemy defenses in Uffenheim, 18 miles southeast of Uffenburg, in direct cooperation with ground forces of the Sixth Army Group, heading south towards Ensbach and Nuremberg. Results of the attack, directed against the northwest part of the city, could not be observed because of clouds which almost entirely obscured the targets. Neither enemy aircraft nor flak were encountered.

The only enemy aircraft sighted during the day were jet-propelled fighters-- seven Me-262's and one Arado 234-- and of these two were destroyed, one was probably destroyed, and one damaged, in four separate battles. The American pilots suffered no loss in these encounters.

The ME-262 as it was about to take off from an airfield at Memmingen, 30 miles south of Ulm. First Lt. Andrew N. Kandis, 806 Detroit Street, La Porte, Ind., saw the jet with two others low over the field, and dove down on him.

"I gave him one long burst, raking from nose to tail," said Lt. Kandis. "He went into a spin, and tried to land. But he was already a sheet of flame before he hit the field. The pilot didn't get out."

Another ME-262 was damaged over the same field by 1st Lt. Ryland T. Dewey, 1265 Detroit Street, Denver, Colo.

The first Arado 234 to be shot down, or even seen by a pilot of the First TAC AF was credited to 1st Lt. Mortimer J. Thompson,

5246 North Diversey Boulevard, Milwaukee, Wis. It was the first time in 111 missions that Lt. Thompson had had a chance to fire his guns at an enemy plane.

"We were at 12,000 feet, he was 2,000 below us," Thompson said. "We were going in opposite directions. I led three other F-47's down on him, making a 180 degree turn. He ducked into a cloud bank, and we lost him for a few minutes. When I saw him again he was in a glide. He turned on his power as soon as he saw me, but I had already got in one burst, broadside. Another two-second burst and he exploded. I saw his chute open, but I don't know whether he bailed out or was blown out. The plane crashed."

The battle took place over Augsburg.

The Arado 234 is one of the newest German jet-propelled planes. It is a heavily-armed, twin-turbined fighter, also used for bombing.

3 APR 1945

MAILED FOR FILE

The town of Aschaffenburg, where several thousand German soldiers and armed civilians are bitterly contesting the 45th Division's advance, has been hit in the past six days by 29 separate formations of dive-bombing, strafing and shell-firing P-47 Thunderbolts of the First Tactical Air Force, it was revealed today.

Ground controllers, and infantrymen actually fighting for the positions the fighter-bombing have been blasting, have repeatedly praised the accuracy of the bombing and now declare that the town, all except for the northeasternmost corner, has been virtually leveled.

In these 29 attacks, which have gradually become concentrated entirely in this northeast corner, 232 planes have taken part. Eighty-two ~~plan~~ tons of bombs have been dropped and 114 rockets launched against objectives in Aschaffenburg.

The P-47's, all of the American XII Tactical Air Command, have definitely destroyed 120 buildings in the town, although pilots were hesitant to make claims because of occasionally bad weather and because of the smoke and dust rising from the battered town. On five of the six days attacks were made on Aschaffenburg, and on each of these days large fires were started. Columns of smoke up to 4000 feet were observed yesterday. Incendiaries, as well as 500-pound general purpose bombs and fragmentation bombs were used, but approximately 50 of the 82 tons were general purpose.

A castle in the town's northeast corner, believed to be a German command post, has been attacked twice by rocket-firing P-47's --

FIRST TACTICAL AIR FORCE HEADQUARTERS, FRANCE: American P-47 Thunderbolts of the First Tactical Air Force, flying more than 140 sorties before noon today, bombed and strafed railway targets in the Stuttgart area.

Five jet-propelled German planes-- and Arado 234 and a ME-262-- tried to hamper the American fighter-bombers, but no losses were suffered, and the Arado was destroyed and one ME-262 was probably destroyed. The kills were made in battle over Augsburg and Stuttgart.

The Arado 234 is one of the newest of German aircraft, and today's victim was the first to be shot down by First Tactical Air Force planes. It is a heavily-armed, twin-turbined fighter, also used for bombing.

A marshalling yard at Schweinfurt was attacked.

Claims for the early part of the day were:

FIRST TACTICAL AIR FORCE HEADQUARTERS, FRANCE- Openings in the clouds late this afternoon permitted P-47 Thunderbolts of the First Tactical Air Force to fly slightly more than 100 sorties, attacking frontline towns and railway lines farther ahead of the U.S. Seventh and French First Armies.

There was no enemy air opposition.

The towns of Stanbach and Sackenbach, both on the Main and some 14 miles east of Aschaffenburg, were bombed, in order to silence artillery fire reported coming from fortifications there. After the attack the controllers reported the enemy fire had stopped.

The XII Tactical Air Command P-47's also struck at the eastern outskirts of the city of Furzburg, destroying a tank. They said that as they dropped down to release their bombs they observed Allied troops moving into the western side of the city.

Marshalling yards at Bamfurt, northeast of Furzburg, and Jagstheim, 40 miles northeast of Stuttgart, also were bombed.

Summary, as yet incomplete, follows:

FIRST TACTICAL AIR FORCE HEADQUARTERS, FRANCE: American-flown B-26 Marauders attacked enemy supply, maintenance and barracks installations in the Stuttgart area, and at Noblingen, 10 miles southwest of Stuttgart. The mediums bombed similar targets yesterday.

Two Marauder formations struck at motor transport work shops used for servicing and repairing enemy transport and armored vehicles. Crews of both formations reported clouds prevented accurate observation, but believed all bombs fell in the assigned target areas and that many of the buildings were destroyed or damaged.

At Tübingen, 18 miles southwest of Stuttgart, other Marauders bombed a group of 10 camouflaged two-story brick buildings employed for ammunition storage and known as the Hindenburg barracks.

Escorted by XII Tactical Air Command P-47s, the mediums, flying five missions for 80 sorties, encountered slight flak, but suffered no losses.

P-47 Thunderbolts of the First Tactical Air Force hampered by cloudy weather today flew more than <sup>400</sup> 300 sorties against enemy strong points, marshalling yards and buildings in the Stuttgart area, ahead of the Third and Seventh Armies.

The XII Tactical Air Command fighter-bombers returned for the third successive day to Aschaffenburg, where street fighting was reported still going on, destroying 23 fortified buildings and damaging four. A castle believed to house German troops was attacked with rockets.

An armed recon of 8 planes of the veteran "Invader" group, led by 1st Lt. John C. Weiner, 1225 16th Avenue, San Francisco, Calif., struck at Hall, 24 miles east of Heilbronn. The first flight dropped their bombs on an ammunition dump north of Hall, scoring 3 hits and the dump exploded with such force that 3 nearby buildings were also demolished. The second flight, noting a train of 25 cars moving out of Hall scored 3 hits, and in four strafing passes destroyed 6 cars and damaged 19.

Lt. Weiner and his flight then strafed a nearby airfield where 14 enemy planes were parked. They damaged three ME-262's and two ME-210's.

Enemy strong points at Gottingen, ahead of Third Army troops, and Eppingen, 11 miles east of Bruchsal were hit. At Eppingen, frag bombs destroyed 20 buildings, and left fires that were still burning an hour later.

Other Thunderbolts struck at an ammunition dump 10 miles east of Heilbronn, destroying 12 huts and 4 factory buildings, and damaging 11 huts and 2 buildings.

2 April 45

American fighter-bombers of the First Tactical Air Force carried out 200 sorties before noon today, returning to Aeschaffenburg, where heavy street fighting was reported still going on, ~~with two dive-bombing attacks, destroying 23 fortified buildings and damaging four. Another ground cooperation attack was delivered against positions in Eppingen, 24 miles east of Karlsruhe and ahead of the French First Army's forces.~~

F-47 Thunderbolts of the 12th Tactical Air Command which bombed marshalling yards at Tübingen, 17 miles south of Stuttgart; Bargheim, eight miles east of Neuburg on the Ulm-Stuttgart railway; Aalen, 30 miles north of Stuttgart and on a line leading west to Stuttgart, and Nordlingen, on the same line, 17 miles east of Aalen, made the following scores: four locomotives disabled, 23 damaged; 41 railway cars disabled, 129 ~~damaged~~ damaged.

Other claims for the early part of the day included:

1 April ops

FIRST TACTICAL AIR FORCE HEADQUARTERS, FRANCE: P-47 Thunderbolts of the First Tactical Air Force today delivered heavy blows at enemy strong points, gun positions and fortified buildings where German troops were impeding progress of the Third and Seventh Armies. They struck at Aachenburg, in the immediate battle zone, and at Koenigshofen, some 50 miles deeper into Germany.

Medium-bombers, attacking supply and barracks areas near Stuttgart, led by more than 100 bombers to force of XII Tactical Air Command's P-47's, in being first TAC's P-47's to close to 1000, in spite of intermittently cloudy weather.

More than 100 heavy bombers P-47's and medium-bombers shelled barracks and supply areas in the Stuttgart area, ahead of the advancing U. S. Seventh and French First Armies with incendiaries and high explosives. Good patterns of bombs were reported by the observer, with many fires and explosions resulting. No enemy aircraft were encountered, and although the targets were strongly defended by anti-aircraft fire, none of the mediums is missing.

The specific targets were a barracks area and supply depot at Vaihingen, five miles southwest of Stuttgart, and a supply depot at Ludwigsberg, eight miles north of Stuttgart. Two waves attacked Vaihingen, and a third struck at the Ludwigsberg objectives. In each case a small formation of Corsairs went ahead of the main waves, to bomb flak positions defending the targets. P-47's of the XII Tactical Air Command provided escort.

"I saw our bombs striking in the target areas, and many buildings were hit," said 1st Lt. Harry E. Collins, 412 Forest St., Kalamazoo, Michigan, lead bombardier who flew in the mission against Wehringen. "Our incendiaries started plenty of fires, and when I looked back smoke was rising up to 2000 feet."

A summary of the day's operations, based on early reports and not including operations of the French First Air Corps, follows:

SCOTTS: Nearly 1000.

Two combat men who don't believe in giving flak a half a chance were Sgt. Eugene K. Grady, a photographer, from 22 Caplewood Drive, Tuscaloosa, Ala., and Staff Sergeant Lawrence M. Olson, Tompkins Station, St. Paul, Minnesota, an armorer-gunner.

In an attack on an enemy barracks and depot area at Wehringen today, flak bursts entered the waist window of their B-26 and bounced off Sgt. Olson's helmet without injuring him. Another came through the open bombays and fragments sprayed Sgt. Grady without causing him any injury.

When they returned to base, they both made a search throughout the plane to count flak holes but couldn't find any. They finally came to the realization that the flak they encountered had come only through the open window and bombay.

When "Starduster", a First TAC AF B-26 Marauder, was assigned to the Army Air Force's oldest medium bomb group in February of 1944, "Sally" of the Axis, Hitler's gift to radio, is reported to have welcomed the group's first silver medium bomber with the announcement that she was going to take the Marauder as her pet, and that she wanted no harm to come to it.

If that report is true, then Sally should be very pleased today. Her pet has just completed its 101st mission in an attack over an enemy supply depot near Ludwigsberg, Germany.

"Starduster", who was flown on her 101st mission by 1st Lt. Kenneth E. Koza, 1427 Sherwin Ave., Chicago, Ill., and also the favorite medium bomber of Technical Sergeant Lyndall E. Mattlock, Antelope, Texas, her crew chief. Sgt Mattlock doesn't put much faith in Sally's protective power, he said. His Marauder has been shot up too many times.

From two missions, "Starduster" limped back to her base with but a single engine and once with a control cable shot in two. Sgt. Mattlock drolled, "I just think it's a hell of a good plane. I gave her a complete going over just before her 100th mission and I'll fly with her anytime."

The veteran medium bomber entered combat in the Mediterranean theater and participated throughout the Italian and Southern France campaigns prior to entering combat in the ETO.

The First Tactical Air Force in March had the most effective and active month in its history, flying more than 21,000 sorties in coordination with the Seventh Army's clearing of the southern Saar, and the Seventh and French First Armies' push across the Rhine.

Of these the majority -- over 19,000 -- were flown by the fighters, fighter-bombers and reconnaissance planes of the XII Tactical Air Command and the French First Air Corps. These were divided into approximately 4000 for the French fliers and nearly 15,00 for the Americans. The remainder of First TAC AF's sorties were made by ~~medium~~ French and American medium bombers cooperating with the French First and American Seventh Armies, and by bombers of the French Atlantic Air Command, operating against German pockets of resistance along the Atlantic coast.

Well over 10,000 tons of bombs were dropped, more than 6500 of them by the French and American fighter-bombers. More than 2700 rockets also were fired.

Although contact with enemy fighters was rare, losses were greater than in other months, 66 fighters and fighter bombers failing to return, and five medium bombers. Only ~~axsiazk~~ ~~enayk~~ one plane -- an American-flown P-47 Thunderbolt -- was lost to hostile fighters. However our pilots accounted for 20 of the enemy shot down, four probably destroyed in the air, and eight damaged. On the ground 42 were destroyed, 26 probably destroyed and 17 damaged.

Other claims in this record month included 305 loc motives disabled and 431 damaged; 4071 railway cars disabled and 5045 damaged; 3571 motor transports disabled and 2986 damaged,

HQ FIRST TAC AF A/VANCEI, Germany --

First Tactical Air Force Thunderbolts, operating without loss and against no enemy air interference, struck again today at German communications along the southern sector of the Western Front, flying more than 200 sorties in advance of the American Seventh and First French Armies.

The XII Tactical Air Command P-47's, commanded by Brig Gen Glenn O. Barons, also carried out attacks against an enemy airbase at Menningen, some 50 miles south of Neu Sam. The American-flown fighter-bombers strafed and dive-bombed and claimed four German aircraft damaged.

Weather along the Sixth Army Group front was described as bad and American and French B-16 Marauder groups did not operate.

No reports are yet available on First French Air fighter-bomber Corps operations.

American-flown B-26 Marauders today attacked an ammo dump in Ingolstadt. Four missions successfully attacked built up areas of the target which is an important ammo dump serving enemy forces in S.W. Germany. Huge explosions with smoke rising to 10,000 feet were set off. Explosions were still continuing when the Marauders were 40 miles away on the return trip. S/Sgt Glen W. Ludy, tail gunner from Haynesburg, Ohio said "The first explosion sent flame up to 4,000 feet and the smoke skyrocketed until it was as high as we were." Fifteen minutes later I looked back and saw at least 3 more pillars of smoke as high as the first one." One B-26 Marauder with more than 1,000 hours of combat flight flew it's 150th mission today, leading the 36th Bombardment Squadron of the Boomerang Group. The plane entered combat in June 1943 against targets in Pantelleria. S/Sgt Frederick W. Orkin, Route #1, Ligonier, Indiana, is it's crew chief.

## 2. French Missions

French Marauders bombed the Laupheim airdrome 121 1/2 miles Southwest of Ulm when they dropped 50 tons of frag bombs on the dispersed areas with excellent results.

FIRST TACTICAL AIR FORCE HEADQUARTERS, FRANCE: Bad weather in Southern Germany hampered operations of the First Tactical Air Force, but French-flown B-26's and Thunderbolts of the XII Tactical Air Command carried out limited operations.

The Thunderbolts, flying in cloud conditions that varied from 2/10 to 10/10, flew more than 150 sorties against German transport and enemy positions in the Seventh Army area.

The Marauders attacked an ordnance depot at Neu Ulm servicing the enemy troops facing the First French Army and a supply dump at Donaueschingen. Hits on buildings were reported at both targets, but no further estimate of results could be made.

French-flown aircraft of the First Tactical Air Force and another active yesterday on the western and Atlantic fronts, flying more than 400 sorties against enemy defenses and communications.

In cooperation with ground forces fighting in the forests on the Atlantic, aircraft of the Atlantic Air Command hit enemy positions, machine gun batteries, and the command on the island of Oléron, and machine gunned a blockhouse and other defensive positions along the Atlantic Drive sector.

The French 1st AF carried out operations coordinated with the French First Army while French-flown bombers hit the ammunition dump at Neuquien and a supply depot at Neuquien.

The Spitfires and Thunderbolts of the French 1st AF listed the following claims:

American-flown B-26 ~~Marauders~~ Marauders today added their punch to that of French-flown mediums of the First TACAF ~~against~~ against German positions on the Gironde estuary as the offensive against Nazi pockets on the Atlantic Coast went into its third day.

#### ~~Marauders~~

~~First TACAF~~ First TACAF fighter bombers of Brigadier General Glenn O. Barcus' XII Tactical Air Command continued ~~in~~ their attacks on German ~~defensive~~ defensive positions and communications ahead of the American Seventh and French First Armies.

The Marauders, in one of their biggest days since they started operations in France, flew from early morning until after 5 p. m. tonight. Heavy calibre guns, entrenchments, pillboxes, and defended buildings were attacked with good effect.

More than 450 tons of bombs, including ~~100~~ 500, 1,000, and 2,000 pound bombs, were dropped. The Marauders encountered neither flak nor enemy fighters and there were no losses.

On the basis of early reports covering approximately 1,400 of the more than 550 sorties flown by XII TAC Thunderbolts, 122 railroad cars and 17 locomotives were destroyed or damaged in attacks on four marshalling yards, two of them at Reuplingen, 20 miles South of Stuttgart, and one each at Herbertingen, 30 miles N of Friedrichshafen, and at Ulm.

#### ~~Enemy strongpoints~~

Six ~~enemy~~ enemy strongpoints ~~on and~~ on and immediately beyond the frontlines in the Heilbronn - Hall sector were ~~flam~~ bombed and strafed.

German airbases in the Munich-Augsburg area were blasted again ~~by the~~ First Tactical Air Force ~~in~~ in forward operations today when ~~the~~ fighter-bombers of XII Tactical Air Command, flying up to 100 sorties, destroyed 33 assorted enemy aircraft on the ground and ~~caused~~ <sup>destroyed</sup> at least 24.

~~A~~ group of P-47's, commanded by Colonel Harvey L. Carr, Houston, Texas, caught more than 100 aircraft on a field at Bad Aibling, 25 miles southeast of Munich. They made ~~through~~ <sup>through</sup> ~~the~~ <sup>the</sup> ~~area~~ <sup>area</sup> and left 32 destroyed and 33 damaged. Two other airfields were attacked in the same area.

In a brief air engagement over Munich, two flights of P-47's scored strikes on a pair of ME-jet-propelled 262's, but the enemy planes broke away and fled.

An enemy strongpoint at MATTENBACH, just north-east of LANDSHUT was bombed and strafed. Pilots reported at least 15 buildings destroyed and 10 damaged.

covered the heavily built-up ammunition area with fragmentation bombs sending smoke up to 14,000 feet and causing large explosions and fires.

Two other American-flown Marauder missions were directed against the Schwabmünster ammunition dump, 15 miles south of Augsburg. Crews reported the target well-covered and additional explosions were observed long after the B-26's had left. Scant to heavy flak was encountered by one formation but there was no enemy air opposition and all medium bombers returned safely.

XII TAC fighter-bombers swept other airfields at Neuberg 12 miles west of INGOLSTADT and at Holzkirchen. Along the autobahn leading into the city, Thunderbolts dive-bombed and strafed destroying several planes, including two ME-163's, liquid rocket propelled aircraft. ~~These are built into the first plane of this type encountered by TAC fighter-bombers.~~ Three jet-propelled ME 262's were destroyed and 11 damaged on a field 20 miles northeast of Munich.

In one of two air-ground cooperations missions, the American-flown P-47's blasted an enemy strongpoint at Langenau, 10 miles northeast of Ulm. On their last sweep over the target, pilots saw white flags waving below. Summoned by ground controllers over a target 12 miles east of Ulm, Thunderbolts silenced several heavy artillery pieces and left large fires burning in a densely wooded area.

Three marshalling yards, all in the Munich-Augsburg area, were pounded heavily and Thunderbolts left large numbers of rolling stock destroyed and damaged. A troop concentration eight miles east of Ulm also was attacked.

No losses were reported up to 2000 hours.

FIRST TACTICAL AIR FORCE HEADQUARTERS, GERMANY-- A column of German soldiers today surrendered to a squadron of First Tactical Air Force's XII Tactical Air Command P-47s in a woods a few miles southwest of Augsburg.

The Thunderbolts, led by Capt. Eli J. Settersich, a 141-mission pilot, living at 436 38th St. Oakland, Calif., had made 15 bombing and strafing passes at about 200 motor vehicles dispersed in the woods, when the German ground troops filed out waving white flags and holding their hands on their heads. Advancing infantry took them in charge. The capture highlighted a day of activity limited to 18 missions and about 200 sorties by overcast weather.

Today's missions, concentrated in the Augsburg-Munich area, included attacks on an ammunition dump southeast of Achsheim where fires and explosions were seen. A locomotive and five box cars were strafed in the same area.

A few miles south of Munich 15 motor transport were destroyed and 18 damaged, while a locomotive and 15 box cars were damaged. A command post, seven buildings and three flak guns were destroyed south of Fahlenbach. Fires were started in the town and numerous vehicles were damaged.

In the only combat of the day, a flight of P-47s were attacked by 10 or 12 Focke Wolfe 190s, fighting, according to pilots' descriptions, "very aggressively." Two FWs were destroyed and four damaged. One Thunderbolt was destroyed in combat.

Bombing and strafing a German straggler-collecting point near Schropfenhausen, P-47s destroyed 10 buildings and damaged 20 and started eight fires.

Another mission destroyed a strong point and 30 buildings near Munich and damaged 50 buildings. In the same area an airdrome was hit and one enemy aircraft was destroyed and one damaged on the ground. Twenty-seven motor vehicles and nine armored vehicles were destroyed just outside Augsburg, and 36 motor transport were destroyed and 10 damaged near Munich. At Langenmoosen near Ingolstadt, a corps command post was bombed and strafed, and pilots claimed the town, which was left in flames, was nearly completely destroyed.

night fighters -- 29 April 45 --

First Tactical Air Force night fighters last night carried out a series of five uneventful patrol missions in the battle area along the Southern sector of the Western Front.

Operations of First TAC AF were sharply curtailed Saturday because of weather. More than 100 sorties were flown by Thunderbolts of ~~Brig~~ Brig Gen Glenn O. Barcus's XII Tactical Air Command and the First French Air Corps, ~~roughly~~ roughly in the Munich-Augsburg area.

There were no losses.

First Tactical Air Force operations -- 17 April 1945

For the fourth successive day French-flown B-26 Marauder medium bombers of the First Tactical Air Force today attacked the German resistance pockets on the French Atlantic coast, bombing defensive positions along the Gironde Estuary in the morning, and returning in the afternoon to hit the ~~fortress~~ fortress of ~~Blanc~~ l'Oleron, on the island of Oleron, and enemy strongholds commanding the routes used by French troops in their advance to the sea.

American B-26's of 1st TAC AF, switched today from the Atlantic front, bombed two ammunition dumps in the Ansbach area, at Alten ~~Baumgarten~~ <sup>Pottersheim</sup>, 10 miles east of Ansbach, and Gassenhausen, 10 miles southeast of Ansbach.

An HE-262, first jet-propelled plane claimed ~~down~~ during combat with 1st TAC AF Marauders, was probably shot down by S/Sgt. Harold S. Chestnut, 1237 87th Avenue, Oakland, Calif., a bombardier.

Escorting P-47 Thunderbolts of the XII Tactical Air Command also destroyed an attacking HE-109. 1st Lt. James T. Borian, Tugalo, Miss, was the victor, downing his victim when 16 HE's came down from 20,000 feet.

Other 12th Tactical Air Command P-47's attacked marshalling yards at Tutlingen, Esslingen (6 miles ~~south~~ <sup>southeast</sup> of Stuttgart) Epfendorf and Nordlingen.

Ground cooperation attacks continued against the areas of Weibbrenn, Hall, and Roschurg. A troop concentration in the Grailsheim area was bombed and strafed.

At 11:00 AM, Tactical Air Force Advanced, Germany -- American-flown  
B-26 Marauders, this afternoon continuing their close cooperative strikes against  
the enemy. The newly launched French assault on the Ile d'Oleron off the  
Atlantic coast of France, dropped 10,000 high explosives and  
more than 100 fragmentary bombs on  
three concentrations near Grand Village on the west coast of the island.

Flying in ~~the~~ sorties, the mediums in afternoon operations  
unloaded 100 tons through heavy clouds which prevented accurate observation  
of results, although crewmen reported good coverage of bombs through  
holes in the overcast.

P-47 Thunderbolts of the XII Tactical Air Command, commanded  
by Brig Gen Glenn D. Barcus, pressed their attacks against enemy  
communications at scattered points in the area east and southeast of Munich.

One squadron of fighter-bombers of the 358th "Orange-Tail"  
group, commanded by Colonel James B. Tipton, Blytheville, Ark., and a lone P-51  
Mustang reconnaissance plane, accidentally joined forces in the skies ~~near~~  
Munich in an early forenoon ~~action~~ allied to destroy three German ME-108's. All  
three enemy aircraft were seen to crash. Pilots said the ME's bore no identi-  
fication and were ~~seen~~ seen at 5,000 feet, ~~flying east.~~

Other Thunderbolts of the "Orange-Tail" group caught columns  
of enemy motor transports on autobahns in the same area destroying a total of  
131 and damaging 78. in a woods near Kolbermoor, some 20 miles southeast of Munich, P-47's  
strafed and killed at least 23 German troops. Eight were killed on horseback,  
the rest on foot.

During this period, the Germans have flown one "Ju 88," sort of a  
single-engine bomber, dropping some 1,000 tons of bombs. They have destroyed  
in the air one enemy aircraft and on additional days two or three. An attack on  
Axis oil tank lanes in the Mediterranean two enemy ships have been sunk at our  
disposal.

The group had been cited by the War Department on order of the President as a distinguished unit. General De Gaulle of the Provisional French Government also cited the group and awarded it the Croix de Guerre with Palm.

FIRST TACTICAL AIR FORCE ADVANCED HEADQUARTERS,  
GERMANY -- Twelfth Tactical Air Command P-47 Thunderbolts today  
made a record score against aircraft of grounded Luftwaffe,  
destroying 70 parked planes and damaging 104 more in strikes at six  
Bavarian airfields, in area stretching from Ulm to east of Munich.

Not one enemy plane rose to attack strafing, dive-  
bombing fighter-bombers, as they raked airdromes at Ingolstadt,  
Risstingen, Laupheim, Riem (eight miles southeast of Munich) Lechfeld  
(15 miles south of Augsburg) and Klettham, 16 miles northeast of  
Munich. Planes destroyed were ME-109's, FW-190's, JU-88's, DO-217's,  
and number other types, but no jet-propelled planes were seen.

French-manned B-26 Marauders joined ~~attack~~ assault on  
airdromes, striking field at Laupheim with excellent results  
being claimed.

Meanwhile American B-26's flew four missions against  
ammunition dump at Ingolstadt. Large explosion seen among ~~storage~~  
storage buildings, smoke rose 10,000 feet, and explosions seen by  
crews from 40 miles off, as they headed for home.

A tail-gunner, S/Sgt. Glen L. Ludy, Waynesboro, Ohio,  
said: "After first ~~explosion~~ explosion, smoke jumped up 4000 feet,  
~~and smoke rose high as we were.~~ and smoke rose high as we were. Fifteen  
minutes later I looked back and saw at least three more pillars of  
smoke high as the first."

One "Invader" with more than 1000 combat hours flew its 150th mission, in leading the "Ugly Duckling" squadron over target. Medium bomber, which entered combat June 1943 in attack on Pantelleria, was prepared for 150th trip by regular crew-chief, S/Egt. Frederick W. Working, Ligonier, Ind.

Besides their assaults on airfields, XII TAC P-47's flew close cooperation missions against towns of Sulzdorf, three miles east of Schwabisch-Hall; ~~Autumerspritz~~ Sontheim, seven miles southeast of Schwabisch-Hall; Feuchtenwangen and Altenberg, in the "Heidenheim" area and Neunmarkt, 20 miles southeast of Kuremberg. Four separate attacks were made on the last-named place; many buildings were damaged and a number of personnel killed.

Marshalling yards at Ebenhausen, seven miles south of Ingelstadt, and Aulendorf, 20 miles ~~and~~ north of Friedrichshafen, on Lake Constance were bombed and strafed.

A parked column of motor vehicles, pointed south but motionless on a road leading from Stuttgart to the Swiss border, was attacked by Thunderbolts of "Invader" group, which destroyed 34 and damaged 63.

FIRST TACTICAL AIR FORCE ADVANCED HEADQUARTERS,  
GERMANY -- French-flown aircraft of the First Tactical Air Force  
had another active day on the Western and Atlantic fronts, flying  
more than 475 sorties against enemy defenses and communications.

In cooperation with the ground forces closing up  
the German pockets on the Atlantic, aircraft of the French Atlantic  
Air Command bombed flak positions, heavy gun batteries and the  
chateau on the island of Oleron, and machine guns, a blockhouse and  
other defensive positions in the Pointe de Grave sector.

The French First Air Corps carried out operations  
coordinated with the French First Air Corps, while French-flown B-26  
Marauders hit the ammunition dump at Neu Ulm, and a supply dump  
at Donaueschingen.

The Spitfires and Thunderbolts of the French First  
Air Corps registered the following claims:

First TAC XOPS -- 19 April 1945.

CENSORED BY FIRMAN 43

FIRST TACTICAL AIR FORCE ADVANCED HEADQUARTERS,  
GERMANY -- ~~XX~~ Medium  
bombers and fighter-bombers of the First Tactical Air Force,  
confined to somewhat more than 200 sorties today by cloudy weather,  
continued to operate against enemy supplies, defenses and communica-  
tions ahead of the U. S. Seventh and French First Armies.

B-26 Marauders flown by French crews attacked an  
ordnance depot at Neu Ulm and a supply area at Donaueschingen.  
There was not good observation of results, but airmen reported their  
bombs landed in the designated areas. No enemy aircraft opposed these  
attacks, and none of the medium bombers is missing.

~~TACTICAL~~  
XII Air Command P-47 Thunderbolts, operating ahead of  
the ~~XXXX~~ Seventh Army, scored the following claims according to  
early and incomplete reports:

FORST TACAF OPS - 21 april -- pass to Capt. Teller

CENSORED BY FIRMAN 43

FIRST TACTIC L AIR FORCE ADVANCED HEADQUARTERS,  
GERMANY -- Flying through ~~xxxxxxxxxxxx~~ thunderstorms and  
dense clouds, XII Tactical Air Command fighter-bombers of First  
TACAF carried out approximately 500 sorties today against  
airfields, communications and enemy strong points ahead of U. S.  
Seventh Army.

Heaviest blows of day were delivered against defenses in  
number of towns and villages ringing Seventh's easternmost thrust:  
Kirchheim, Pabelsbach, Hockdorf, Georgensmund Weissenburg, Ober Speltach  
and Grungelhardt. Fires were started in all these towns.

Nine grounded aircraft were destroyed on ~~xxxxxxxxxxxx~~  
two airdromes at Landsberg, and ~~xxxxxxxxxxxx~~ 13 others  
damaged. Marshalling yards in the key communications centers of Augsburg  
and Regensburg were attacked, and large numbers of Motor transport  
and horse-drawn vehicles, most of them headed south, were bombed and  
strafed by XII TAC P-48 Thunderbolts in same general area. Just  
south of Regensburg P-47's found large concentration motor transport  
parked under group of sheds; set sheds afire and destroyed 56  
vehicles.

Summary of day's operations, not including French

FIRST TACAF OPERATIONS -- 23 APRIL -- PASS TO CAPTAIN TELLER

FIRST TACTICAL AIR FORCE ADVANCED HEADQUARTERS,  
GERMANY -- XII ~~XXXXXXXXXXXX~~ Tactical Air Command P-47 Thunderbolt  
of First Tactical Air Force continued operations against grounded  
Luftwaffe today, destroying 23 German planes on airfield at  
Lichtenau, south of Ingolstadt. Fighter-bombers were held down by  
cloudy weather to approximately 150 sorties.

Four enemy fighters were sighted in the air during  
day, and of these one destroyed, one probably destroyed, one damage.  
P-47 pilots spotted three ME-109's ~~XXXX~~ 10 miles northwest  
Augsburg, closed in, knocking down one Messerschmitt and  
probably destroying another. Later a lone ME-262 jet plane was  
destroyed ~~XXXX~~ between Ulm and Augsburg.

At marshalling yard at Schwarzenbach, 12 miles east  
of Friedrichshafen, on Lake Constance close to Swiss border,  
American-flown Thunderbolts destroyed two locos, damaged 29  
railway cars. A radio tower also destroyed.

Summary of day's operations, not including French  
First Air Corps, follows:

First tactical ops 29 April 1945

FIRST TACTICAL AIR FORCE HEADQUARTERS,  
GERMANY -- Eighty aircraft in the area east of Munich, and  
grounded aircraft of the Luftwaffe, and scattered German  
rail and road traffic moving southward out of Munich, were  
the objects of attack today by XII Tactical Air Command P-47  
Thunderbolts of the First Tactical Air Force, which carried  
out some 20 sorties despite cloudy, drizzling weather.

In attacks on ~~four~~ eight different airdromes in  
an area east of Munich, 44 grounded aircraft of all types were  
destroyed, and 43 were damaged. The Bad Aibling field, 25  
miles southwest of Munich, and the Munich-Reim airfield, both  
sizeable installations, were bombed <sup>and strafed</sup> as well as six minor strips  
in the same region. A jet-propelled ME-262 and JU-88's, ME-109's,  
FW-190's, ME-110's, JU-52's and some unidentified planes were  
listed among those destroyed. One ME-262 was damaged in the air over  
Munich. Four P-47's are missing from the day's operations.

Pilots reported considerable but scattered movement  
of road and rail transport in a big area to the south and  
east of Munich, going southward out of the city. They also observed  
one column of more than 500 civilians, on foot, moving out of  
Munich. *to the W. P.*

Enemy strong points in the towns of Hattenhoffen,  
Mammendorf and Furstenfeld were bombed and strafed, and fires  
were started.

French B-24 Starliners medium bombers of the First Tactical Air Force today began their second year of combat with attacks on positions in German-held pockets on the Atlantic Seaboard, and under First TAC AF medium, and P-47 Thunderbolts of the Twelfth Tactical Air Command, continue to harass enemy supplies and offensive positions in the southern front.

The French B-24s dropped some 1000 demolition bombs in 1943 by 6000-2000 tons, a force of 100 north of Royan, covering enemy strong-points, pill-boxes, artillery positions and beach-head defenses, with blanket of bombs. Some crashes reported near the coast, but in general little opposition was encountered and there was no loss. These operations followed an active day for the bombers of the French Atlantic Air Command, also under First TAC AF control, which flew more than 75 sorties against armored turret gun batteries, water transport marks and enemy troop concentrations in the same area.

Meanwhile P-47 Thunderbolts of 28th and 32nd Brigades General John Marcus's 12th TAC struck marshalling yards, bridges, enemy positions and troop concentrations ahead of the U. S. Seventh Army.

On the basis of early and incomplete reports 22 railway cars and three locomotives were destroyed in marshalling yard in and near Nordlingen, Herbrachtingen (17 miles northeast of Ulm); Schorndorf (17 miles west of Stuttgart) and Schwabach, 10 miles south of Nuremberg. Forty-nine cars and eight locomotives

1st first tactical ops 14 April

very active in these tracks.

The airplanes were attacked in the Hardlingen area, and 10 aircraft were destroyed and four damaged on the ground.

The principal point of troop concentrations were located in the vicinity of the village of Hardlingen; Ingelstadt, Stuttgart and Wehring. The village of Wehring, one mile west of Ingelstadt, was bombed. Some 200 troops in Wehring, 15 miles northwest of Ingelstadt, were strafed, but poor visibility prevented observation of results.

American-flown medium bombers, escorted by 1st TAC P-47's, attacked the enemy air base at Stuttgart. There was poor visibility over the base, but several enemy aircraft were reported as being downed. The enemy also reported, in other parts of the area, the concentration of explosions.

According to reports, the only aerial victory of the day. When the P-47's appeared below the clouds, 1st Lt. W. T. Bryant, 122nd Fighter Group, Berkeley, Calif., was down to investigate. He approached it head-on, and it was destroyed. Bryant fired the bullets at the other, and the pilot fell out and the plane exploded. It was Lt. Bryant's first air victory, although he was flying his 100th air-to-air mission.

Weather limited operations, but further limited ~~xxxxxx~~ incomplete reports showed more than 50 sorties flown, not including those of the fighter-bombers of the French First Air Corps, of whose activity no report was available.

FIRST TACAF OPS APRIL 16

PASS TO CAPTAIN TULLER, PRESS CAMP.

Both ~~French~~ <sup>and</sup> American ~~B-26~~ B-26 Marauder medium bombers, flying more than 300 sorties, kept up the assault on German resistance pockets on the French Atlantic coast from early this morning until after five o'clock this afternoon, bombing heavy-caliber guns and enemy strong points and defensive positions along the Gironde Estuary, in an area 11 miles northwest of Royan.

The bombers, striking in waves and at intervals as close as ten minutes apart, dropped 500-pound, 100<sup>0</sup>-pound and 2000-pound fragmentation and high explosive bombs, with excellent results being reported by French and American crews. No enemy opposition of any kind was encountered, and all the "marauders" returned safely.

Far to the east, on the U. S. Seventh and French First Army fronts, Twelfth Tactical Air Command P-47 Thunderbolts flew more than 500 sorties against railway yards, airfields, and enemy defenses holding up the advance of the Sixth Army Group ground forces.

Strong points and fortifications in the ~~area~~ Heilbronn area and near Hall, and in the French sector to the southeast of Strasbourg, were bombed and strafed, and pilots destroyed 114 fortified ~~buildings~~ buildings.

Marshalling yards were attacked at Ulm and at Herbertingen, 30 miles north of Friedrichshafen, and Reuplingen, 20 miles south of Stuttgart.

Six aircraft were destroyed on the ground at airfields at Sulzbach, 35 miles east of Nuremberg, at Boblingen, and on an autobahn converted into an airfield ~~at~~ near Sulzbach.

One ME-109 was shot down over the Seventh Army's battle-zone

Two formations of 20 ME-109's each-- largest force the fuel-starved Luftwaffe has put up against the First Tactical Air Force in this area-- were shot down by Thunderbolts this afternoon, and two of the enemy were shot down without loss of an American plane.

The P-47's, all of the American fleet XII Tactical Air Force aircraft, were limited to slightly more than 100 sorties today, after being grounded by weather until mid-afternoon.

Most of the day's operations were concentrated on and near the town of Ocholtz, five miles north of Jellisonn. Enemy strong points in the town were hit, and 10 buildings were destroyed. The Ocholtz airfield was attacked, and an unidentified enemy aircraft was shot down and a target located.

The 10th Tactical Reconnaissance Group and eight P-47's, all members of the 1st Tactical Reconnaissance Group, were also shot down as the Thunderbolts were returning from an armed reconnaissance mission.

The ME-109's were flying low, level with us, at about 500 feet, said 1st Lt. Harry J. Green, 1st, 10th, who shot one of the enemy planes. "They made one head-on pass, then all broke off into the clouds."

Regester and 1st Lt. Marion L. Green, Lone Tree, Iowa, the other pilot to score a victory, got theirs in almost identical manner.

In both cases the Messerschmitts broke off right after the first pass; ducked into the clouds. Green and Aegeter each followed his own into the clouds and fired at about 50 yards, in an open space in the clouds. Both ME-109's caught fire, crashed and exploded.

Because of the bad flying conditions, no claims were made except the 16 buildings went down, the two planes went down, the plane probably destroyed on the ground and the man, r. m. aged.

There were no losses during the day.

From the last week in November to the first week of February, the enemy forces west of the Rhine positions in the Rhine-Moselle triangle and at Colmar. They had established a bridgehead north of Strasbourg armor into the Siegfried-Maginot line area north of Strasbourg.

December and January activity involved the reduction of the dangerous offensive threat of enemy French in reaching the Rhine. The medium bombers of the First Tactical Air Force (Prov.) became operated assigned as a primary mission attacks on the enemy supplies of liquid fuel. Meanwhile, fighters and P-47s disruptive strafing and bombing. Rail fills, tunnels and bridges connecting Kaiserslautern with the Rhine Karlsruhe were attacked repeatedly. An interdiction program was inaugurated to frustrate an enemy withdrawal the Colmar pocket. This operation was so successful that the German 19th Army, which had held the pocket thing less than 4,000 combat infantrymen when the pocket collapsed February 8th.

From the clearing of the Colmar pocket to D-Day (15 March) in the 7th Army's Haguenau-Saverne-Saarlouis were preparing for the Spring drive, while the air force attacked active supply installations, barracks rail system. The systematic rail interdiction program was of prime importance. The lines leading east were demobilized by air attack. On the rail line from Zweibrücken to Landau no movement was sighted all March all rail communications with Rhine crossings were unserviceable to the enemy. between 24 March and 8 May, the extent and implications of the defeat in the Atlantic became apparent. The Germans were forced to fall back upon successive strategic supply centers. They were prevented from adopting a defensive stance. A systematic program of air attack on these centers was undertaken. Concentrated attack on the Rhine River, the program of rail interdiction, originally conceived to isolate the enemy forces between the Rhine and the Moselle, was abandoned as more harmful to our rapidly advancing forces than to the enemy.

As the advance progressed to its final phase in the North, the Luftwaffe began to show signs of becoming a purely defensive force. Units and fragments of units began to appear from fields around Stuttgart, patrolling of active fields, however, prevented their effective use on any great scale. In addition, they were hampered by shortage of fuel, a condition that the medium bombers of the First Tactical Air Force had helped bring about.

Meanwhile, plans for the clearance of German resistance from the Western Front, on the Western Front in April medium bombers and fighter bombers of the First Tactical Air Force (prev.) assisted in the support of this campaign. They attacked enemy troops, storage points and air installations. Similar support was provided the Isle d'Oron. With the reduction of resistance on the island, the final enemy barrier to the south of the Rhine was eliminated.

As of the 8th of May 1945, the American Component of First Tactical Air Force (prev.) consisted of the following:

The extent and implications of the defeat in the Balkans became apparent. Without trained units to fall back upon successive strategic supply centers. They were prevented from attempting a real program of air attack on these centers was undertaken. Concentrated attacks were made on rail and rail interdiction, originally conceived to isolate the enemy forces between the line and the sea, were harmful to our rapidly advancing forces than to the enemy.

In its final phase in the South, the Luftwaffe began to show signs of becoming a threat. Driven from all units and fragments of units began to appear from fields around Stuttgart and Munich. Careful air, prevented their effective use on any great scale. In addition, their operations were limited by the medium bombers of the First Tactical Air Force had helped bring about in January.

Resistance of German resistance from the German sector, on the Western French Coast, were made. Late in the month, bombers of the First Tactical Air Force (Prev.) assisted in the support of the ground forces in the capture of troops, storage points and gun emplacements.
